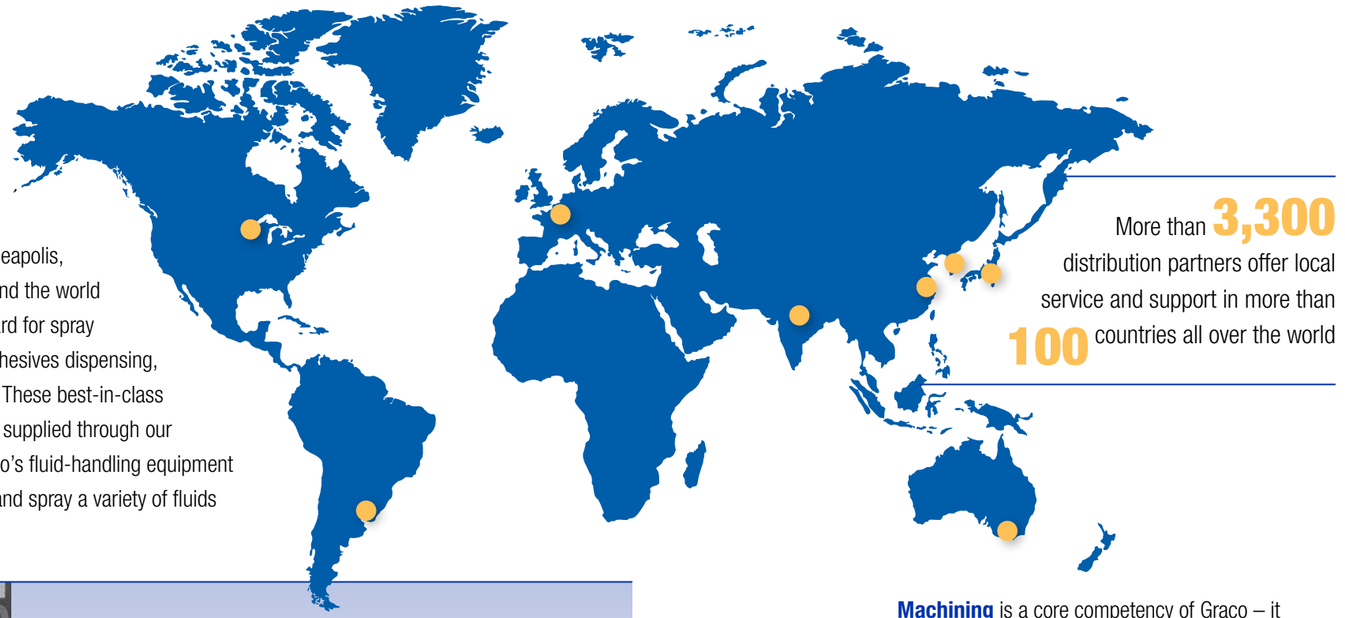
About Graco

Established in 1926, Graco has built a worldwide reputation for high quality, reliable and technically advanced products, world-class manufacturing and outstanding customer service. Headquartered in Minneapolis, Minnesota, Graco works closely with distributors around the world to offer innovative products that set the quality standard for spray finishing, paint circulation, lubrication, sealant and adhesives dispensing, process application and contractor power equipment. These best-in-class products are manufactured in the U.S. and China and supplied through our distribution centers around the world. Every day, Graco's fluid-handling equipment and systems move, measure, mix, control, dispense and spray a variety of fluids and materials.



More than **3,300** distribution partners offer local service and support in more than **100** countries all over the world

Lubrication Equipment Division

From the first air-powered grease gun to our industry-leading Fire-Ball pump, Graco's Lubrication Equipment Division is what started it all. We manufacture equipment to monitor, control, manage and dispense fluids. Offering innovative equipment for all your vehicle services, industrial and automatic lubrication needs.

Keep your equipment running at peak performance. Graco automatic lubrication solutions give you the ultimate machine performance by lubricating key wear points – the right amount of lubricant, at the right time, in the right location. Graco has automatic lubrication solutions for the industrial, on-road mobile, off-road mobile, energy industries and more. From light-duty applications to high-performance concepts designed for heavy-duty jobs, our equipment is known for its rugged, durable and long-life design.

Machining is a core competency of Graco – it enables complete control of the component parts needed to ensure precise metering, reliable dispensing and fluid movement.

When it comes to **research and development**, Graco is one step ahead, ensuring we offer the best possible solutions. To guarantee superior quality and to meet the changing requirements of your markets, we prioritize investing resources in research and development. Innovative technologies and extensive field testing are a natural part of our process to develop new products. Also, every aspect of our production is subject to constant testing and evaluation. It's the foundation to deliver products with long service life and low cost of ownership. The insurance to help you grow your business.

We understand our customers. We build a partnership, working and striving towards new solutions, together. We are at the service of our distribution partners, supporting you along the way. Look at Graco not just as a manufacturer or supplier but as an extension of your business. Our dedicated and experienced teams offer unique capabilities to help you meet your specific goals and challenges.

- Innovative, high-quality products with unique features
- A professional warranty and high service rate
- Purchasing conditions aimed at profitable growth
- A committed sales and marketing team for tailor-made support of expanding sales opportunities
- Continuous technical, commercial and hands-on training

Our world-class distribution centers and unrivaled global distributor network give Graco a unique industry advantage that allows us to rapidly deliver our products to end users worldwide.

Exceeding customer expectations is our priority. Our multilingual team of customer service specialists and technical engineers are available to you. Graco offers instructor-lead training sessions in the United States, EMEA and Asia Pacific. These courses teach theory and hands-on practical applications, covering basic operational to advanced technical knowledge. Each training session can be adapted to your specific needs.

Offering more than just products, we are focused on building relationships, identifying and developing business opportunities with you. Our sales team is available to collaborate, define strategies to assist in navigating through our product offering and provide advice on promotional activities.

Graco's marketing specialists investigate ways to expand the market and develop the right technologies for any application, in close cooperation with distributors and field users. We offer tailor-made promotional and communication support, from defining strategic requirements to developing marketing campaigns, organizing events and creating digital or printed material.

Did You Know?

Graco also manufactures and sells a complete line of high-quality pumps, meters, valves and hose reels!

Graco offers a full line of quality equipment to meet the varying needs of vehicle maintenance and repair. Streamline your workflow and move more lubricants through your shop. We offer reliable, high-quality equipment you can depend on for fuel, diesel, antifreeze, oil and grease. Our versatile fluid inventory control and management systems are designed to accurately track the use of oil, grease and other automotive fluids at vehicle maintenance facilities, and our lubrication equipment ensures you deliver fluids to the right spot in your shop.

Graco Resources

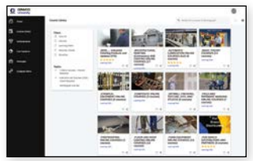
Graco has developed tools and resources to help educate and better serve our distribution channel. Check them out today:

Graco Sales Book

Stay up-to-date with the newest information from Graco by downloading the Graco Sales Book App.

Graco Sales Book is an innovative mobile application, designed to give Distributors access to Graco product information, including brochures, manuals, videos, and training documents – all on your mobile device.

Download today by visiting
salesbook.graco.com



Graco University

Graco University is an e-learning module that can be accessed online, anytime, and contains assets that help educate you on Graco products.

This innovative online learning program gives the tools to stay on the leading edge with a variety of resources such as virtual and instructor led courses, online books, live and on-demand video presentations, and much more.

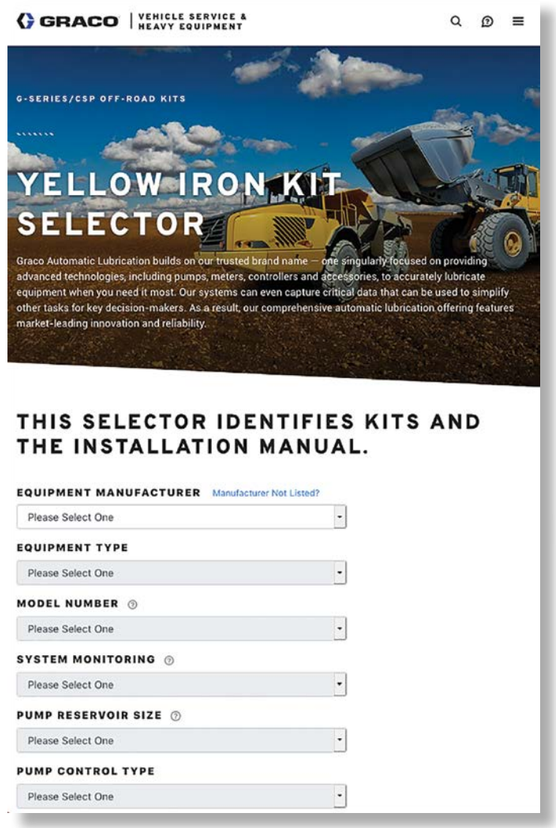
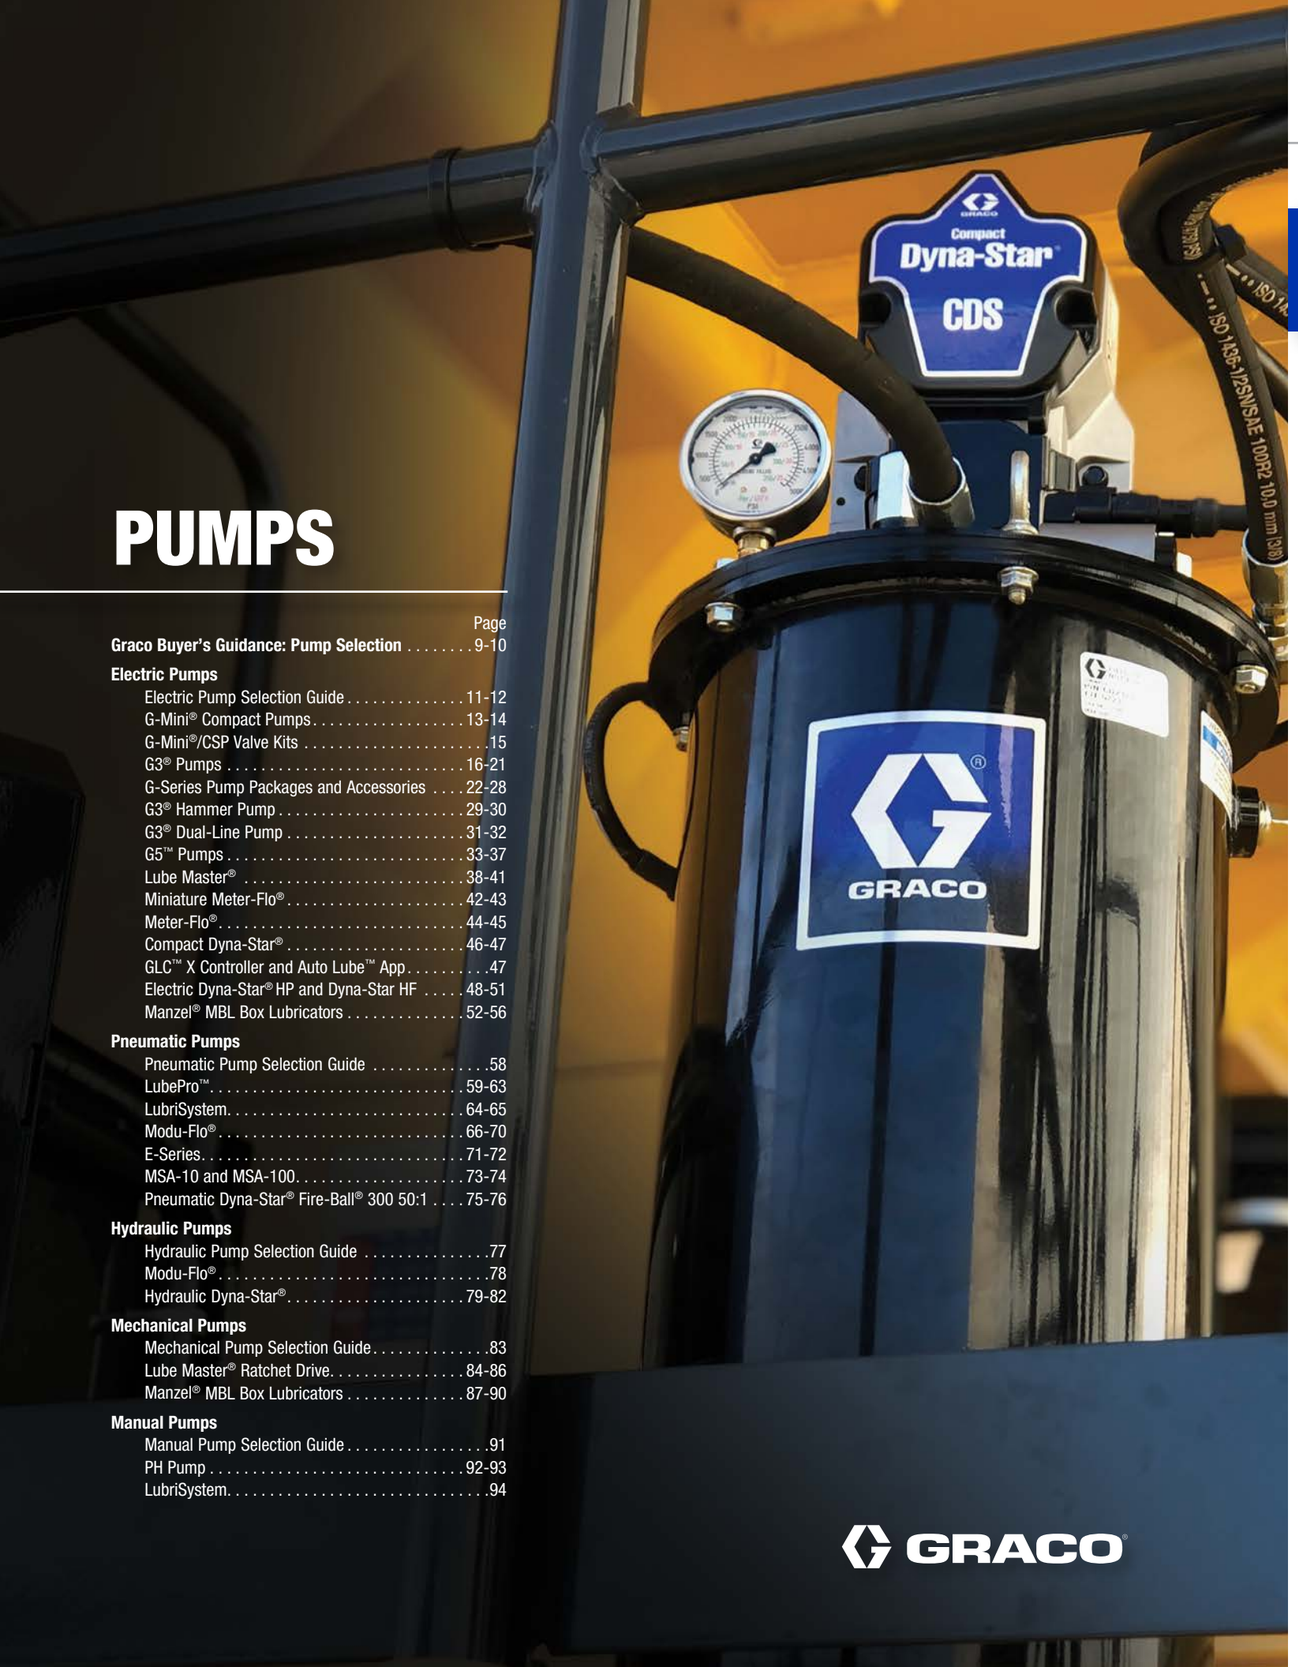
graco.mybigcommerce.com

Graco mobile equipment kits provide the latest technology from Graco, including the G-Series pumps, solid-state proximity switches, CSP divider valves, and hoses and fittings. Each kit will include all of the components necessary for model-specific customizations.

In order to eliminate system design and streamline the sales process, we have created a quick-to-spec, quick-to-quote and quick-to-sell solution. Scan the QR code below or visit **www.graco.com/offroadselector** to find an automatic lubrication kit for your piece of heavy equipment.





PUMPS

When determining the right Graco pump for your application, please consider the following factors:

1. What POWER is available?

Graco has pump options for:

- Electric
- Pneumatic
- Hydraulic
- Mechanical
- Manually operated

If the customer has multiple power options available, which one would they prefer to use?

2. What FLUID is being used as the lubricant?

Is this an oil system or a grease system?

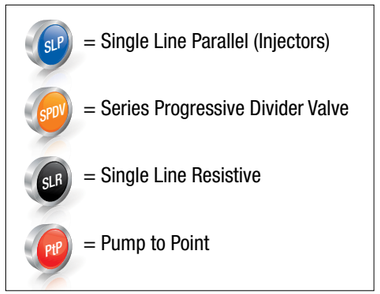
- Several pumps work with both oil and grease, but many are for one or the other.
- **Important:** Graco automatic lubrication equipment is designed for use with oils and greases that are based on mineral oil or synthetic lubricant. If you are working with a different material, please contact the correct Graco division.

3. Which type of METERING DEVICE is being used?

Single Line Parallel (SLP) systems require a vent valve to function.

- Injectors and piston distributors (Injecto-Flo) are SLP systems.
- Not all pumps are offered with vent valves.
- Some vent valves are sold separately.
- Some do not offer a vent valve option.

Series Progressive Divider Valve (SPDV) and Single Line Resistive (SLR) systems require a relief valve, but not a vent valve.



4. What FLUID PRESSURE and FLOW RATE are needed to operate the metering system?

Pressure at the pump outlet is affected by the type and size of the metering system, as well as the viscosity and temperature of the lubricant.

- With SPDV and SLR, total flow is simply the sum of all the lube points' flow requirements.
- For Injectors and other SLP systems, extra volume is required because some of it is vented back to the reservoir between lubrication cycles.

For more information on lubricant metering options, see the Metering Devices section later in this Buyer's Guide.

5. What SIZE OF RESERVOIR is required?

System design "best practice" is to deplete the reservoir once a month, if possible.

- This keeps the customer from forgetting that it needs to be refilled regularly.
- Regular reservoir depletion also helps to prevent grease separation.

6. Does the customer prefer to have a CONTROLLER INTEGRATED into the pump body?

Integrated controllers are only offered on G-Series pumps:

- G3 SP, Pro and Max
- G5 Pro
- G-Mini Controller
- Electric Grease Jockey (EGJ)

Most G-Series pumps also offer a controller-less version for use with external controllers or a customer's PLC.

- G3 Standard
- G-Mini No Controller

Some pumps are designed to run constantly, without a controller. All other pumps require an external controller, which can be:

- a Graco controller
- a different brand
- a PLC
- or anything that can control the pump's connection to its power source.

For more information on controller options, see the Controllers section later in this Buyer's Guide.

7. Other factors to consider:

- Does the pump need to send some form of signal output (i.e. alarm, low level, etc.)?
- Does the pump need to log performance data (i.e. DMS or Auto Lube app)?
- Is the pump mounted in a location that would benefit from Auto-Fill Shut Off (AFSO)?
- What are the operating conditions of the application (i.e. weather, heat, vibration, contamination, etc.)?

Important: Always keep in mind that there could be <u>more</u> than one correct answer.

- Don't be surprised if you have more than one good option.
- Ultimately the choice may come down to preference; either yours or your customer's.

Consult with your local Graco Lubrication Account Manager for help finding the best solution.

Pump Family	Typical Applications	Voltage	Fluid Type	Maximum Output Pressure psi (bar)	Maximum Output Volume per Minute in^3 (cm^3)	Reservoir Capacity Options		Metering	Reference Page
						US	Metric – Liters

*CDS and EDS pumps require converter box 77X524 for AC applications.

SLP = Single Line Parallel (Injectors) SPDV = Series Progressive Divider Valve SLR = Single Line Resistive PtP = Pump to Point

Small size. Big value. Huge impact.

Make the most of your space, budget and machines. The new full-featured G-Mini offers reliable lubrication in a small footprint to fit more types of machines. Use it to simplify everyday maintenance, extend life cycles and optimize uptime. It's rugged and tough, perfect for handling the 24/7 rigors of any job, big or small. Best of all, it comes with a modest price tag – boosting your productivity and profitability.

Follower Plate and Stir Paddle

Available in 0.5 liter and 1 liter reservoirs.

Patent-Pending Heater Option

Built-in heater option automatically turns on at 23ºF (-5ºC), allowing NLGI #2 grease to pump down to -40ºF (-40ºC).

M12 Input

M12 cycle or proximity switch input standard on all pumps with a controller.

Power and Low Level Options

CPC or DIN-style connectors make for easy, no hassle installations.

Multiple Reservoir Options

0.5 liter, 1 liter and 2 liter grease capacity.

Up to Two Pump Elements

0.18 in^3/min (3 cm^3/min) 4,061 psi (280 bar)

Optional Controller

No Controller: Pair with either an external controller or a PLC.

Controller: Easy-to-program controller can be utilized for both time-based and cycle-based systems and provides low-level alert and alarm.

Rugged Construction

Designed to withstand the harshest of environments; IP69K rated.

Typical Applications

- Wind energy
- Industrial
- Off-road mobile equipment
- On-road mobile equipment

Technical Specifications

Maximum working pressure	4,061 psi (280 bar)
Fluids handled	Grease NLGI #000 to #2, Oils 40 cSt and up
System	Pump to point or series progressive
Power	12 VDC, 24 VDC or 100-240 VAC
Operating temperature	-40°F to 158°F (-40°C to 70°C)
Reservoir size	0.5, 1 or 2 liter
Pump element output	0.18 in^3 (3 cm) per minute
Pump elements	Up to 2
Pump outlet thread	1/4-18 NPSF female, mates with 1/4-18 NPT male fittings
Certifications/Ratings	CE, ETL*, IP69K *Conforms to UL 73, certified to CSA 22.2 No. 68-09
Instruction manual	3A6714

Accessories

Part Number	Description
127783*	2-wire CPC power cable, 15 ft (4.6 m)
2003467*	5-wire CPC power cable, 15 ft (4.6 m)
16U790*	DIN connector power or low level cable
25C981	12V manual run button (5-wire CPC power cable required)
25C982	24V manual run button (5-wire CPC power cable required)
26C825	Direct mount CSP bracket (allows for drop-in replacement of competition)
26C826	Universal mounting bracket (allows for drop-in replacement of competition)
17L879	Graco CSP solid state proximity switch (DC PNP)
17R703	1 ft proximity switch cable, M12 female straight to M12 male straight cable
124333	16.5 ft proximity switch cable, M12 female straight to M12 male straight
26A910	4,000 PSI pressure relief kit (1/4 NPT to 1/8 NPT reducer bushing, 1/8 NPT tee-fitting, 4,000 PSI pressure relief valve)
26C947	Pump element kit (add a second pump element or replace existing)
24M644	High capacity fill stud with dust cover
121474	Mating coupler for 24M644 fill stud
247886	Manual fill pump – fits 5 gallon or 35 lb pail, includes 121474 (requires 24M644)

*G-Mini pumps do not come with power cables. Power cables needed for installation.

See the G-Series Pump Accessories section (pages 22-28) for additional G-Mini accessories.

G-Mini/CSP Valve Kits

Each kit includes a pump assembly with mounting bracket, pressure relief valve and outlet hose all pre-assembled to the pump. These kits allow users to quickly build a simple automatic grease system for many small applications. All pumps below include a controller and utilize DIN connections for their power cables.

Also included:

- G-Mini power cord
- CSP valve
- CSP outlet fittings for 6 mm OD tubing
- 6 mm x 1/8 in NPT end point fittings
- Elbow fitting for the CSP inlet
- 6, 8 and 10 outlet kits include 82 ft (25 m) of 6 mm OD tubing
- 12, 14 and 16 outlet kits include 164 ft (50 m) of 6 mm OD tubing

Versatile Design Helps Solve Today's Lubrication Challenges

Temperature changes, changing grease types and challenging installation requirements are no problem for the G3 electric lubrication pump. With its flexible design, including five reservoir sizes, three controller options, three power types and an adjustable pump element, the G3 is a rugged, cost-effective pump designed to serve multiple markets and applications.

Reservoir Types

Stirring paddle with wiper arm to keep material from separating. Follower plate available for extreme angle installations. Spin-off lid option allows easy grease removal for servicing. Auto-Fill Shutoff (AFSO) option simplifies remote filling. Oil reservoirs include vented fill cap and strainer.

Cycle Switch Input

Count cycles of a series progressive divider valve such as MSP, CSP, and others.

Power Choices

Connect to DC (12 or 24V) and AC (90-240V) power sources with CPC or DIN-style connectors for easy, no hassle installations.

Machine Count Input

Machine count input to manage equipment with unpredictable lubrication requirements.

Controller Options

Choose from Standard, Pro and Max controller options – buy only what you need for your application.

Multiple Reservoir Sizes

Choice of 2, 4, 8, 12 or 16 liter U.V. resistant, high-impact reservoirs for oil and grease to meet the needs of your equipment.

Three Pump Elements

G3 comes standard with one adjustable pump element installed – add up to two more for higher output on large projects.

Versatile Pressure Sensor Input

Compatible with analog pressure transducers. Also works with PNP, NPN, and dry contact pressure switches.

Vent Valve Output

Combine Max controller with a vent valve for injector-based systems.

Typical Applications

- Off-road mobile equipment
- On-road mobile equipment
- In-plant machine and conveyor lubrication
- Wind energy

Typical Fluids

- Oil
- Grease up to NLGI #2

Technical Specifications

Maximum working pressure	5,100 psi (352 bar)
Fluids handled	Grease NLGI #000 to #2, Oils 40 cSt and up
Power	12 VDC, 24 VDC or 100-240 VAC
Operating temperature	-40 to 158º F (-40 to 70º C) depending on lubricant used
Reservoir size	2, 4, 8, 12 or 16 liter
Pump element output	0.12 in^3, 0.18 in^3 or 0.25 in^3 (2 cm^3, 3 cm^3 or 4 cm^3) per minute
Pump elements	Up to 3
Pump outlet thread	1/4-18 NPSF female, mates with 1/4-18 NPT male fittings
Certifications/Ratings	CE, ETL*, IP69K *Conforms to UL 73, certified to CSA 22.2 No. 68-09
Instruction manuals	Standard – 332291 / Pro – 332298 / Max – 3A9511

G3 Standard, Pro and Max Gen 2

Choose the level of control you need for your series progressive or injector based applications.

G3 Standard

- No internal controller – use with separate or existing machine control for a low cost solution
- Capable of sending a low level signal to your external controller or PLC

G3 Pro

- Built-in controller with selectable pump on/pump off timer
- Low level indicator provides low warning and shut-down alarm
- Manual run initiates lube cycle on-demand (remote option also available)
- Password protection safeguards settings
- Pre-lube function can initiate lube cycle on start-up

Auto-Fill Shut Off (AFSO)

- Available on G3 Standard, Pro and Max
- Eliminates over- or under-filling
- Completely fill the reservoir while avoiding costly spills
- Does not require power to operate

G3 Max Gen 2

- Built-in controller with with option of ending on time, cycle or pressure
- Low level indicator provides low warning and shut-down alarm
- Manual run initiates lube cycle on-demand (remote option also available)
- Password protection safeguards
- Pre-lube function can initiate lube cycle on start-up
- Machine count input – ideally suited for inconsistently used equipment
- Fault indication to external alarms

Ordering Information

G3 Standard

Comes standard with no controller for use with separate or existing machine control for a low cost solution.
Some models capable of sending a low level signal to your external controller or PLC.

*G3 Pro pumps with the M12 connection for Remote Manual Run/Monitoring Light use the kit with the connecting cable to provide external low level indication. Choose part number 571032 for 12 VDC pumps or 571033 for 24 VDC and AC pumps.

**G3 Pro pumps with the 5 Wire CPC power connection are compatible with a Remote Manual Run/Monitoring Light Device to provide external low level indication. Choose part number 571030 for 12 VDC pumps or 571031 for 24 VDC pumps.

Ordering Information

G3 Max Gen 2

Gain peace of mind with the pump system that makes it easy for you to know it is working. The G3 Max Gen 2 pumps feature an intuitive LCD screen with backlight. The LCD simplifies programming by displaying a menu, similar to the GLC X and GLC 4400 controllers. Bright LED status lights on the keypad communicate the pump state from a distance, and at a wide angle. Alarm screens includes troubleshooting tips, and a QR code displays on each alarm screen to provide access to Training-On-Demand via Graco's online "G3 Support" Education Center. Optional cellular connectivity provides access to realtime feedback of pump fleet using intuitive Graco Trace™ website.
Ordering the Gen 2 pumps has been streamlined by including all features on all bases. Part number selection is now as simple as choosing the voltage and power connector, and then selecting the reservoir.

Features of Max pumps with DIN power connectors:

- Include DIN Alarm Relay Output, a dry contact relay which opens or closes when a fault is detected. This relay acts as a switch but supplies no power. It requires external power to energize the circuit when closed. If not connected, use part number 24P731 to cover the DIN connector and maintain IP69K rating.
- Include M12 output for illuminated remote manual run buttons. Kit 571033 (sold separately) includes M12 cable and is compatible with both 24V DIN and AC pumps.
  Features of new CPC-7 power connection:
- The new CPC-7 power connector utilizes the same CPC connector as previous G-Series pumps; now all 7 positions are populated with input and output functions.
- Connections for tri-color remote manual run and LED push-button in CPC; similar to CPC-5 on the EGJ and G-Mini Controller pumps
- Two alarm output signal wires: one for low level and one for system alarm (requires cable 2001714, sold separately).
- Pumps ship with a 2-wire power cable. For compatibility with illuminated remote manual run buttons 571030 (12V) and 571031 (24V), order 5-wire power cable 2003467 (15 ft/4.6 m), 2003896 (30 ft/9.1m), or 7-wire cable 2001714 (15 ft/4.6 m).

Features of all G3 Max Gen 2 pumps:

- Compatible with Single Line Parallel or Series Progressive applications.
- Pressure sensor input can connect to analog pressure transducer, or normally open pressure switch.
- Include inputs for Machine Count and one Cycle Count.
- Vent Valve output designed for Normally Open vent valves to ensure complete venting of parallel systems.
- Vent Valve output can be repurposed to control an air solenoid for spray applications.

Pumps with Cellular Connectivity

LTE-m mobile data connects to Graco Trace™ cloud website for remote access to status of your pumps from anywhere you can connect to the web; on your phone, tablet or PC. The analog level sensor communicates lubricant reservoir status to the cloud. Graco Trace lets you to program the pump remotely, reset alerts and alarms, and can send optional SMS and email messages when alerts or alarms occur.

G3 Pumps with Auto-Fill Shut Off

Versatile line of G3 Pumps (Standard, Pro, and Max) offered with a factory installed Auto-Fill Shut Off (AFSO). The AFSO feature automatically shuts off lubricant flow from a fill pump to the G3 reservoir once the G3 reservoir is full. The G3 AFSO is based on the same design concept as the Auto-Fill Shut Off offered in conjunction with the robust Electric Dyna-Star product line. Eliminate the need to climb up on equipment to refill an empty reservoir by adding Remote Fill Manifold 77X542 to your system at ground level.

Application	Grease	Voltage	G3 Model	Reservoir Size		Number of Cycle/ Pressure Input	Vent Valve Output*	Wiper Arm	Low Level	Power Connection
				4 liter	8 liter					
		24 VDC	Standard	96G210	96G213			•	• DIN	DIN

G-Series Reservoir Upsize and Conversion Options

G3 and Electric Grease Jockey pumps all consist of a base and a reservoir. The bases are all designed for 2 L reservoirs, so to convert to a larger a reservoir, a 2 L to 4 L adapter is required.

Size	Oil Reservoirs 8 L and larger oil reservoirs simply require one 4 L oil reservoir plus expansion rings (qty.)	Grease Reservoirs	
		Upsize (with Wiper Arm)	Auto-Fill Shut Off*
4 liter	571182	571155	571286
8 liter	571182 (1) + 25C764 (1)	571156	571287
12 liter	571182 (1) + 25C764 (2)	571157	571288
16 liter	571182 (1) + 25C764 (3)	571158	571289

*AFSO reservoir kits do not include adapter ring. Order p/n 574002 separately when converting from a 2 L reservoir to an AFSO reservoir.

G3 Injector Pump Pre-assembled Modules

Part Number		Description
8 liter	16 liter	
17J999	17N926	G3 Injector Pump Pre-assembled Module: 24V, Max, 5 Pin CPC (alarm, manual run, low level in the CPC), 2 pump elements, union kit, vent valve, pressure switch, pressure gauge.

G3 Pump Elements

Part Number	Description
571041	Pump element – same adjustability as the pump included with G3 pumps.
571041PK	100-pack of replacement pump elements
24V837	Food and Beverage Upgrade Kit – contains pump element, stainless zerk fitting, and stainless reservoir plugs.

G3 Pump Output Union Kits

Pump element(s) sold separately.

Part Number		Description
Three (3) Pumps	Two (2) Pumps – Left and Right	
571026	571063	For systems without a direct-mount vent valve installed on the first pump outlet.
24P295	24P296	For systems with a direct-mount vent valve installed on the first pump outlet.

Each G3 includes one pump element when it ships. Add one or two more (p/n 571041) and the appropriate union kit if needed for your application.

Ordering Information

G-Series Pressure Relief Valve (PRV) Options

	Part Number		Description
	Outlet Thread		
	NPT	BSPP	
	571028	571071	Adjustable return-to-reservoir pressure relief kit – 500 to 3,500 psi (35 to 241 bar).
	556420*	–	Male run tee – 1/4 NPT, use with 571028 kit to increase pressure limit to 5,000 psi.*
	26C030*	26C176*	Pressure relief to atmosphere kit – 5,000 psi (345 bar).*
	26A910	–	Pressure relief to atmosphere kit – 4,000 psi (276 bar).
	16V999	–	Pressure relief to atmosphere valve – 1/8 in NPT male, 5,000 psi (345 bar).*
	115122	–	Pressure relief to atmosphere valve – 1/8 in NPT male, 4,000 psi (276 bar).
	571058	571070	Pressure relief-to-atmosphere kit – requires one of the following six pressure relief valves:
	563156		Pressure relief valve – 750 psi (52 bar)
	563157		Pressure relief valve – 1,000 psi (69 bar)
	563158		Pressure relief valve – 1,500 psi (103 bar)
	563159		Pressure relief valve – 2,000 psi (138 bar)
	563160		Pressure relief valve – 2,500 psi (172 bar)
	563161		Pressure relief valve – 3,000 psi (207 bar)
	25U706		**G-Series Gauge And Relief Valve Adapter Kit** – includes 5,000 psi/350 bar gauge (2007096), street cross fitting (133643) and 1/4 NPT x NPSM swivel fitting (156823). Allows connection of gauge, relief valve and outlet fitting to pump outlet. NPSM swivel fitting installs in the G-Series pump outlet for easy clocking of the complete assembly. Relief valve sold separately – choose from one of the options above.
	2008155		**G-Series Gauge and Return-to-Reservoir Adjustable Pressure Relieve Valve Kit** – includes all of the parts in kit 25U706, plus adjustable PRV with elbows and tubing to plumb back to the reservoir of a G3 or G-Mini pump.

*Not for use with G-Mini pumps.

Ordering Information

G-Series Remote Manual Run/Monitoring Lights

	Part Number		M12 Cable Included?
	12 VDC	24 VDC*	
	571030	571031	No. Use with CPC-5 or 2CPC-7 power cables.
	571032	571033	Yes. 16.5 ft (5 m). Use with pumps that have M12 input for manual run.

*24 VDC is also used with AC powered G-Series pumps.

G3 Mounting Bracket Options

	Part Number	Description
	125910	G3 pump mounting L-bracket
	571159	G3 reservoir support bracket for mobile installations – secures 12 and 16 liter reservoirs.
	132187	G-Series isolation kit (vibration damper)

G3 Protective Front Cover Kits

	Part Number	Description
	571036	Black
	571255	Clear
	24Z962	Clear with cutouts for Reset and Manual Run buttons

Grease Pressure Gauges

Stainless steel case, liquid filled (glycerin), 0-5,000 PSI (0-350 bar).

	Part Number	Thread	Mount	Suggested Use
	115523	1/4 NPT brass	Back	Vent valve gauge port
	2007096		Bottom	Tee into pump outlet with p/n 556420

G-Series Reservoir Filling Accessories

	Part Number	Description
	24M644	High capacity fill coupler with quick disconnect and dust cover
	77X542	Remote-fill manifold with vent – for use with reservoirs that have AFSO.
	121474	Female coupler – mates to 24M644 fill stud and 77X542 remote fill manifold.
	2006967	Cartridge filler pump kit – for use with grease cartridges. Kit includes manual pump 2006597 and G3 adapter fitting 2000201.
	2000201	Manual hand pump adaptor – for use with 2006597 fill pump to protect threads in pump base.
	571064	Cold temperature fill relief kit – prevents over-pressurizing when filling in cold temperatures.

Refill Pump Kits

Each kit includes 121474 coupler.

	Part Number	Description
	247886	Manual hand pump for 35 lb pail
	2002295	LD Series 35 lb fill pump kit
	2002296	LD Series 120 lb fill pump kit
	26A320	Mini Fire-Ball 400 lb fill pump kit

G3 Pump Enclosure Kits

Ideal for fracturing equipment lubrication, these kits contain a G3 pump, valve assemblies, durable enclosure and mounting assemblies.

	Part Number	Description
	132090	Triplex, 12V, G3 Pro
	132091	Triplex, 24V, G3 Pro
	132154	Triplex, 24V, G3 Standard
	132092	Quintuplex, 12V, G3 Pro
	132093	Quintuplex, 24V, G3 Pro
	132155	Quintuplex, 24V, G3 Standard
	132089	Standalone enclosure with G3/MSP mounting panel
	132188	G3/MSP mounting panel
	132163	Isolator kit

Ordering Information

Machine Count Sensors

	Part Number	Description
	17J939	G3 machine count inductive sensor – 12-24 VDC. NPN normally open, M12 male, 5 mm sensing distance.
	557781	"Microswitch" dry contact limit switch – AC/DC. Can be wired N.O. or N.C. Use with cable 124300 and cord grip 260067.

Pressure Switches

Use to read pressure in an injector-based system. After injectors dispense, controller or G3 Max will trigger pump shut down and vent.

	Part Number	Voltage and Switch Type	Pressure Setting Range	Porting	Electrical Connector	Notes
	24N181	AC/DC, Dry Contact	580 to 5,800 psi (40 to 400 bar)	1/4 NPT female	DIN connector (included)	Designed specifically for grease. Includes DIN connector – just add 124300 to connect to G3 Max.
	24K414	10-32 VDC, PNP	Set: 290 to 5,800 PSI (20 to 400 bar) Reset: 175 to 5,685 PSI (12 to 392 bar)	1/4 NPT male	M12 male	Dual pressure setting adjustments. M12 connection makes it easy to wire to a G3 Max.

For more pressure switch options and more details, see page 172.

Solid State Proximity Switches

Use with Series Progressive Divider Valves to count cycles.

	Part Number	Voltage and Switch Type	Divider Valve	Thread	Electrical Connector
	17L983	10-36 VDC, PNP	MSP and MHH	7/16-20	M12 male
	17L879		CSP	M11	

Cables for Solid State Proximity Switches

Use with a G3 Max or G3 SP when connecting directly to the pump, when LED cycle indication is required.

Part Number	Proximity Switch Connection	2nd Connection	Length	Notes
25M602	M12 female, straight	Flying leads	16.5 ft (5 m)	PNP switch with NPN LED – requires 124594
25M603		M12 male, straight		PNP switch with NPN LED

For more proximity switch and cable options, and more details, see Proximity Switches section on pages 161-162.

Ordering Information

Other Wiring Accessories for G-Series Pumps

Use with a G3 Max or G-Mini when connecting directly to the pump, when LED cycle indication is not required.

	Part Number	1st Connection	2nd Connection	Length	Notes
	126331	M12 female, straight	Flying leads	16.5 ft (5 m)	Requires 124594 when used with G3 Max or G-Mini
	124300	M12 male, straight	Flying leads	16.5 ft (5 m)	Accessory cable – add 124301 when connecting to an M12 sensor.
	124333	M12 female, straight	M12 male, straight	16.5 ft (5 m)	Accessory cable
	124301	M12 female, straight	–	–	Connector for 6-8 mm cable
	124594	M12 male, straight	–	–	Connector for 6-8 mm cable
	124640	DIN female	Flying leads	6.6 ft (2 m)	Output cable for DIN alarm relay (G3 Max)
	127123	DIN female	–	–	Field wireable DIN connector
	24P731	DIN power/ alarm cover	–	–	With gasket and screw, IP69K rated

Direct-Mount Vent Valves for G3 Pumps

G3 pump vent valve kits include adjustable pressure relief, 500-3,500 psi (35-241 bar), and mount directly to a G3 pump.

Normally-Open Vent Valves for Use with G3 Max Pumps

Voltage	Part Number		Power Cable
	NPT	BSPP	
12 VDC	2008943	2008945	Included
24 VDC	2008944	2008946	Included
AC pumps	2008944	2008946	Included

G3 Max AC pumps are 24 VDC internally, so they use 24 VDC accessories, including the vent valve and pressure sensors.

Normally-Open Vent Valves for Use with G3 Standard Pumps

Voltage	Part Number		Power Cable
	NPT	BSPP	
12 VDC	24M478	24M481	24N402
24 VDC	24M479	24M482	24N402
115 VAC	24M480	24M483	16U790*
230 VAC	24N182	24M484	16U790*

*24N351 is alternative patch cable which connects directly to DIN power connection.

Low Pressure Vent Valve for Use with G3 Pumps

Part Number	Description
2001401	Similar to 24M483 (above) but with a lower adjustment range, this vent valve is intended for use with piston distributors such as Injecto-Flo. Includes adjustable pressure relief, 200-750 psi (14-52 bar), factory set to 200 psi (14 bar). BSPP outlet thread. Normally Open solenoid, for use with G3 Standard pumps. 115 VAC with DIN connector, requires power cable 16U790 or 24N351.

Vent Valves Accessories for G3 Standard Systems

	Part Number	Description
	24N402	Vent valve power cable – normally open, 12 or 24 VDC valve, Deutsch connector, 6 feet
	16U790	Vent valve power cable – normally open, 115 or 230 VAC valve, DIN connector, 15 feet
	24N351	Save installation time and money without the need for additional cabling. Patch cable connects vent valves with DIN connection directly to the DIN Pump Power connector.

Ideal for Hydraulic Breaker/Hammer Lubrication

Extend the life of your hydraulic hammer/breaker tools and provide a breakthrough for your budget. The new G3 Hammer Pump offers convenient top fill access, enabling chisel paste to be quickly added to the reservoir to avoid halting operations. Designed for harsh, high vibration environments, the G3 Hammer Pump ideally handles high shock hammer/breaker applications with ease.

Spin-Off Reservoir Cover

Quickly fill hard to pump grease from the top of the reservoir.

Robust Cover Design

Reinforced ribs to withstand high vibration and shock applications.

Multiple Reservoir Options

Available in both 4 and 8 liter capacities.

Up to Three Pump Elements

0.25 in3/min (4 cm3/min) per element. 5,100 psi (351.6 bar).

Power and Low Level Options

CPC or DIN-style connectors make for easy, no hassle installations.

Versatile Pump Elements

Built to withstand the harshest of greases, such as chisel paste and other greases containing additives.

Typical Applications

- Hydraulic breakers/hammers
- Carrier or pedestal mounted

Technical Specifications

Reliable Drop-In Dual-Line or Twin Pump Upgrade

Designed for a seamless pump upgrade or replacement in existing dual-line lubrication systems for yellow iron equipment. Effortlessly upgrade your dual-line or twin pump system while ensuring compatibility with the machine's existing dual-line metering devices.

Versatile Reservoir Options

Choose from durable 4- or 8-liter U.V. resistant, high-impact reservoirs.

Easily Accessible Components

Streamline maintenance and troubleshooting.

Universal Mounting Bracket

Easily install into existing dual-line systems.

Proven Components

Field-proven pump elements and motors engineered to excel in the toughest applications.

User-Friendly Pump Management

Effortlessly adjust pump parameters using the built-in controller (G3 Max models) or included GLC X® controller (G3 Standard models).

Fail-Safe Reversing Valve

Minimize failures with a mechanically controlled reversing valve.

Typical Applications

- Construction equipment
- Mining equipment
- Agricultural equipment

Technical Specifications

Power source	18-30 VDC
Fluids handled	NLGI #000 to #2 greases
Operating temperature	14°F to 122°F (-10°C to 50°C)
Reservoir size	4 or 8 liters
Control option	Built-in (G3 Max models), GLC X (G3 Standard models)
Pump elements	Ships with three pump elements if not specified in description
Output pressure	3,500 psi (24.1 MPa, 241 bar)
Pump output	0.25 cu in/min (4 cc/min) per pump element
Valve outlet	(2) ¼ in NPT female
Protection grade	IP69K

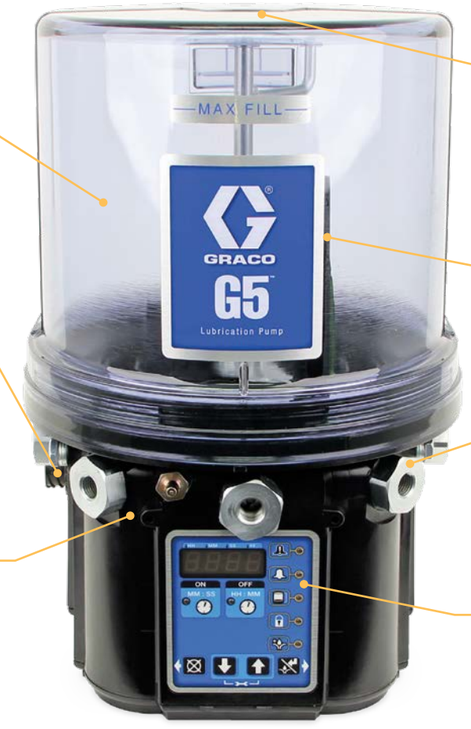
Accessories

Part Number	Description
2002702	3 Pump Element Union Kit with Pressure Relief Valve
2006225	G3 to Dual-Line Conversion Kit – Reversing Valve, Union Kit, Mounting Bracket
2004626	NPT to M10 Fitting
2002258	Reversing Valve Assembly
2004545	Reversing Valve Remote Mounting Kit
2004968	Reversing Valve Rebuild Kit

Designed for Quintuplex Packing Lube

Greater profit is within reach with Graco G5 pumps. Equipped with five pump elements for more versatile and simpler grease operations, the G5 has been designed specifically for the harsh demands of fracking operations.



Robust Reservoir

U.V. resistant, high-impact reservoirs to meet the needs of your equipment.

Flexible Power Options

Two CPC-style connectors with low level output options make for easy, hassle-free installations.

Optional Pressure Relief Valves

Install up to five pressure relief valves with the option to vent back into the reservoir.

Auto-Fill Shutoff Option

Completely fill the reservoir while avoiding costly spills with an optional AFSO.

Reservoir Wiper Arm

Stirring paddle with wiper arm to keep material from separating.

Five Pump Elements

G5 comes standard with five adjustable pump elements installed.

Two Controller Options

Use your existing machine's controller or choose the G5 Pro's built-in controller.

Typical Applications

- Quintuplex frac pumps
- Pumpjacks
- Other pump-to-point applications

Typical Fluids

- Packing lube

Technical Specifications

Maximum working pressure	4,250 psi (293 bar)
Power	24 VDC
Operating temperature	-40°F to 158°F (-40°C to 70°C), depending on lubricant used
Reservoir size	4 and 8 liter (Enclosures fit 4 liter only)
Maximum run time	30 minutes
Control options	Standard (no controller) or Pro (timer)
Adjustable pump output per element per minute*	0.155 in^3 (2.54 cm^3) [no shim] 0.104 in^3 (1.70 cm^3) [1 shim] 0.055 in^3 (0.90 cm^3) [2 shims]
Enclosure dimensions (L x W x H)	Small – 17.75 in x 14.94 in x 13.00 in (45 cm x 38 cm x 33 cm) Large – 22 in x 17 in x 18 in (56 cm x 44 cm x 46 cm)
Certifications/ratings	CE, UKCA
Instruction manual	Standard – 3A8847 / Pro – 3A8848 / Pro with Enclosure – 3A9275

*Shims not included with pump element. Please see shim kit under Accessories section.

	133910	Pressure relief valve, 4,000 psi (276 bar)
	133991	Pressure relief valve kit, 4,000 psi (276 bar) – includes five pressure relief valves
Image Coming Soon	571286	Auto-fill shutoff reservoir kit
Image Coming Soon	133457	Pump shim kit – includes five shims
	132187	G5 isolator kit
	127780	G5 pump power cord
	121474	Female coupler for reservoir fill port
	115523	Back mounted 1/4 in NPT pressure gauge, 0-5,000 PSI (0-350 bar)
	2007096	Bottom mounted 1/4 in NPT pressure gauge, 0-5,000 PSI (0-350 bar)
	125910	G5 pump mounting L-bracket
	571159	G5 reservoir support bracket for mobile installations – secures 12 and 16 liter reservoirs.
	571036	Black
	571255	Clear
	24Z962	Clear with cutouts for Reset and Manual Run buttons

Built for Severe-Duty Environments

The Lube Master is a rugged pump package designed for demanding applications. The adjustable output and anti-friction drive bearings make it both reliable and efficient. Rugged cast aluminum main body and heavy-duty internal components deliver consistent performance in harsh applications. With several reservoir choices and accessories to choose from, the Lube Master pump can be easily customized to meet virtually all application needs.

Reservoir Options

For oil or grease, 12 or 20 pint/pound, plastic or metal.

Low Level Switch Options

Available for both oil and grease reservoirs.

Continuous Duty

1/2 hp motors in 1 phase or 3 phase, choose from two different RPMs for each.

Drive and Mounting Base

Choose from two gearbox ratios to configure your flowrate range. Choose floor mount or wall mount.

Adjustable Pump Displacement

Set the pump output with the turn of a wrench.

Typical Applications

- Cement plants
- Paper processing
- Steel mills
- Other harsh environments

Typical Fluids

- Oil
- Grease up to NLGI #2

Technical Specifications

Cycle Rate	1-175 strokes per minute
Output Volume per minute	See chart below
Max Output Pressure	5,000 psi (340 bar)
Material	Plastic or metal, cylindrical
Reservoir Size	Oil – 12 pint, 20 pint / Grease – 12 lb, 20 lb
Motor	115/230 VAC, 230/460 VAC, 60 Hz
Instruction Manual	3A2781

Theoretical Calculated Discharges of Lube Master

	60:1 Gear Ratio		10:1 Gear Ratio	
	Discharge Output in^3 (cm^3)			
Motor Speed (RPM)	Minimum	Maximum	Minimum	Maximum
1,140	0.19 (3.11)	0.95 (15.57)	1.14 (18.69)	5.7 (93.42)
1,725	0.28 (4.59)	1.48 (23.44)	1.72 (28.19)	8.62 (141.28)

Popular Lube Master Assembly Models

Pressure Gauge 2007096 is included with every LMxxxx assembly.

Grease Packages

Part Number	Reservoir		Base Mounting Configuration	Drive Ratio	Motor – *All motors are 1/2 hp, 60 Hz*		Low Level Switch
	Material	Capacity			RPM	Voltage	
LM6334	Plastic	20 pound	Floor	10:1	1,725	230/460 VAC, 3-phase	SPDT, 15 amp
LM6544				60:1	1,140	115/230 VAC, 1-phase	SPDT, 15 amp
LM6611			Wall		None		None
LM7311	Metal	12 pound	Floor	10:1	None		None
LM7354					1,140	230/460 VAC, 3-phase	SPDT, 15 amp
LM7534				60:1	1,725	230/460 VAC, 3-phase	SPDT, 15 amp
LM8534		20 pound	Floor	60:1	1,725	230/460 VAC, 3-phase	SPDT, 15 amp
LM8544					1,140	115/230 VAC, 1-phase	SPDT, 15 amp

Oil Packages

Part Number	Reservoir		Base Mounting Configuration	Drive Ratio	Motor – *All motors are 1/2 hp, 60 Hz*		Low Level Switch
	Material	Capacity			RPM	Voltage	
LM2536	Plastic	20 pint	Floor	60:1	1,725	230/460 VAC, 3-phase	SPST, 10 watt
LM4333	Metal			10:1	1,725	230/460 VAC, 3-phase	SPDT, 15 amp
LM9511		Overhead Supply		60:1	None		None
LM9521					1,725	115/230 VAC, 1-phase	None

Accessories

Pressure Indicators

	Grease – Aluminum-colored disk, 2,350 PSI (162 bar)	Oil – Yellow-colored disk, 1,450 PSI (100 bar)	Description
	563184	563179	Standard blowout fitting
	563385	563384	High-pressure blowout switch kit*
	563965	563962	Package of 6 blowout disks

*Each kit requires approximately 3 ft of 1/4 in OD copper tubing, not included.

Low Level Switches – Grease

	Part Number	Description
	563322	Standard SPDT, 15 amp switch kit, mounts to top of all grease reservoirs
	564318	High/low level switch kit, for metal grease reservoirs only
	564377	Explosion-proof LL switch for grease reservoirs. (Class I, Group C and D; Class II, Group E, F and G)

Ordering Information

Low Level Switches – Oil

	12 Pint	20 Pint	Description
	563015	563016	SPST, 10 watt, most popular option
	563316	563317	SPDT, 15 amp, for use with heavy or stringy oils

Pump Repair Kits

At the heart of all current Lube Master pump packages is pump part number 563380. There are three repair kits for the pump and some of the parts overlap because each kit includes some of the same seals. To completely rebuild the pump, all three kits are required and some extra parts will remain because of this overlap.

	Part Number	Description
	563915	Driveshaft Kit. Includes the driveshaft, cam, bearings and related seals and hardware.
	563921	Seal Kit. Includes seals and small hardware.
	563916	Standard Output Manifold Kit. Includes pump piston and cylinder, output manifold block and related seals and hardware.

Reservoir Repair Kits

	Part Number	Description
	562902	Polycarbonate tube with u-cup seal for part numbers 562892 (12 pt) and 562896 (12 lb).
	562903	Polycarbonate tube with u-cup seal for part numbers 562893 (20 pt) and 562897 (20 lb).

Replacement Gear Reducers

Floor Mount and Wall Mount drives use the same gear reducers.

	Part Number	Description
	557160	10:1 Gear Reducer
	557161	60:1 Gear Reducer

Lube Master Ordering Menu Code

Use the Smart Numbering System to order a complete assembly! The six-digit Smart Numbering System can help you order quickly and accurately. Simply follow the diagram for the configuration you want and build your order. Alternatively, use the part numbers at right to order individual components and assemble them in the field.

Code	Former Code	Description	Part Number	LM	Reservoir X	Drive X	Motor X	Low Level X
Product Identifier								
LM	LUB	LM = Lube Master	563380					
Note: When ordering Lube Master bare pump 563380 for use with a grease reservoir, a fill stud is required (part number 557374). Fill stud 557374 is compatible with mating coupler 558906. Order separately.								
Reservoir Options								
1	OPA	12 pt plastic oil reservoir	562892					
2	OPB	20 pt plastic oil reservoir	562893					
4	OMB	20 pt metal oil reservoir	562895					
5	GPA	12 lb plastic grease reservoir	562896					
6	GPB	20 lb plastic grease reservoir	562897					
7	GMA	12 lb metal grease reservoir	562898					
8	GMB	20 lb metal grease reservoir	562899					
9	OHS	Power Prime/Overhead Supply	562908					
Drive Options								
1	DOO	No drive	N/A					
2	DOA	Clutch drive with ratchet arm	563383					
3	DOB	10:1 reduction, floor-mounting base	563388					
4	DOC	10:1 reduction, wall-mounting base	563386					
5	DOD	60:1 reduction, floor-mounting base	563389					
6	DOE	60:1 reduction, wall-mounting base	563387					
Note: Drive Options 3, 4, 5, and 6 each contain all required mounting hardware (mounting plate, coupler, coupler guard, nuts, bolts, and washers).								
Motor Options								
1	MOO	No motor	N/A					
2	MOA	1/2 HP, 115/230 VAC, single phase, 60 Hz, 1,725 rpm	557271					
3	MOB	1/2 HP, 230/460 VAC, 3-phase, 60 Hz, 1,725 rpm	557270					
4	MOC	1/2 HP, 115/230 VAC, single phase, 60 Hz, 1,140 rpm	557272					
5	MOD	1/2 HP, 230/460 VAC, 3-phase, 60 Hz, 1,140 rpm	557273					
Low Level Options								
1	LOO	No level switch	N/A					
2	LOA	12 pt oil, SPDT, 15 amps	563316					
3	LOB	20 pt oil, SPDT, 15 amps	563317					
4	LOC	12 and 20 lb grease, SPDT	563322					
5	LOE	12 pt oil, SPST, 10 watts	563015					
6	LOF	20 pt oil, SPST, 10 watts	563016					
N/A*	N/A	High/low level switch kit (for METAL grease reservoirs only)	564318					
N/A*	LOH	Explosion-proof LL switch for grease reservoirs. (Class I, Group C and D; Class II, Group E, F, and G)	564377					
*564318 and 564377 are sold separately and field-installed. Choose option "1" and then order either part separately.								
Pressure Gauge (included)								
N/A	G1	No gauge	N/A					
N/A	G3	Liquid-filled 0-3000 psi gauge	2007096					
Note: 2007096 is included with every LMxxxx assembly, but not with the bare pump.								
Pressure Indicators (sold separately, but required for safety)								
N/A	POA	Standard Blowout, 1,450 psi (100 bar), Oil	563179					
N/A	POB	Standard Blowout, 2,350 psi (162 bar) Grease	563184					
N/A	POC	High-Pressure Blowout Switch, 1,450 psi (100 bar), Oil	563384					
N/A	POD	High-Pressure Blowout Switch, 2,350 psi (162 bar), Grease	563385					
Note: Options POC and POD require approximately 3 feet of 1/4 in OD copper tubing, which must be obtained from a 3rd party source.								

Versatile, All-In-One Pump Package

Designed for use with virtually any type of Series Progressive or Single Line Resistive oil lubrication system.
The Miniature Meter-Flo's rugged steel reservoir and motor assembly withstands the toughest applications.
Capable of high volumetric output operating continuously at pressures up to 2,000 psi (138 bar).

Continuous Duty Motor

Ideal for circulating oil systems.

Built-in Pressure Relief

Returns excess oil to the reservoir with no mess.

Sensor Options

Factory-installed low level. Pressure switch sold separately.

Oil Level Sight Glass

Provides visual indication of oil level.

Steel Oil Tank

Rugged construction offered in three sizes.

Typical Applications

- Ideal for smaller series progressive systems requiring continuous lubrication
- Adjustable, built-in pressure relief valve makes MMF packages compatible with resistive orifice systems.

Typical Fluids

- Oil – 160 to 15,000 SUS

Technical Specifications

Output Volume per minute	1, 5, 8, 14 in^3 (16, 82, 131, 229 cm^3)
Output Pressure	300-2,000 psi (20.7-138 bar)
Material	Metal, Rectangular
Reservoir Size	1.5, 3 or 5 gal (5.7, 11.4 or 18.9 L)
Motor	115 VAC, 60 Hz, 1ph or 230 VAC, 50/60 Hz, 3 ph
Instruction Manual	L12600

Ordering Information

Miniature Meter-Flo (MMF) Models

Part Number	Reservoir Capacity gallons (liters)	Flow Rate in^3/min (cm^3/min)	Maximum PSI (Bar)

Miniature Meter-Flo (MMF) 230 VAC (3 phase) Pump with Reservoir			
26A414	1.5 (5.7)	5 (82)	2,000 (138)

*Part Number MM1113 includes dual level switch (high/low) part number 26C344.

MMF Pump and Motor Assemblies, Without Reservoirs

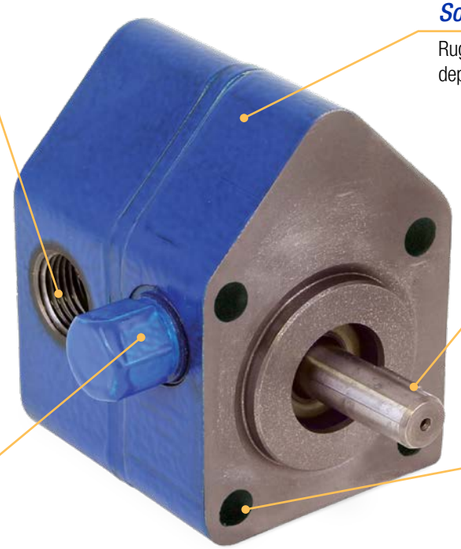
Part Number	Description
564412	1 in^3/min flow rate
564413	5 in^3/min flow rate
564414	8 in^3/min flow rate
564415	14 in^3/min flow rate

Additional MMF Spare Parts

557286	Motor, 115 VAC
557293	Gear box, 1 in^3/min (12.5:1)
557822	Gear pump only, 1 to 8 in^3/min
557821	Gear pump only, 14 in^3/min
557810	Suction strainer
563558	Pressure relief valve
557825	Low level switch
26C344	High/low level switch

Continuous Duty Durability

With its solid pump housing, these rugged gear pumps are designed for dependable operation in high demand applications. The gear pump is available with a direct-coupled 1/2 horsepower motor capable of 1,725 rpms with output volumes of 245 cubic inches per minute. Eleven different pump models to choose from.



NPT or SAE Porting

Options for 1/2 in NPT or 7/8 in SAE O-Ring Boss.

Solid Pump Housing

Rugged and durable for dependable operation.

Drive Shaft with Woodruff Key

1/2 in (12.7 mm) drive shaft mates to standard couplings.

Adjustable Pressure Relief Valve

Protects pump against overload conditions.

Standard SAE 4-bolt Mounting

Simplifies installation.

Typical Applications

- Ideal for applications requiring continuous oil delivery up to 1,000 lubrication points

Typical Fluids

- Oil – 300 to 3,000 SUS

Technical Specifications

Output Volume Per Minute	14 to 245 in^3 (230 to 4,015 cm^3)
Maximum Output Pressure	300 to 1,500 psi (20.7 to 103.5 bar)
Operating Temperature	50ºF to 150ºF (10ºC to 65.5ºC)
Instruction Manual	L12611

Ordering Information

Meter-Flo Pumps

Part Number		Rotation	Displacement

Repair Kits

	Part Number	Description
	557997	Meter-Flo seal kit
	557998	Meter-Flo relief valve repair kit

Meter-Flo Paddle Base and Pump Packages

Include motor mounting base, pump, L-bracket, coupler, coupler guard, and other small hardware needed to mount a 56F motor. Simply add any 56F motor (or 56C with feet) to complete the pump package.

Part Number	Description
563557	Paddle base with pump 557814
564411	Paddle base with pump 557813
24N405	Paddle base with pump 557815
24N406	Paddle base with pump 557816
24N407	Paddle base with pump 557817
24N408	Paddle base with pump 557818
24N409	Paddle base with pump 557820

Additional Mounting Options for Meter-Flo Pumps – pumps not included.

	Part Number	Description
	558956	Bell housing bracket and coupler kit – requires NEMA 56C motor with feet.
	561067	L-bracket – bare part for mounting Meter-Flo pump in a custom application

Right-Sized Solution

The Graco Compact Dyna-Star (CDS) automatic lubrication system delivers high-capacity flow, robust durability and innovative control in a smaller footprint to extend uptime for today's toughest earth-moving machines and users in the harshest environments.

Rugged Durability

Metal construction ensures trustworthy operation in the most extreme environments.

Integrated Auto-Fill Shut-Off

This option enables single-person, powered-down, ground-level refills, without the need to climb or worry about spills.

Smart Power Train

24 VDC, brushless motor and zero-maintenance gear drive deliver lubricants on time, even at -40º F (-40º C).

Intelligent Monitoring

Optional pressure and lubricant level sensors provide useful system information in real time.

Compact Power

Fits easily in space-limited applications; powerful enough to keep up with aggressive lubrication interval.

Typical Applications

- Aggregates
- Mining
- Construction
- Hydraulic Fracturing Units

Typical Fluids

- Oil and grease up to NLGI #2

Technical Specifications

Maximum Working Pressure	3,500 psi (241 bar)
Operating Temperature	-40º F to 149º F (-40º C to 65º C)
Reservoir Size	12 L, 20 L, or 60 lb (30 L) reservoir or 35 lb (20 L) pail option
Maximum Flow Output Rate	4.5 in³/min (74 cm³/min)
Certifications/Ratings	IP69K
Instruction Manual	3A6941

4	Auto-fill shut-off and level-reporting transducer

Compact Dyna-Star Accessories

	Part Number	Description
	26A883	GLC X to CDS 3 ft (1 m) cable
	26A884	CDS extension cable, 12-wire, 20 ft (6 m) with flying leads
	26A889	12-pin DT female CDS mating connector kit
	25R001	12 liter reservoir wall mount bracket
	25R318	Mounting bracket for GLC X, Red Alert filter, 3- and 5-section MSP assemblies or 3- and 5-bank GCI and GL-1 series injectors

Pair with the GLC® X Controller and Auto Lube™ App

The all-new Bluetooth®-enabled GLC X controller and Auto Lube app will offer easy programming and real-time data for a wide range of auto-lube systems, even competitors' pumps.

Easy-to-Read Screen

High-contrast screen features text codes, faults and other data clearly in any ambient light.

Real-Time System Reporting

Program and display a wide range of customizable functions.

Smart Device and Mobile App

With the Auto Lube app, monitor lubrication levels, configure settings, track history and share important diagnostics.

Part Number	Description
26A855	GLC X controller with 20 ft (6 m) cable
26A814	GLC X controller
26A882	GLC X wiring harness, 12-wire, 20 ft (6 m) with flying leads

Accessories

	Part Number	Description
	26A853	GLC X pump and sensor simulator
	26A882	GLC X 20 ft (6 m) cable
	26A883	GLC X to Compact Dyna-Star® 3 ft (1 m) cable
	26A888	14-pin mating connector kit

The Rugged Workhorse

The Graco Electric Dyna-Star (EDS) pumps are built on a heavy steel reservoir with common bolt pattern to easily replace older designs. The time-proven Graco Advantage Drive is combined with existing Graco barrel pump lowers to provide performance you can depend on.

Safely Move Pump

Built-in lift ring is rated to 500 lbs (226 kg).

Graco Advantage Drive™

Hardened steel gears are lubricated for life and sealed to keep contaminants out for longer-lasting performance.

Direct-Mount Electric Vent Valve

Compact design means fewer parts to break or wear out.

Low-Level Sensor

Alerts low grease status and self-clears without a follower plate.

Tube-in-Tube

Provides simple and direct venting and filling to the foot of the pump.

M23 Connector

Saves installation time.

Adjustable Motor and Amp Control

Make adjustments with the turn of a dial. LED status lights.

Mechanical Auto-Fill Shut Off

Shuts off the fill pump for clean, trouble-free refilling without electronics.

Strong 12-Gauge Steel Reservoir

Available in 60 lb (27 kg) or 90 lb (41 kg) reservoirs. Matches common bolt pattern.

Remote Fill Manifold

Enables clean and efficient ground-level filling up to 5,000 psi (344 bar).

Typical Applications

- Mining Operations
- Milling and Crushing
- Heavy-duty Construction
- Well Services
- Industrial
  (see p/n 77X524 for AC to DC Converter)

Typical Fluids

- Oil and grease up to NLGI #2

Technical Specifications

	HF Models	HP Models
Max Output Volume Per Minute	1.5 to 35 in3/min (24.6 to 574 cm3/min)	1.5 to 18 in³/min (24.6 to 295 cm³/min)
Maximum Outlet Pressure	3,500 PSI (241 bar)	5,000 PSI (344 bar)

Complete System Installation Kits

Part Number	Description
77X960	24 VDC HP pump with auto-fill shut off and low-level monitor, GLC 2200 controller, wiring harness, low-level sensor cable, power cable, pressure switch, and remote fill manifold for 60 pound reservoir.
77X990	24 VDC HP pump with auto-fill shut off and low-level monitor, GLC 2200 controller, wiring harness, low-level sensor cable, power cable, pressure switch, and remote fill manifold for 90 pound reservoir.

Ordering Information

Custom Tank Injector Kits

Part Number	Description
77X011	24 VDC HP pump and vent valve with tube-in-tube for 35 or 60 pound reservoir
77X012	24 VDC HP pump and vent valve with tube-in-tube for 90 or 120 pound reservoir
77X013	24 VDC HP pump and vent valve with tube-in-tube for 400 pound reservoir

Standard Drum Injector Kits

Part Number	Description
77X111	24 VDC HP pump, vent valve, and cover with tube-in-tube for 120 pound reservoir
77X112	24 VDC HP pump, vent valve, and cover with tube-in-tube for 400 pound reservoir

Standard Drum Kits

Part Number	Description
77X121	24 VDC HF pump and cover for 120 pound reservoir
77X122	24 VDC HF pump and cover for 400 pound reservoir

Follower Plates and Covers

	Container Size				Description
	35 Pound Bucket	60/90 Pound Graco Reservoir	120 Pound Refinery Drum	400 Pound Refinery Drum	
	77X510	77X500	77X511	77X512	Follower plate for pumps with tube-in-tube
		247700	247701	247702	Follower plate for pumps without tube-in-tube
	77X513	–	77X514	77X515	Drum cover

Accessories

	Part Number	Description
	77X521	Auto-fill Shut Off (AFSO) – diaphragm, plate, valve, coupler and pipes. Can be used to add AFSO to an EDS module that shipped without it, or as replacement part(s) for existing AFSO modules.
	77X522	Low level kit sight glass, electric low level switch and cable (requires follower plate 77X500)
	77X523	400 micron inline filter, maximum 5,000 psi (344 bar) inlet pressure (replacement filter 77X541)

Ordering Information

Accessories

	Part Number	Description
	17L366	Red alert filter with 380µm, 36 in^2 steel mesh filter (replacement filter 129031)
	24R952	Red alert filter with reservoir mounting kit (includes 17L366)
	16V678	Red alert filter mounting bracket
	77X524	110-230 VAC to 24 VDC converter box
Image Coming Soon	77X540	24 VDC electric vent valve with pressure relief
	77X542	Remote-fill manifold with vent
Image Coming Soon	77X543	HF output manifold with 4,000 psi pressure relief
	77X544	HP output manifold with 5,000 psi pressure relief
Image Coming Soon	77X545	Power cable for series progressive systems (pumps *without* a Vent Valve), M23 connector, 15 ft (4.6 m)
Image Coming Soon	77X546	Power cable for injector systems (pumps *with* a Vent Valve), M23 connector, 15 ft (4.6 m)
	115124	Pressure switch – pressure adjustment visible in window
	24N181	Pressure switch, 1/4 in NPT(F) inlet, DIN 43650 connector (1 NO/1 NC), 7,250 psi (500 bar)

Force Feed Box Lubricators

The Manzel® Modular Box Lubricator (MBL) provides true modularity that permits customizing a pump-to-point lubrication system from off-shelf components. MBL pumping packages can also be used with MHH divider valves in a series progressive system. Each moving part is lubricated at all times by the fluid in the reservoir. This and the wide range of options, high discharge pressure and rugged construction make the MBL ideally suited for a wide variety of industries and applications.

GBL 7500 Pumps

Modern design that has become the industry standard. See page 54 for pump part numbers.

Suction Pumps Installed

Use ordering menu on page 55 to specify pumps to be installed. Gravity and Pressure Feed pumps are sold separately for field installation.

Modular Drive

External drive assemblies available as replacement parts.

Heater Port

Integrated 1 in NPT port makes optional electric heater installation simple.

Heavy Steel Reservoirs and Mounting Bases

Eight reservoir capacities are available to hold up to 40 pints and 24 pumps.

Technical Specifications

Maximum Pressure	7,500 psi (517 bar)
Power	115/230 VAC, 230/460 VAC, 60 Hz
Operating Temperature	-20°F to 140°F (-29°C to 60°C)
Reservoir Size	See the following pages
Maximum Run Time	Continuous
Output per Element/Min	0.7, 1.2, or 2.7 in^3 (11.45, 19.65, or 44.25 cm^3)
Certifications/Standards	ATEX (depends on configuration)
Instruction Manual	3A2100

Typical Fluids

- Mineral oil or synthetic based lubricants
- 80 to 5,000 SUS

Typical Applications

- Compressors – petrochemical, refineries, gas transmission and more
- Edgers, planers and band saws
- Rubber mixers
- Cannery lid presses

Manzel® MBL Pump/Reservoir Combinations with Motor Mounting Bases

NOTE: All part numbers on the chart below use "OA" (Zero-A) to indicate assemblies with NO pumps. Refer to Smart Code ordering details.

End Rotary Drives

Add GBL 7500 pumps and a NEMA 56F motor, or 56C with feet, to complete the assembly – see motor options on page 55.

	Reservoir Size				
Drive Ratio	4 pint (1.9 L)/ 2 Feed	6 pint (2.8 L)/ 3 Feed	8 pint (3.8 L)/ 5 Feed	12 pint (5.7 L)/ 8 Feed	16 pint (7.6 L)/ 12 Feed

SLP = Single Line Parallel (Injectors) SPDV = Series Progressive Divider Valve

For Simple, Injector-based Automatic Lubrication Systems

As a hard-working professional focused on ensuring your production lines keep moving and your operating costs are reduced, automatic lubrication should be an essential part of your machine maintenance. Without proper lubrication your equipment can suffer from downtime and reduced life, which impacts your company's bottom line. Avoid the hassle. Meet your LubePro.™

Typical Applications

- Packaging
- Food and Beverage Processing and Packaging
- Glass Manufacturing
- Tire Production
- Thermoforming
- Injection Molding
- Paper Production
- Labelers
- Automation Machinery
- Presses
- Steel Forging and Finishing
- Bearing Manufacturing

Typical Fluids

- 40 cSt oil minimum
- NLGI #000 to NLGI #2 grease

A4000 Reciprocating Pump

Two Models Available
Oil or grease: 4,000 psi (276 bar).

Low Level Detection
Available as a factory-installed option. Easy to connect, comes with field-wireable DIN connector; NO or NC.

Simple Controlling
PLC or lube controller actuates a 3-way air valve to drive pump and vent valve to relieve pressure in the system once lube cycle is complete.

Pneumatic Power
Easily installed into existing air line.

17P751

Multiple Reservoir Types
Oil without follower plate – 5.5 liter.
Grease with follower plate – 7.5 lbs / 13 lbs.

Easy to Install
Utilize existing mounting holes for easy replacement and installation.

Fast Cycle Rate and Flow
Output of up to 50 in^3/min (819 cc/min).

Vent Valve
integrated pneumatic or electric vent valve.

Technical Specifications

Fluid Handling Capabilities	40 cSt oil - #2 grease
Maximum Working Pressure	4,000 psi (276 bar)
Pressure Ratio	40:1
Pump Output Per Minute	50 in^3 (819 cm^3)
Maximum Air Inlet Pressure	100 psi (6.89 bar)
Air Inlet Size	1/4 in NPT
Fluid Outlet Size	1/4 in NPT
Operating Temperature	14ºF to 149ºF (-10ºC to 65ºC)
Instruction Manual	3A5266

A2800 and A2900 Vertical Pumps

High-Strength, Shatter-Resistant Reservoir
Utilizes a high-quality, polycarbonate reservoir.

Self-Venting Pump
Integrated vent automatically relieves pressure on return stroke, no pressure switch or wiring required.

Simple Controlling
PLC or Lube controller actuates a 3-way air valve to drive pump, and vent on the return stroke.

24Z053

Fast Cycle Rate and Flow
Cycles and vents lubricant injectors in as little as 10 seconds. 0.56 in^3 of oil per stroke and 0.58 in^3 of grease per stroke.

Multiple Reservoir Types
Oil without follower plate – 0.6 and 2 liter.
Grease with follower plate – 1 and 4 lb.

Easy to Install
Utilize existing mounting holes for easy replacement and installation.

Low Level Detection
Reliable, Graco factory-installed low level indicator that is easy to connect using a simple DIN connection.

Pneumatic Power
Easily installed into existing air line.

24Z028

H1900, A1900 and A2600 Horizontal Pumps

Two Reservoir Types

2 liter reservoir available in grease or oil. Select from the 19:1 oil pump or the 26:1 grease pump.

High-Strength, Shatter-Resistant Reservoir

Utilizes a high-quality, polycarbonate reservoir that is securely mounted to the pump with rigid tie rods for optimal sealing.

Easy to Install

Utilize existing mounting holes for easy replacement and installation.

Fire-Ball Pump Casting

Leverages the proven quality and long life of Graco's Fire-Ball pump. Eliminates tie rods and end cap.

17C750

Low Level Detection Option

Reliable, Graco factory-installed low level indicator that is easy to connect using a simple DIN connection.

Fast Cycle Rate and Flow

Cycles and vents lubricant injectors in as little as 10 seconds. 2.2 in^3 of grease per stroke and 3.0 in^3 of oil per stroke.

Self-Venting Pump

Integrated vent automatically and reliably relieves pressure on return stroke, no pressure switch or wiring required.

No Priming Required

No need to bleed the valve to prime the pump, no priming is required.

Pneumatic Power

Easily installed into existing air line.

Technical Specifications

Air Operated Pump for Single Line Parallel Systems

Easy to design, modify and adjust for oil or grease applications. Combine with LubriSystem/Grease Jockey injectors or Injecto-Flo piston distributors for easy, low cost system design solutions. Efficient design promotes increased productivity and less downtime. Offers several reservoir choices for both oil and grease applications

Options For Oil And Grease

Grease reservoirs include follower plate and spring for up to NLGI #1 grease. Oil reservoirs are also available in 6, 12, and 20 pint.

Standard Low Level Switch Options

Uses the same switch kits as many other Trabon® pumps, with options for oil and grease.

Self-Venting Pump

Integrated vent automatically relieves pressure on return stroke, no pressure switch or wiring required.

Rugged Polycarbonate Reservoir

The “plastic” reservoir options utilize a polycarbonate tube or convert to a steel reservoir for an even tougher material.

9:1 Pump Ratio

Same reliable design as the classic Grease Jockey and A900 pumps, but with more reservoir options for added flexibility.

Trabon® Fill Stud

Uses mating coupler that is common to other Trabon pump packages.

Technical Specifications

Output per Stroke	1.5 in^3 (24.6 cm^3)
Maximum Output Pressure	360 to 1,350 psi (25 to 93 bar)
Air Inlet Pressure	40 to 150 psi (3 to 10 bar)
Ratio	9:1
Reservoir Material	Plastic (polycarbonate)
Instruction Manual	L12100

Typical Fluids

- Oil and grease up to NLGI #1

Typical Applications

- In-plant equipment and machinery

LubriSystem Pump Packages

Low Level Option		Reservoir Size	Replacement Reservoir	Low Level Switch
Included	Not Included			
Grease Packages				
563572	563571	6 lb	562907	563322
563573	–	12 lb	562896	
Oil Packages				
563577	563574	6 pt	-	563014
563578	563575	12 pt	562892	563015
–	563576	20 pt	562893	563016

For a metal reservoir, refer to Lube Master section and select from those four options, then combine with bare pump 563579.

Bare Pump

Part Number	Repair Kit	Description
563579	563762	Pump includes Trabon fill stud and hardware to receive reservoir.

Air Solenoid Valves

150 psi maximum pressure, 1/4 in NPT female inlet.

Voltage		Air Outlet	Valve Ways	Air Motor Action
24 VDC	120 VAC			
563332	563315	1/4 in NPSF male banjo	3-way	Single

True Modularity

Wide choice of standard modular components helps you meet application requirements more exactly without the added cost of a custom system. A complete Modu-Flo modular pumping package (MPP) includes a pump, a baseplate manifold, a reservoir, and a variety of optional accessories. For more details search for brochure L12000 on Graco.com.

Fill Cap and Strainer

Included with every oil reservoir.

Low Level Switch

Options available for both oil and grease reservoirs.

High-Pressure Blowout Switch

Options for most oil and grease reservoirs; sold as a kit.

Polycarbonate (Plastic) and Metal Reservoir Options

For oil or for grease, a total of 16 options are available (see page 69).

Baseplate Manifold Kit

All plumbing connects to the manifold.

Option for use with NPT or BSP fittings.

Flapper valve inside works with modular pump design to allow removal and replacement of pump without draining lubricant from the reservoir.

Modular Pump Design

With options for pneumatic or hydraulic (page 78), a total of six models are available.

Pneumatic pumps may have single or double action on their air motors, depending on which air solenoid is used to actuate the air motor.

Pneumatic Pump Technical Specifications

Output per Stroke	0.010 to 0.240 in^3 (0.164 to 3.933 cm^3)
Air Motor Action	Single or Double
Lube Piston Action	Single
Pump Ratio	30:1
Instruction Manual	332042

Typical Fluids

- Oil and grease up to NLGI #2

Typical Applications

- In-plant
- Presses
- Mixers

Ordering Information

Modu-Flo Pneumatic Pumps

Pump Part Number	Model	Pump Output Range per Stroke in^3 (cm^3)	Air Motor Action	Maximum Cycles per Minute		Input Air Pressure Range PSI (bar)		Maximum Fluid Outlet Pressure PSI (bar)	Repair Kit Part Number
				Oil	Grease	Minimum	Maximum		
563304	AL-5M	0.010 to 0.030 (0.164 to 0.492)	Single	30	10	40 (2.76)	150 (10.3)	3,000 (207)	563902
			Double*	60					
563306	AL-25M	0.030 to 0.120 (0.492 to 1.966)	Single	30					563903
			Double*	60					
563308	AL-50M	0.060 to 0.240 (0.983 to 3.933)	Single	30					563904
			Double*	60					

*Double acting air motors require a 4-way air solenoid to create the "double action." Single acting use a 3-way air solenoid and rely on spring return.

Complete your Modu-Flo pump package with a Baseplate Manifold, Reservoir and Accessories from the next page or refer to bulletin L12000. When replacing an older pump such as ALS-3A, ALJ-25C, etc., refer to the "Remote" Pump Manifold options to allow wall-mounting of the new pump instead of mounting directly to bottom of a reservoir.

	563330	NPSF (NPT)	Wall/Remote*	Yes	Yes	Tubed**	None

*Manifolds are intended for gravity feed (oil) or spring loaded follower feed (grease) only; not for use with header systems. **Includes 1/8 in NPT female spud.

C Ordering Information

Select a Reservoir

Modu-Flo reservoirs include a built-in mounting bracket, and also a Pump Mounting Pad at the bottom of the reservoir. The pump mounting pad receives the “Reservoir” mount manifolds above (as well as several other pumps). The pad also includes a port with 1/2 in NPSF female thread to receive either an NPT or NPTF male fitting and then can then be used to gravity-feed a remote pump.

Part Number	Material	Capacity*	Tube and Gasket Replacement Kit
Cylindrical Grease Reservoirs			
562911	Plastic (Poly-carbonate)	3 pound	-

3,250 (220.1)	Purple	557439	–

*Disks up to 2,350 psi have a tolerance of ± 500 psi. Disks greater than 2,350 psi have a tolerance of ± 20%.

More Spare Parts for Modu-Flo Packages

563337	Pump mounting kit, includes four mounting screws, one large O-ring and three small O-rings to connect any Modu-Flo pump to bottom of baseplate manifold. Kit is included with new pumps, sold here as a spare part.

NPT Part Number	SAE-ORB Part Number	Description
563207	563053	Outlet Check Valve
563211	563056	System Fill Check Valve
563179	563180	Standard Blowout Assembly (1,450 psi / 100 bar)
563186	n/a	Tubed Blowout Assembly (1,450 psi / 100 bar)
557864	n/a	Standard (Dry) Pressure Gauge, 0-3,000 psi/0-210 bar dual scale, center back mount.
557866	557280	Liquid-Filled Pressure Gauge, 0-3,000 psi/0-210 bar dual scale, center back mount (557280 is PSI scale only).

Designed for Reliability

The E-Series pump is a minimum cost, entry level alternative to standard pneumatic pump products. This all-in-one pump package comes complete with no assembly required and is easy to install. All pump packages include high-pressure rupture disk assembly and lube outlet check valve. The E-Series offers many reservoir options for either grease or oil. Great for any application where price is a concern and installation time is at a premium.

Standard Low Level Switch Options

Uses the same switch kits as many other Trabon® pumps.

Modu-Flo Reservoirs

Provides easy interchangeability plus compatibility to most Modu-Flo accessories.

Drain Valve

Included petcock acts as a grease drain before removing a pump, and an air bleed during initial filling.

Two Pump Options

Choose from the original fixed output pump or the adjustable output version.

Technical Specifications

Output per Stroke	0.010 to 0.030 in^3 (0.164 to 0.492 cm^3)
Max Output Pressure	2,000 psi (138 bar)
Ratio	20:1
Reservoir Material	Plastic, cylindrical or rectangular
Air Pressure	40 to 150 psi (2.8 to 10.3 bar)
Cycle Rate	10 CPM grease, 30 CPM oil
Instruction Manual	L13126

Typical Fluids

- Oil up to 30,000 SUS
- Grease up to NLGI #2

Typical Applications

- Presses and other in-plant machines

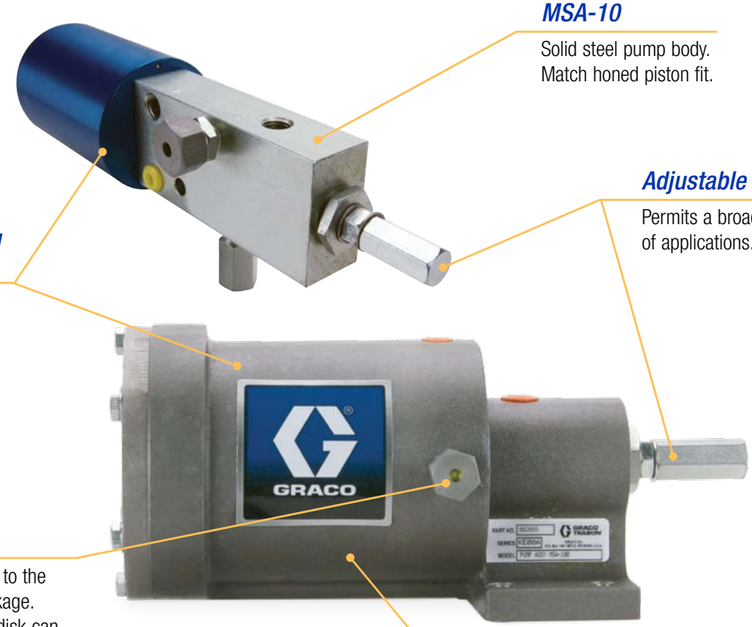
To create your own custom pump package, combine either of the pump options above with any Modu-Flo reservoir listed on page 69.

Durable In-Line Pumps

MSA Series pumps are used together with main lubrication supply lines where the pump is fed directly from a bulk header system. MSA pumps can also be piped to Modu-Flo reservoirs. Use the MSA-10 for standard applications and the MSA-100 when larger outputs are required.



MSA-10

Solid steel pump body.
Match honed piston fit.

Adjustable Output

Permits a broad range of applications.

Single- Or Double-Acting Air Cylinder

Provides wide choice of controls.

High-Pressure Relief Protection

Reduces chance of damage to the lube system in case of blockage. Included Yellow (1,450 psi) disk can be replaced with higher pressure disk for use in grease applications.

MSA-100

Cast aluminum body provides a rugged design without extra weight. Match honed piston fit.

Technical Specifications

	MSA-10	MSA-100
Material	Steel	Aluminum
Output per Stroke	0.04 to .120 in^3 (0.66 to 1.97 cm^3)	0.4 to 0.8 in^3 (6.57 to 13.11 cm^3)
Maximum Pump Strokes per Minute	Single-Acting – 15 Double-Acting – 60	Single-Acting – 15 Double-Acting – 30
Maximum Output Pressure	3,000 psi (207 bar)	
Air Pressure	40 to 150 psi (2.8 to 10.3 bar)	60 to 140 psi (4.1 to 9.7 bar)
Maximum Lube Inlet Pressure	500 psi (34 bar)	
Pump Ratio	25:1	
Instruction Manual	L12850	L12851

Typical Fluids

- Oil and grease up to NLGI #2

Typical Applications

- Presses and other in-plant machines and processing equipment

Simply Legendary

Dyna-Star pump modules offer positive displacement lubrication for multiple lubrication points. At the heart of this system is the Graco Fire-Ball® pump, the most durable pump in the industry. The entire system consists of a pump module, injectors and system controls. The pump module provides the system inherent pressurization and venting cycles to actuate and reset the injectors.

Reciprocating Air Motor

Continuously pumps grease as long as air is supplied to it, until it stalls against system pressure.

Fire-Ball 300 50:1 Grease Pump

Provides the lubricant pressure needed to activate the automatic lubrication system.

Vent Valve

Opens a return path to the reservoir between lubrication cycles, allowing the injectors to reset. Includes 4,000 psi (276 bar) relief valve.

Strong 12-Gauge Steel Reservoir

Available in 60 lb (27 kg) or 90 lb (41 kg) reservoirs. Matches common bolt pattern.

Technical Specifications

Maximum Output Flow Rate	54 in^3/min (885 cm^3) at 60 PSI (4.1 bar) air
Maximum Recommended Pump Speed	76 cycles/min at 0.22 gpm (0.82 liter/min)
Ratio	60:1 theoretical, 50:1 common
Air pressure Operating Range	50 to 60 PSI (3.4 to 4.1 bar)
Air Inlet	3/8 in NPT on pump, 1/4 in NPT on module
Maximum Fluid Output Pressure	8,400 psi (580 bar) bare pump, 3,500 psi (241 bar) with vent valve
Fluid Output Thread	1/4 in NPT on pump, 1/2 in NPSM female on module
Instruction Manual	308955 / 308883

Typical Fluids

- Oil and grease up to NLGI #2

Typical Applications

- Energy, Infrastructure and Heavy Equipment
- In-Plant Manufacturing

563307	HLJ-25M		0.030 to 0.120 (0.492 to 1.966)	50					563906
563345	HLJ-5X	2.2:1	0.030 to 0.092 (0.492 to 1.508)	50			3,000 (207)		563925

Complete your Modu-Flo pump package with a Baseplate Manifold, Reservoir, and Accessories from the Pneumatic Modu-Flo Pump Section on page 67, or refer to bulletin L12000. When replacing an older pump such as HLJ-5A, HLJ-25A, etc., refer to the "Remote" Pump Manifold options to allow wall-mounting of the new pump, instead of mounting directly to bottom of a reservoir.

Field Proven, Energy Efficient

Hydraulic Dyna-Star pumps provide reliable, quiet, ice-free performance at maximum pressure and low flow rates and are up to three times more energy efficient than comparable compressed-air systems.

High-Efficiency Motor Design

Uses less hydraulic oil.

Quiet Hydraulic Motor

No need for add-on mufflers.

10:1 Ratio For Lower Hydraulic Pressure

Full pressure performance by safely tapping low pressure hydraulics.

Self-Lubricating Vertical Design

For long life and reliable operation in high vibration environments.

Multiple Pump And Accessory Options

For use with refinery drum and custom tank installations.

Technical Specifications

Maximum Hydraulic Fluid Input Volume	3 gpm (11 lpm)
Maximum Output Flow Rate	36 in^3 (0.59 l)/min
Maximum Cycles per Minute	60
Hydraulic Supply Inlet	3/4 in -16 JIC-8 (37° flare) male
Hydraulic Return Outlet	3/4 in NPT
Incoming Hydraulic Fluid Maximum Temperature	200ºF (93ºC)
Maximum Fluid Output Pressure	7,500 psi (517 bar)*
Maximum Hydraulic Input Pressure	600 psi (41 bar)
Fluid Outlet Thread	1/2 in NPT female
Instruction Manual	312350

*When used in an injector system, the vent valve limits maximum to 3,500 psi (241 bar).

Typical Fluids

- Oil and grease up to NLGI #2

Typical Applications

- Energy, Infrastructure and Heavy Equipment
- In-Plant Manufacturing

Ordering Information

Hydraulic Dyna-Star Pumps

Part Number	Description	Container Size	Overall Pump Length	Pump Lower Length
2008088	Dyna-Star 10:1, 60 lb (27 kg) pump*	60 lb (27 kg)*	33.9 in (861 mm)	19.15 in (501 mm)
247443	Dyna-Star 10:1, 90/120 lb (41/55 kg) pump*	90/120 lb (41/55 kg)*	41.5 in (1,054 mm)	26.75 in (679 mm)
247450	Dyna-Star 10:1, 400 lb (180 kg) pump	400 lb (180 kg)	48.5 in (1,232 mm)	33.75 in (857 mm)

*Used in Graco 60 or 90 lb (27 or 41 kg) reservoirs.

Hydraulic Pump Injector System Modules

Modules ship fully assembled, complete with vent valve and hydraulic fluid controls. See below for follower plate options (AFSO is not compatible with follower plate).

Part Number		Pump Ratio	Low Level 17L372 (M12)	Auto-Fill Shut Off (AFSO)	Instruction Manual
Reservoir Size					
60 lb (27 kg)	90 lb (41 kg)				
–	243159*	5:1*			309098
247574	247444	10:1			312349
24Y408	24Y407			•	3A3429
25C948	25C949		•	•	

*5:1 pump is normally used to replace existing pumps with the same or similar ratio. For new applications use 10:1 pumps.

Hydraulic Pump Packages

Packages are kits with popular components included in one part number. Some assembly required.

	115124	Pressure switch – pressure adjustment visible in window
	24N181	Pressure switch, 1/4 in NPT(F) inlet, DIN connector (1 NO/1 NC), 7,250 psi (500 bar)
	247902	Manual pressure relief (dump valve) kit for 247706 and 247707

*Cover-mount low level switches require follower plate (sold separately). Not Compatible with AFSO option.

10,000 psi (689 bar) Hydraulic Lubrication Pump for 120 lb (55 kg) Kegs

High Pressure Pump and Reciprocator used for dispensing grease in wireline applications for oil well services.

Dyna-Star® Hydraulic Reciprocator

Time proven, Graco quality.

Self-Lubricating Vertical Design

For long life and reliable operation in high-vibration environments.

Outlet Port

13/16-16 UNC thread in pump body, ships with 1/2 NPT adapter included.

Pump Shovel

Helps feed grease into the pump.

Pump Lower

Specially designed for the high pressure required for wireline lubrication.

Technical Specifications

Maximum Hydraulic Fluid Input Volume	3 gpm (11 lpm)
Maximum Output Flow Rate	1.1 lb/min (0.5 kg/min)
Maximum Cycles per Minute	60
Hydraulic Supply Inlet	3/4 in -16 JIC-8 (37° flare) male
Hydraulic Return Outlet	3/4 in NPT
Incoming Hydraulic Fluid Maximum Temperature	200ºF (93ºC)
Container Size	120 lb (55 kg)
Overall Pump Length	41.5 in (1054 mm)
Pump Lower Length	26.75 in (679 mm)
Maximum Fluid Output Pressure	10,000 PSI (689 Bar)
Maximum Hydraulic Input Pressure	900 PSI (62 Bar)
Fluid Outlet Thread	13/16 in -16 UNC female
Instruction Manual	3A3005

Typical Fluids

- Oil and grease up to NLGI #2

Typical Applications

- Wireline lubrication
- Wellhead gate valve and plug valve greasing

High-Pressure Hydraulic Dyna-Star® Pump

Part Number	Description
25A189	Dyna-Star 10:1, 120 lb (55 kg) pump

Pump Family	Typical Applications	Fluid Type	Maximum Output Pressure psi (bar)	Maximum Output Volume per Stroke in^3 (cm^3)	Reservoir Capacity Options		Metering	Reference Page
					US	Metric - Liters		
Lube Master® 	• In-Plant Manufacturing	Oil/grease up to NLGI #2	5,000 (345)	Direct Drive – 8.6 (143) Clutch Drive – 1.25 (20) per minute	Oil – 12 or 20 pint Grease* – 6 or 12 lb	Oil – 5.5 or 9 Grease – 3 or 6	SPDV	84-86
Manzel® MBL® 	• Energy, Infrastructure and Heavy Equipment	Oil – 80 to 5,000 SUS	7,500 (517)	2.7 (44) per element, per minute, adjustable Up to 24 pump elements	4, 6 ,8, 12, 16, 24, 32 or 40 pint	1.9, 2.8, 3.8, 5.7, 7.6, 11, 15 or 19	SPDV or PtP	87-90

*See page 79 for note on grease reservoir volumes and the metric weight conversions.

SPDV = Series Progressive Divider Valve PtP = Pump to Point

Rugged and Reliable

Lubricates only while the machine is running! The Lube Master Clutch Drive is a rugged, reliable pump powered mechanically by the machine using the lubrication. This pump is ideal for applications where lubrication cycles vary and are unpredictable.

Low Level Switch Options

Available for both oil and grease reservoirs.

Reservoir Options

For oil or grease, 12 or 20 pint/pound, plastic or metal.

Direct or Clutch Drive

Direct Drive provides shaft to receive a pulley or sprocket;
Clutch Drive functions like a ratchet arm to be driven linearly.

Adjustable Pump Displacement

Set the pump output with the turn of a wrench.

Technical Specifications

Output Per Pump Stroke	0.010 to 0.050 in^3 (0.164 to 0.819 cm^3)
Maximum Output Pressure	5,000 psi (340 bar)
Maximum Torque at Rated Maximum Pressure	27 ft lbs (36.6 N-m)
Reservoir Size	Oil – 12 pint or 20 pint / Grease – 12 lb or 20 lb
Reservoir Material	Plastic (polycarbonate) or metal, cylindrical
Instruction Manual	3A2781

Typical Fluids

- Oil and Grease up to NLGI #2

Typical Applications

- In-plant – presses, Banbury mixers, rubber mills, upsetters, heading machines, crane trolleys, chains, conveyors

Direct Drive

Pump Output Ranges	RPM at Drive shaft	Pump Strokes per Minute	Output per Minute in^3 (cm^3)	
			Minimum	Maximum

	563316	563317	SPDT, 15 amp, for use with heavy or stringy oils

Spare Parts

	Part Number	Description
	563383	Replacement clutch drive with ratchet arm

See pages 38-41 for accessories, repair kits and other spare parts.

Force Feed Box Lubricators

The Manzel® Modular Box Lubricator (MBL) provides true modularity that permits customizing a pump-to-point lubrication systems from off-shelf components. MBL pumping packages can also be used with MHH divider valves in a series progressive system. Each moving part is lubricated at all times by the fluid in the reservoir. This and the wide range of options, high discharge pressure and rugged construction make the MBL ideally suited for a wide variety of industries and applications.

GBL 7500 Pumps

Modern design that has become the industry standard. See page 55 for pump part numbers.

Suction Pumps Installed

Use ordering menu on page 55 to specify pumps to be installed. Gravity and pressure feed pumps are sold separately for field installation.

Modular Drive

External drive assemblies available as replacement parts.

Heater Port

Integrated 1 in NPT port makes optional electric heater installation simple.

Heavy Steel Reservoirs

Eight reservoir capacities are available to hold up to 40 pints and 24 pumps.

Technical Specifications

Maximum Pressure	7,500 psi (517 bar)
Operating Temperature	-20ºF to 140ºF (-29ºC to 60ºC)
Reservoir Size	See the following pages
Maximum Run Time	Continuous
Output per Element/Min	0.7, 1.2 or 2.7 in^3 (11.45, 19.65 or 44.25 cm^3)
Certifications/Standards	ATEX (depending on configuration)
Instruction Manual	3A2100

Typical Fluids

- Mineral oil base or synthetics
- 80 to 5,000 SUS

Typical Applications

- Compressors – petrochemical, refineries, gas transmission and more
- Edgers, planers and band saws
- Rubber mixers
- Cannery lid presses

Ordering Information

Direct Drives

1:1 ratio means the camshaft turns at the same speed as the drive shaft. Maximum input speed 50 RPM.

	Reservoir Size

Accessories

Part Number	Description
563005	Ratchet arm required for drives “B” and “F”
559037	Gravity Supply Auto-Fill Valve, for use with overhead day tank (refer to Modu-Flo oil tanks for options)
564015	Basic Low Level Switch – Single-pole, single-throw. 10 watts @ 120 VAC.
563013	Explosion Proof Low Level Switch – Single-pole, double-throw. Class 1 Group C and D requirements. Class 2 Group E, F and G requirements.
25T989	Cam replacement kit – includes cam, key, and set screw for one pump station. *For replacement cam shafts, see tables above.*

See page 185 for a complete MBL ordering menu and more accessories.

Long Life and Durability

Leak-proof welded steel reservoir and solid steel, hardened cams. Double-supported cam shafts and gear drives to eliminate cantilevered assemblies and high load capacity needle bearings and ball bearings.

MB118 Box Lubricators

- "Model 55" 118:1 reduction drive
- 4 or 6 pump stations max, use with any GBL 7500 pumps
- Maximum input speed 1,800 rpm
- Instruction manual number 3A3006

MB60 Box Lubricators

- Rear 60:1 reduction drive
- Perfect for bolt-on gas compressor box lubrication solutions
- 2 or 4 pump stations max, use with gravity-fed or pressure-fed GBL 7500 pumps
- Maximum input speed 1,800 rpm
- Instruction manual numbers 3A2953, 334210

*See page 69 for note on legacy Trabon grease reservoir volumes and metric conversions.

SLP = Single Line Parallel (Injectors) SPDV = Series Progressive Divider Valve

Versatile and Tough

Built with aluminum and steel components to meet the high standards of performance and quality you expect from Graco products. Available with a choice of standard clear plastic or metal Modu-Flo reservoirs for either oil or grease. Modular pump/reservoir design plus built-in features enable the PH Manual Pump to be customized for a wide range of applications.

Pump 563393 shown with 5 lb grease reservoir 562888.

Single-Acting Positive Displacement Pump Design

Minimizes the number of moving and wearing parts for extended pump life and reduced maintenance.

Built-In Outlet Check Valve

Prevents back pressure from damaging pump and minimizes chance for contaminants to get into the pump or the lube supply.

Pressure Relief Valve

Protects system components from over-pressure.

Built-In Volume Indicator

Provides easy verification that lubricant is being delivered to the system and that divider valves are completing lube cycles.

Technical Specifications

Pump Output	0.15 in^3 (2.46 cm^3) per full stroke
Maximum Operating Pressure	3,000 psi (207 bar)
High Pressure Protection Relief Valve	Set @ 2,500 psi (172 bar)
Force to Operate Handle	29 lb (13.14 kg) per 1,000 psi (69 bar) @ rated pressure
Instruction Manual	L12415

Typical Fluids

- Oil and Grease up to NLGI #2

Typical Applications

- In-plant
- Mobile Equipment with an installed EZ-Greaser centralized lubrication system.

Ordering Information

PH Pump

	Part Number	Description
	563393	PH Pump (without reservoir). Pressure gauge 557864 included.

Replacement Parts

	Part Number	Description
	557864	3,000 PSI / 210 bar dual scale pressure gauge
	563160	Pressure relief valve, 2,500 psi (172 bar)
	558906	Mating coupler for grease fill stud
	563924	PH Pump Repair Kit

Reservoir Options

To create your own custom pump package, combine pump 563393 with any of the Modu-Flo reservoirs on page 69.

LubriSystem

Rugged Versatility

The LubriSystem hand pump package offers versatility for use in any application, large or small. Great for operation with Injectors or Piston Distributors, with oil or grease. Sturdy construction of aluminum and steel to provide years of service. Compact design can be used in areas where space is limited. Rugged bracket allows the pump package to be mounted in place in any application.

Pump 563580 shown with 12 lb grease reservoir 562884 and pressure gauge 557864

Modular Design

Combine the bare pump with any Modu-Flo reservoir from page 69 to build a custom package.

Polycarbonate Reservoir

High-strength, shatter-resistant material.

Built-in Vent Valve

Pull handle from half-stroke to full-stroke repeatedly to build pressure, then return the handle to vertical position to vent the pressure.

Pressure Gauge

Provides visual assurance to the operator that pressure is building to “fire” the injectors.

Technical Specifications

Pump Output	0.125 in^3 (2 cm^3) per full stroke
Output Pressure	3,000 psi (207 bar)
Force to Operate Handle	20 lb (9 kg) per 1,000 psi (69 bar)
Instruction Manual	L12100

Typical Fluids

- Oil and Grease up to NLGI #1

Typical Applications

- General machinery lubrication where power is limited or not available

*Note: The 22 rpm motor needs 3 seconds to stroke the G3 or EGJ piston pump once. **These features are available via a Bluetooth connection to the Graco Auto Lube app on your smartphone or tablet.

Drive More Productivity

The powerful, easy-to-use Graco GLC X automatic lubrication controller captures more information so operators, technicians and managers can make faster, smarter decisions. Paired with the intuitive Auto Lube app, users can monitor system performance and make adjustments with incredible speed, precision and freedom from their personal mobile device.

Indoor/Outdoor Mountable (IP69K)

Designed to withstand all the elements, including high-pressure washes and inclement weather encountered at the harshest and dirtiest sites.

Easy-to-Read Screen

High-contrast screen features text codes, faults and other data clearly in any ambient light without distracting operators.

Real-Time System Reporting

Program and display a wide range of customizable functions – including lubrication intervals, pressure limits, lubricant levels and more.

Smart Device and Mobile App

With the Auto Lube™ app, monitor lubrication levels, configure settings, track history and share important diagnostics.

Universal Compatibility

One controller for all your lubrication systems simplifies training and inventory.

Quick Technical Information Access

Easily scan this QR code for access to instruction manuals, guides, video tutorials and more.

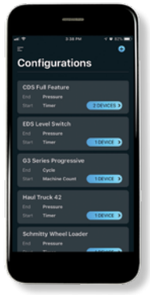
26A814	GLC X controller

Accessories

	Part Number	Description
	26A853	GLC X pump and sensor simulator
	26A882	GLC X wiring harness, 20 ft (6 m) with flying leads
	26A883	GLC X to Compact Dyna-Star®, 3 ft (1 m) cable
	26A888	14-pin mating connector kit
	17G007	Yellow iron mounting bracket with slide adjustment

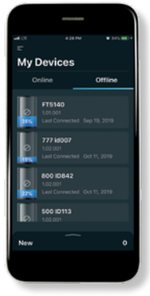
Productivity Leads to Profitability

Help your crews work faster and minimize downtime by simplifying their everyday lubrication tasks. Designed for today's modern personal mobile device user, the **Graco Auto Lube App** is intuitive and easy to learn for users in the field. They can view historical performance charts, access support and share information with a tap or swipe.



Control Lubrication Profile Configurations

- Customize profiles for equipment and end users
- Quickly and easily assign a Lube Profile Configuration with a GLCX Controller



Manage Devices

- Connect via Bluetooth to get instant status
- Review last-known state on any historical device

Communicate in Real Time

- See, control, check and clear alarms
- Complete a manual run
- Review and share system history

Workers simply need to be within Bluetooth range to perform maintenance tasks faster and easier – directly from their mobile devices.

Download the **Graco Auto Lube** app from Google Play or the App Store (iOS) and perform all controller functions from the convenience of a smartphone or tablet.

Easily Manage Your Auto Lube System

Loaded with features and simple to operate. A must-have controller for ensuring critical machine lubrication.

Lubrication Indicator

Confirms lubrication cycle status

Pressure/Cycle Input

Indicates input from system sensors

System Power LED

On/off status at a glance

Alarm

System fault alerts

Multi-functional Buttons

For easy programming and system operation

Backlit and Heated LCD Display

Adjustable brightness and contrast for sunny or dark conditions, plus the heated display allows for use in cold weather

Simple Navigation

Arrow buttons for easy navigation of intuitive menus

Typical Applications

- Heavy construction
- Mining
- Off-road mobile
- In-plant machinery
- Food and beverage equipment
- Wind energy

Compact and Versatile for Demanding On-Vehicle Auto Lube

You spend a lot on your equipment. The GLC 2200 controller helps protect components by alerting you to lube events, lube failures and low lubrication levels. You have peace of mind knowing your investment is being protected.

External Mounting Tabs

Easy to mount without having to open up the control box.

LED Indicators

LED lights let you know what your system is doing at a glance.

Digital Readout

Easy-to-read digital display makes it simple to program and monitor your equipment.

Visual and Audible Alarms

In-cab visual and audible alarms let the operator know your equipment needs attention. Or set up a remote alarm to alert service or maintenance staff.

Intuitive, Protected Control

Simple icon-based push buttons make programming easy. PIN code lockout protects settings.

Plug and Play

Color-coded wiring harness with flying leads and easy-to-follow wiring diagrams makes installations efficient.

Typical Applications

- Heavy construction
- Mining
- On-road mobile
- Off-road mobile

Technical Specifications

Dimensions	5.53 in H x 2.75 in W x 1.38 in D (140 mm H x 70 mm W x 35 mm D)

Flexible and Dependable

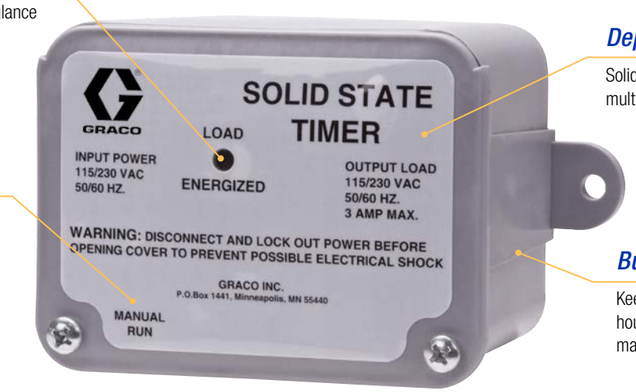
The Solid-State Timer from Graco is a compact on/off timer solution for AC power with easy to adjust dials. Features an internal terminal strip for simple wiring.

System Power LED

On/off status at a glance

Manual Run Button

Use to check system integrity as well as to simplify system filling and air purging



Dependable Performance

Solid-state technology combined with multiple-level protection

Built-In Memory

Keeps the timer “alive” for 1-1/2 hours during power failures and machine shutdown

Typical Applications

- In-plant machinery

Technical Specifications

Electrical	115/230 VAC; 50/60 hz; 3 ampere (max.)

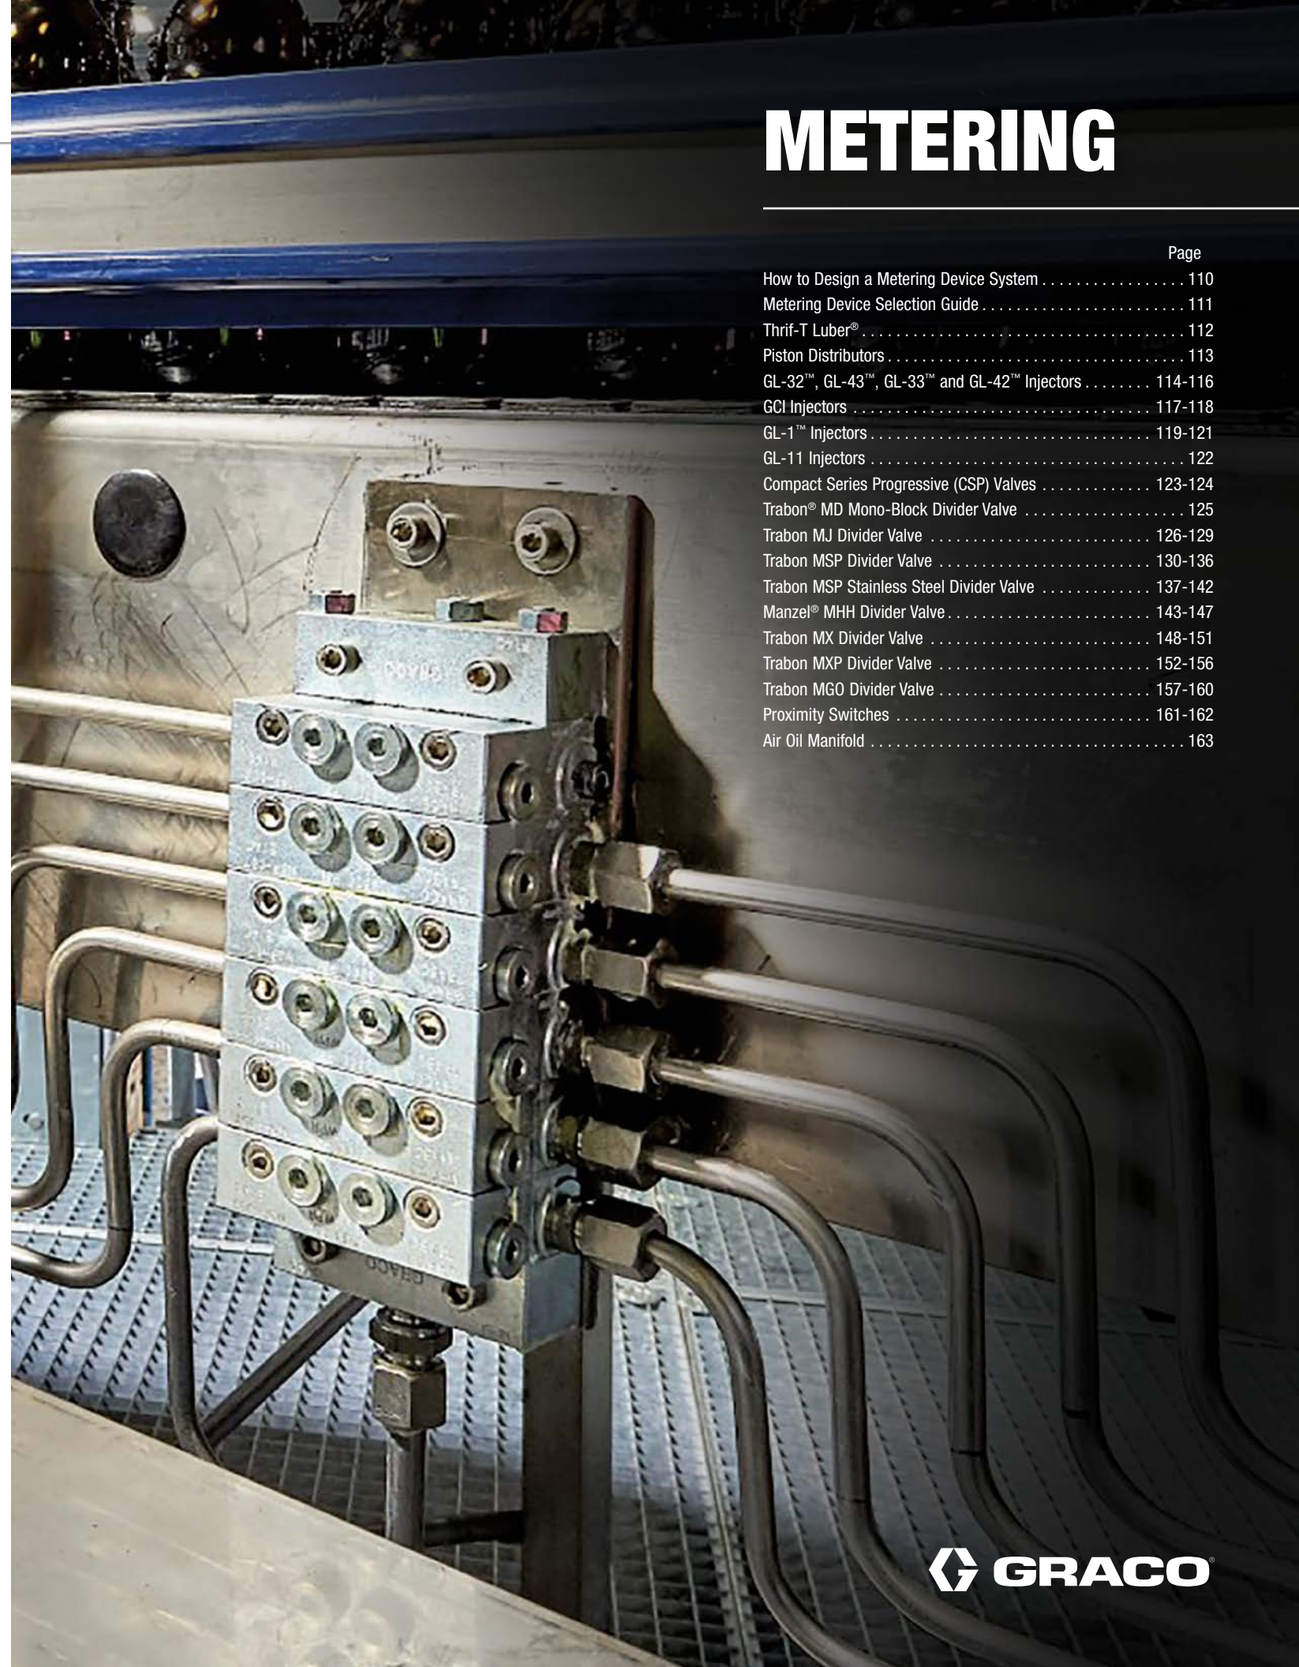
Notes



METERING

How to Design a Metering Device System

At the heart of every automatic lubrication system is a **Metering Device**.

People often ask why they can't just put a tee in the line to serve two points. The fluid in such a system would take the path of least resistance, leading it to only one of the points. Metering devices are used to prevent fluid from taking the path of least resistance.

As the "heart" of automatic lubrication, the system design process starts with metering. Once the metering system is designed, then an appropriate pump, and usually a controller can be selected to meet the needs of the system that has been designed. Many accessories are also specific to a certain metering device, so accessory selection also depends on the metering device(s) selected for the system.

Ultimately, the choice of which metering device to use for each application is often based on customer preference, but there are differences in functionality and sensor feedback which can influence the decision.

To learn more about system design, including calculating bearing requirements, determining lubrication ratios and component selection, contact your local Account Manager for Graco Lubrication Equipment.

If you are a Graco distributor, you can also ask about upcoming training classes. Attending one of our free classes in person also gives you the opportunity to tour our impressive factory in Anoka, Minnesota!

METERING

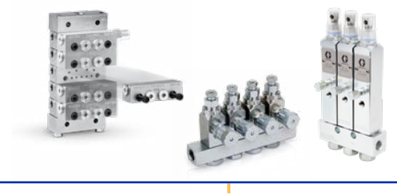
1

Select the Metering Device

Determined by your fluid type and usage requirements.

Metering Device Types

- ☐ **SLR – Single Line Resistive Orifice** – Not a true "metering" device; uses a helical path to create resistance on the oil flow.
- ☐ **SLP – Single Line Parallel** – Requires a pump with a Vent Valve to allow reset between cycles
- ☐ **SPDV – Series Progressive Divider Valve** – "Trabon" system that uses shifting pistons to measure and route the lubricant pumped through it. Offers the most monitoring options of any metering system.



PUMP

2

Select the Pump

Determined by your metering choice, fluid type and power source.

Pump Power Types

- ☐ AC
- ☐ DC
- ☐ Pneumatic
- ☐ Hydraulic
- ☐ Manual
- ☐ Mechanical

CONTROLLER

3

Select the Controller (if needed)

Determined by your usage needs and whether your selected pump offers an integrated controller.

ACCESSORIES

4

Add Accessories

Complete your metering system with high-quality Graco accessories including proximity and pressure switches, hoses, valves and fittings.

Name	Type	Typical Applications	Fluid Type	Maximum Pressure psi (bar)	Max. Temperature degrees F (C)	Reference Page
Thrif-T Luber	SLR	Ideal for small to medium-sized lathes or grinders	Oil – 100 SUS to 10,000 SUS	150 (10)	180 (82)	112

GL-1 XL			Grease up to NLGI #2			117-119
GL-11			Grease up to NLGI #2	3,500 (241)		120
CSP	SPDV	Industrial or mobile applications where space is at a premium	Oil and grease up to NLGI #2	5,076 (350)	212 (100)	121-122
MD			Oil and grease up to NLGI #2	3,000 (207)	212 (100)	123
MJ		Industrial applications where space is at a premium, and diverse output ratios are needed	Oil and grease up to NLGI #1	2,000 (138)	200 (93)	124-127
MSP		Mobile, industrial, food and beverage, wind and many more	Oil and grease up to NLGI #2	3,500 (241)	350 (176)	128-134
MSP SST		Food and beverage, off-shore rigs, marine lift cranes, locks and dams, pulp and paper production, chemical processing, oil and gas applications, and other harsh environments such as salty air or areas needing repetitive cleaning	Oil and grease up to NLGI #2	3,500 (241)	140 (60)	135-140
MHH		Compressors, industrial equipment, and where high-pressure lubrication is required	Synthetic or Mineral Oil	7,500 (517)	350 (176)	141-145
MX		Pulp and paper, steel mills, heavy- and high-volume industrial applications	Oil and grease up to NLGI #2	3,000 (207)	200 (93)	146-149
MXP			Oil and grease up to NLGI #2	3,000 (207)	350 (176)	150-154
MGO			Oil and grease up to NLGI #2	6,000 (414)	350 (176)	155-158
Air/Oil Manifold	SPDV	Steel mills, pulp and paper processing, high temperature and dirty environments		250 (17)	200 (93)	161

Metering Types Explained

SLR	Single Line Resistive Orifice – Not a true "metering" device; uses a helical path to create resistance on the oil flow.
SLP	Single Line Parallel – Requires a pump with a Vent Valve to allow reset between cycles
SPDV	Series Progressive Divider Valve – "Trabon" system that uses shifting pistons to measure and route the lubricant pumped through it. Offers the most monitoring options of any metering system.

Simple Solutions for Tight Spaces and Budgets

Thrif-T Luber orifice systems offer an efficient method of applying lubricant, resulting in less machine downtime, increased productivity and a safer work environment. Available in three types and ten flow ranges to meet lube requirements.

Compression Nut With Captured Ferrule Included

For fast, easy connection to 5/32 in (4 mm) OD tubing.

Quality Sintered Bronze Filters

Won't shred or clog like felt.

Typical Applications

- Simple time and flow metering system; ideal for small to medium-sized lathes or grinders

Typical Fluids

- Oil – 100 SUS to 10,000 SUS

Technical Specifications

Cracking Pressure	2 psi (0.1 bar)
Maximum Pressure	150 psi (10 bar)
Filter Rating	40 micron
Orifice Type A	Direct to bearing
Orifice Type B	Manifold
Orifice Type A	Direct to bearing or tee

Ordering Information

1/8 in NPT Male Bearing Fitting

Compression fitting for 5/32 in (4 mm) OD tubing. All three parts are required to make one complete fitting. May also be used inline to mate with standard 1/8 in NPT "female" fittings such as anchor blocks, tees, etc.

Image Coming Soon	558220	TLBF-00	Fitting Body with 1/8 in NPT male thread
	558189	TLCN-00	Compression Nut
	558188	TLCF-00	Compression Ferrule

Tube Clips

Zinc plated carbon steel clips for 5/32 in (4 mm) OD tubing.

Image Coming Soon	558156	TLTC-01	1-Tube
	558159	TLTC-04	4-Tubes

Other Accessories

Image Coming Soon	558190	TLIF-00	5/16 in-24 Inverted Compression Nut, used to attach tubing to manifold. Also requires ferrule 558188

Thrif-T Luber Resistive Orifices

Part Number	Reference/Description
Type A	Direct Bearing Mount
564019	TLOA-0
564020	TLOA-1
564021	TLOA-2
564022	TLOA-3
564024	TLOA-5
564025	TLOA-2/0
Type C	1/8 in NPTF mbe
564034	TLOC-5

Compact Metering System with a Wide Range of Outputs

Ideal for medium-sized cutting machine tools.

Piston Distributor Style Single Line Meters

Known worldwide for fast, simple installation.

Metering Nipples

Can be changed to fine-tune your dispense volumes.

Typical Applications

- Compact metering system with a wide range of outputs; ideal for medium-sized cutting machine tools

Typical Fluids

- Oil – 32 to 2,000 cSt

Technical Specifications

Accurate, Reliable Lubrication for Every Lube Point on Your Machine

With its one piece design, Graco's GL grease injector systems are easy to design, fast to set up and allow you to add or subtract lube points without having to redesign your lubrication system. Easily handles up to NLGI #2 grease.

Adjustable Lubrication For Each Lube Point

Systems are easy to design, fast to set up and allow you to add or subtract lube points without having to redesign your lubrication system.

Large Selection of Outlet Types and Manifold Quantities

Convenient options for any application.

Versatile High Performance

Versions for oil or grease grades to NLGI #2.

High Temperature Applications – Up To 350ºF (176ºC)

All injectors come standard with fluoroelastomer seals.

Typical Applications

- In-plant machinery, mobile equipment and anywhere adjustable lubrication output is desired

Typical Fluids

- Oil (10 weight minimum) and grease up to NLGI #2

Technical Specifications

	GL-32 Grease Injectors	GL-43 Oil Injectors
Maximum Operating Pressure	3,500 psi (241 bar)	1,000 psi (69 bar)
Minimum Operating Pressure	1,200 psi (83 bar)	750 psi (52 bar)
Typical Operating Pressure	1,500 psi (103 bar)	850 psi (59 bar)
Reset Pressure	200 psi (13.7 bar)	150 psi (10 bar)
Output Volume Per Cycle (adjustable)	0.001 to 0.008 in^3 (0.02 to 0.13 cm^3)	
Maximum Temperature Rating	350ºF (176ºC)	
Cycle Indication	Visual pin	
Instruction Manual	313798

See page 116 for alternate and replacement outlet fittings, and more accessories.

Life-Long Seals

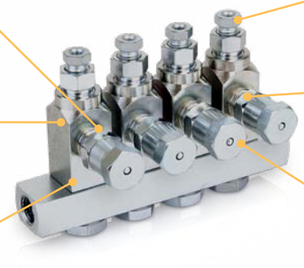
Graco-quality manifold and indicator seals deliver increased productivity.

Wide Range of Manifold Options

Manifolds designed to hold up to 15 injectors decreases installation time.

One-Piece Machined Body

Provides durability not seen in other brands.



Seven Output Fitting Sizes

Use your preferred size of tubing or hose.

Adjustable Injector Output

Adjust output volume on each injector for a custom fit in any application.

Visual Indicator Pin

Convenient front-mounted cycle pin indicator confirms that the injector is functioning properly.

Typical Applications

- In-plant machinery, mobile equipment and anywhere adjustable lubrication output is desired

Typical Fluids

- Oil (10 weight minimum) and grease up to NLGI #2

Injector Technology That Defies Convention

This revolutionary, new patent pending cartridge injector system from Graco ushers in a new era of automatic lubrication system technology! This system will reduce maintenance frequency, labor and costly downtime and will transform uptime, production capacity and profitability expectations.

Quick-Exchange Injectors

Injector replacements take seconds rather than minutes using either a 24 mm or 15/16 in. socket – without the need to remove any lubrication lines.

Backward Compatible

Uses same mounting pattern as GL-1 and GL-1 X series injectors that also match many competitive mounting patterns.

Locked-In Output

Color-coded output spacers dictate the amount of grease dispensed per lubrication cycle, reducing the likelihood of incorrect field adjustments during repair.

Greater Output Range

0.015 to 0.150 in^3, nearly doubling the output of our GL-1 injectors, reducing the need for crossporting multiple injectors in a system

PATENT PENDING

Technical Specifications

Maximum Pressure	Standard-pressure manifold (aluminum) – 3,500 psi (24.1 MPa, 241 bar) High-pressure manifold (steel) – 5,000 psi (34.5 MPa, 345 bar) GCI 150 cartridges – 5,000 psi (34.5 MPa, 345 bar)
Recommended Operating Pressure	2,500 psi (17 MPa, 172 bar)
Reset Pressure	1,000 psi (6.89 MPa, 68.9 bar)
Output Volume Per Cycle	0.015 to 0.150 in^3 (.25 to 2.46 cm^3)
Recommended Fluids	NLGI #2 grease down to 32º F (0º C)
Wetted Materials	Carbon steel, nitrile rubber, aluminum

Manifold Dimensions

	2-Point	3-Point	4-Point	5-Point	6-Point
Width in. (cm)	3.13 (7.94)	4.38 (11.11)	5.63 (14.29)	6.88 (17.46)	8.13 (20.64)
Height in. (cm)	3.4 (8.64)				
Distance Between Mounting Holes in. (cm)	–	1.25 (3.18)	2.50 (6.34)	3.75 (9.51)	5.00 (12.70)

Ordering Information

Graco cartridge injectors are easy to handle, can be serviced in one minute or less and eliminate the need to disconnect lines when replacing. Numerous injector replacements on a machine can be completed in minutes instead of hours, leaving service technicians with more time to focus on other equipment issues.

Standard-Pressure Manifolds

Zerks and caps included

Part Number	Description
134362	2-point manifold, 3,500 psi
134363	3-point manifold, 3,500 psi

Graco Quality Provides Consistent Performance in Rugged Environments

Custom fit your system with Graco's adjustable GL-1 series grease injectors. Designed to meet the needs of each lube point, these systems provide years of reliable operation in the harshest operating environments.

Injector Covers

Clear, polycarbonate covers protect cycle pin indicators from contamination. (Included with GL-1 X and GL-1 XL models)

Hex-Head Adjustment Nut

Heavy-duty hex-head nut makes output adjustments simple.

Unibody Design

Rugged, single-piece body for use in harsh environments.

GL-1 Manifold

6,000 psi, 3/8 in NPT port manifolds fit pre-existing mounting patterns.

Output Spectrum Sleeves

Colored-coded spacers enable simple, targeted output volume.

Single Line Parallel

High Volume Output at High Pressures for the Most Demanding Applications

Rugged, medium-pressure metering system for pumping grease; ideal for heavier-duty applications such as mobile mining vehicles, milling, cement batch plants or material processing equipment.

24A918

Convenient Top-Mounted Cycle Pin Indicator

Provides quick, at-a-glance confirmation that the injector is functioning properly.

Adjustable Output Volumes

To custom fit the system for each lube point.

Hex-Head Adjustment

For easy turning from most any orientation.

Typical Applications

- Rugged, medium-pressure metering system for pumping grease; ideal for heavier-duty applications such as mobile mining vehicles, milling, cement batch plants or material processing equipment.

Typical Fluids

- Grease up to NLGI #2

Technical Specifications

Graco Quality in a Compact Package

Compact Series Progressive (CSP) valve with broad-market versatility. Combine with field-proven Graco pumps for a complete system solution.

1/8 in NPT or BSPP Inlet

Built-in Durability

Zinc iron plating stands up to harsh environments.

Variety of Configurations

6 to 22 outlets, available with or without indicators.

High Output Pressure

Maximum working pressure of 5,076 psi (350 bar).

Output to Meet Your Needs

0.012 in^3 (0.2 cc)/stroke output with the ability to double-up outlets if greater output is required.

Typical Applications

- Industrial or mobile applications where space is at a premium

Typical Fluids

- Oil or grease up to NLGI #2

Technical Specifications

Maximum Pressure, psi (bar)	5,076 (350)
Output Single Outlet	0.012 in^3 (0.20 cm^3)

CSP Compact Cycle Switches

New compact proximity switches mount to the cycle pin assembly on a CSP divider valve and provide electronic cycle indication to G3 and G-Mini pumps with built-in controllers, as well as most external controllers compatible with PNP sensors.

- Use with CSP divider valves with a cycle indicator pin
- LED light on each switch provides visual indication of cycles
- 10-30 VDC PNP, wires the same as other PNP switches
- Wiring diagram is included with each switch
- Rated IP67; UL, CE certified

	Part Number	Description
Image Coming Soon	26C822	Switch assembly with 9.5 in (24 cm) cable to M12 connector. Recommended for a divider valve mounted to the bottom of a G3 Max or SP, or G-Mini Controller pump.
Image Coming Soon	26C823	Switch assembly with 16.5 ft (5 m) cable to flying leads. Recommended for G-Series pumps with a remote mounted valve, and for GLC controllers. M12 connector 124594 (sold separately) is required when wiring to G-Series pumps.

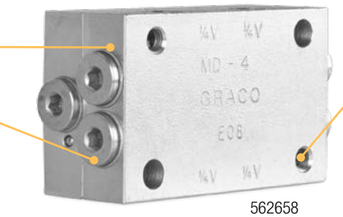
Compact Valve Solution

The Trabon MD Series is the most compact series progressive solution making it a perfect fit for tight-spaced applications.

Available with 2, 3, 4 or 6 Outlets

Fluoroelastomer Seals

For high temperature applications or synthetic lubricants.



562658

Easy to Install

On new or existing equipment.

Typical Applications

- Industrial or mobile applications where space is at a premium

Typical Fluids

- Oil or grease grades up to NLGI #2

Technical Specifications

Material	Steel
Maximum Pressure	3,000 psi (207 bar)
Net Weight (approximate)	1 lb 8 oz (0.68 kg)
Max Operating Temperature	350°F (176°C)
Instruction Manual	312497

Ordering Information

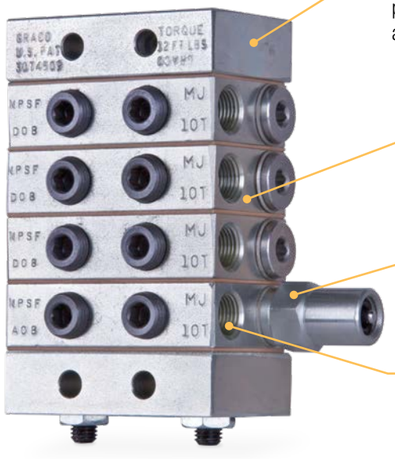
	Number of Outlets	Output per Outlet, in^3 (cm^3)	Valve Only	Valve with Cycle Pin	Valve with Cycle Switch and Bracket Assembly
MD-2	2	0.040 (0.66)	562656	562653	563270
MD-3	3	Outlet 1 – 0.040 (0.66) Outlet 2 and 3 – 0.020 (0.33)	562657	562654	563271
MD-4	4	0.020 (0.33)	562658	562655	564356
MD-6	6	0.010 (0.16)	562659	N/A	

MD Parts and Accessories

Part Number	Description
17M380	Solid State Proximity Switch – for electronic cycle indication, 10-36 VDC PNP, M12 Electrical Connector
563555	Cycle Indicator Spud assembly
557720	Cycle Indicator Pin (replacement only, not compatible with valves that don't already have the pin)
557781	Replacement SPDT Cycle Switch
122276	Viton O-ring

Compact Yet Configurable

The Trabon MJ series features a compact and easily customizable design that can be tailor fit to meet a variety of specific lube requirements. Capable of handling grease grades up to NLGI #1.



Easily Accessorized

Can be easily accessorized with cycle and performance indicators to provide positive assurance of a successful lube event.

Space Efficient

From 6 to 16 points from one block assembly.

Built-In Outlet Check Valves

Ensure accurate lube delivery, every time.

Output Options

Three different piston sizes, each offered as S (single) or T (twin) outlet valves, allow a variety of ratios without increasing the size of the valve assembly.

Typical Applications

- Machine tools
- Textile, glass and can machinery

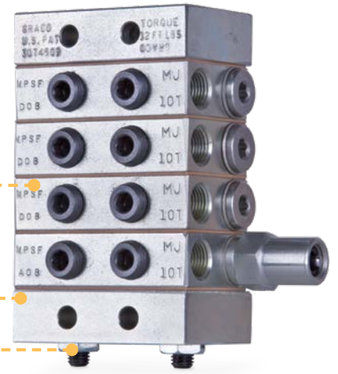
Typical Fluids

- Oil or Grease up to NLGI #1

Technical Specifications

Material	Plated Steel
Maximum Pressure	2,000 psi (137.89 bar)
Max Operating Temperature	200ºF (93ºC)
Max Cycle Rate with Cycle Pin	60 cycles/minute
Instruction Manual	312497

Steps to Build Your MJ Divider Valve System:



A Select Valve Working Sections

B Select Inlet and End Sections

C Select Tie Rods and Tie Rod Nuts

Choose from Optional Accessories

D Cross-port and Singling Bars

E Cycle Indicators and Proximity Switches

F Performance Indicators

G Mounting Bars

A Ordering Information

Valve Working Sections

Standard 1/8 in NPSF outlet ports accept NPT fittings. Must be ordered in multiples of five.

Outlet Configuration	Description	Output Per Outlet, in^3 (cm^3)	Part Number	
			Standard Section	With Cycle Pin
Single	MJ-5S	0.010 (0.16)	562500	N/A
	MJ-10S	0.020 (0.33)	562501	562508
	MJ-15S	0.030 (0.49)	562502	562509
Twin	MJ-5T	0.005 (0.08)	562503	N/A
	MJ-10T	0.010 (0.16)	562504	562510
	MJ-15T	0.015 (0.26)	562505	562511

MJ Spare Parts and Accessories

Part Number	Description
563948	Cycle Indicator Repair Kit
557514	Replacement Gasket
557349	Replacement Outlet Port Plug (one is already included with each "S" section)

B Ordering Information

Inlet and End Sections

Must be ordered in multiples of five.

Component	Description	Part Number
Inlet Section	Standard 1/8 in NPSF inlet, accepts NPT fittings.	560643
End Section	Standard end section.	560645

Note: Each valve, inlet and end section is packaged with a gasket, so a complete MJ assembly will have one gasket leftover.

C Ordering Information

Tie Rods and Tie Rod Nuts

Two tie rods and two tie rod nuts required for each MJ assembly.

Component	Length	Part Number
Tie Rods	3-section	557515
	4-section	557516
	5-section	557517
	6-section	557518
	7-section	557519
	8-section	557520
Tie Rod Nuts	N/A	556371

D Ordering Information

Crossport and Singling Bars

For each bar used, order one of part number 557349 (1/8 in NPT pipe plug) to plug the unused outlet.

	Part Number	Component	Description
	562914	Right Crossport Bar	Provides a path to redirect output from one outlet to the next one below it, away from the inlet.
	562915	Singling Bar	Converts a “T” valve to an “S” valve.

E Ordering Information

Cycle Indicators and Proximity Switches

These switches sense the divider valve piston’s action for accurate control and monitoring of lube cycles.

Part Number	Component	Description
563272	Single pole, double throw (SPDT) standard cycle switch and bracket assembly	Used in conjunction with the cycle indicator at cycle rates not exceeding 60 cpm, the switch provides an electrical signal to the system controller which counts cycles to monitor and verify completion of the lube cycle. Included bracket clamps to spud around cycle pin.
563273	Moisture-resistant SPDT cycle switch and bracket assembly	
564357	Double pole, double throw (DPDT) cycle switch and bracket assembly	
17M380	Solid State Proximity Switch (see page 161 for mating cables)	This rugged switch has no moving parts, making it ideal for applications such as metal stamping presses and yellow iron equipment. 10-32 VDC PNP switching, M12 electrical connector, 200 cpm, 3,000 PSI (207 bar) maximum pressure. 50,000,000 cycle life, IP65, IP68, IP69 rated.

F Ordering Information

Performance Indicators

These vital safeguards react to excess lube pressure when points or lines become blocked. Installed in indicator ports on the working piston sections, they quickly identify the affected lines. 1/8 in NPT male thread installs in the indicator ports on the front of each valve.

Reset Indicators

Features and Benefits

- Provides quick troubleshooting tool with visual indication
- No tools for reset or parts to replace after indication
- Easy information on blocked lines, high system pressure or blocked bearings

	Part Number	Indication Pressure
Image Coming Soon	563231	250 psi (17 bar)
	563232	500 psi (35 bar)
	563233	750 psi (52 bar)
	563234	1,000 psi (69 bar)
	563235	1,500 psi (103 bar)
	563236	2,000 psi (138 bar)

Automatic Relief Indicators

These performance indicators pinpoint lube line blockages but allow the lube system to continue to supply lubrication to points that are not blocked.

Features and Benefits

- Provides quick troubleshooting tool with visual indication
- No tools for reset or parts to replace after indication
- Easy information on blocked lines, high system pressure or blocked bearings

	Part Number	Indication Pressure
Image Coming Soon	563163	750 psi (52 bar)
	563164	1,000 psi (69 bar)
	563166	1,500 psi (103 bar)
	563167	2,000 psi (138 bar)

G Ordering Information

Mounting Bar

Part Number	Component	Description
561101	MJ Divider Valve Weld Bar	1/2 in (12.7 mm) thick steel bars are designed for welding to uneven metal surfaces. Tapped holes are provided for mounting the divider valves. This part is one individual bar, so order quantity 2 when needed.

The Industry Standard for Quality and Reliability

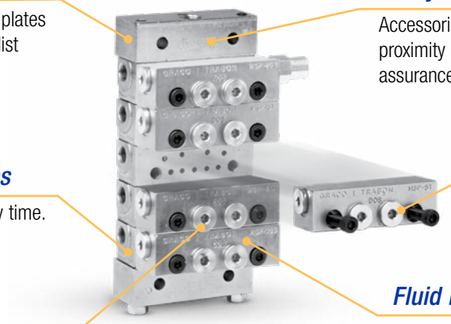
The Trabon MSP Series sets the industry standard for quality, reliability and ease-of-use features. It was the original modular-style series progressive divider valve and is still the best!

Baseplate Assemblies

Pre-assembled and tested base plates now available! Make your parts list shorter and assembly quicker.

Easily Accessorized

Accessories such as cycle indicating proximity switches provide positive assurance of a successful lube event.



Built-In Outlet Check Valves

Ensure accurate lube delivery, every time.

Quick Change Valve Sections

Easily removed from the base assembly without disturbing any lube lines

Indicator Ports

Alternate outlets on face of each valve can be fitted with optional performance indicators, taking the guesswork out of troubleshooting.

Fluid Flexibility

Use the same MSP components for oil or grease applications, reducing the number of parts that need to be stocked.

Typical Applications

- Mobile, industrial, food and beverage, wind, and many more

Typical Fluids

- Oil or Grease up to NLGI #2

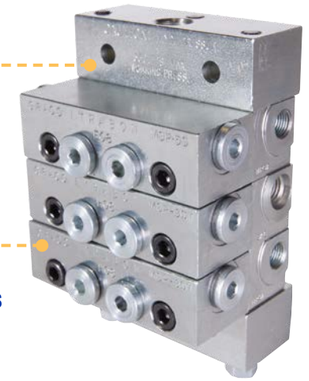
Technical Specifications

Material	Plated Steel
Maximum Pressure	3,500 psi (241 bar)
Max Operating Temperature	350ºF (176 ºC)
Max Cycle Rate with Cycle Pin	60 cycles/minute
Max Cycle Rate without Cycle Pin	200 cycles/minute
Instruction Manual	312497

Steps to Build Your MSP Divider Valve System:

A Select the Base Plate Assembly By the Number of Valve Sections Needed

B Select Valve Working Sections



Choose from Optional Accessories

- **C** Cross-port and Singling Bars
- **D** Performance Indicators
- **E** Cycle Indicators and Proximity Switches
- **F** Mounting Bars and Brackets
- **G** Modular Specialty Inlets

A Ordering Information

Factory-Tested MSP Base Plate Assemblies

How many valve sections are in the assembly? Count up the number of sections and order a base assembly that has the correct number of sections. Base plate assembly is delivered completely assembled and tested with inlet, intermediate base plate sections, end section, tie rods and nuts.

Item	Maximum Number of Outlets	Number of Valve Sections	Part Number	
			NPSF	BSPP
1/2/3/4/5	6	3	24G485	24N915
	8	4	24G486	24N916

	MSP-40T	0.040 (0.66)	562727	562743

*Each “S” section uses only one outlet, but each intermediate base has two outlets. For each “S” section in the assembly, order one Outlet Port Plug (below), to plug the unused outlet.

Outlet Port Plugs

Part Number			Note
NPSF	BSPP	SAE-ORB	
557349 (NPT)	558799 (with seal ring)	567251 (with O-ring)	1 outlet port plug is required for each “S” valve section.

Bypass Section

Part Number	Description
562660	MSP-BP Bypass Block takes the place of a valve, but has no output. Not a true working section. Requires two outlet port plugs for the unused outlets.

C Ordering Information

Cross-port and Singling Bars

Part Number	Component	Note
563469	Right Cross-port Bar	1 outlet port plug is required for each cross-port bar, to plug the unused outlet.
563470	Left Cross-port Bar	
563471	Right and Left Cross-port Bar	2 outlet port plugs are required for each double cross-port bar.
563472	Singling Bar	Converts a "T" valve to an "S" valve.

D Ordering Information

Performance Indicators

These vital safeguards react to excess lube pressure when points or lines become blocked. Installed in indicator ports on the working piston sections, they quickly identify the affected lines.

Reset Indicators with Memory

Features and Benefits

- Provides quick troubleshooting tool with visual indication
- No tools for reset or parts to replace after indication
- Easy information on blocked lines, high system pressure or blocked bearings
- 1/8 in NPSF thread with O-ring seal

	Part Number	Cracking Pressure
Image Coming Soon	563252	250 psi (17 bar)
	563253	500 psi (35 bar)
	563254	750 psi (52 bar)
	563255	1,000 psi (69 bar)
	563256	1,500 psi (103 bar)
	563257	2,000 psi (138 bar)
	563258	2,500 psi (172 bar)
	563261	3,000 psi (207 bar)
	563263	3,500 psi (241 bar)

Automatic Relief Indicators

Features and Benefits

These performance indicators pinpoint lube line blockages but allow the lube system to continue to supply lubrication to points that are not blocked.

- Allows machine to continue to run when non-critical bearings are blocked
- No time or effort required for reset after blockage is cleared
- Easy information on blocked lines, high system pressure or blocked bearings
- 1/8 in NPSF thread with O-ring seal

	Part Number	Cracking Pressure
	563170	750 psi (52 bar)
	563171	1,000 psi (69 bar)
	563172	1,250 psi (86 bar)
	563173	1,500 psi (103 bar)
	563174	2,000 psi (138 bar)
	563175	2,500 psi (172 bar)
	563176	3,000 psi (207 bar)

Performance Indicator Spare Parts

Part Number	Description
556569	Standard O-ring (90 DURO Fluoroelastomer), black
556567	Alternate O-ring (90 DURO Buna-N), black
16U217	Indicator Port Plug, with O-ring 556569

E Ordering Information

Cycle Indicators and Proximity Switches

A wide variety of safeguards to monitor and verify lube cycles. These mechanical and electrical units sense the divider valve piston's action for accurate control and monitoring of lube cycles.

	Part Number	Component	Description
	563251	Magnetic Visual Cycle Indicator	The highly visible cycle indicator has a snap-action movement which allows the user to visually determine the timing of each divider valve cycle.
	563272	SPDT Cycle Switch, provides electrical signal to controller or PLC	Used in conjunction with the cycle indicator pin at cycle rates not exceeding 60 cpm, it provides an electrical signal to the system controller which counts cycles to monitor and verify completion of the lube cycle.
	564357	Double Pole, Double Throw (DPDT) Cycle Switch and bracket assembly	
Image Coming Soon	563273	SPDT Cycle Switch, provides electrical signal to controller or PLC, moisture resistant	
	17L983	Solid State Proximity Switch (see page 161 for mating cables)	This rugged switch has no moving parts, making it ideal for applications such as metal stamping presses and yellow iron equipment. 10-32 VDC PNP switching, M12 electrical connector, 200 cpm, 7,500 PSI (518 bar) maximum pressure. 50,000,000 cycle life, IP65, IP68, IP69 rated.
Image Coming Soon	557741	Field-Sensitive Proximity Switch, 3-Pin BH, with O-ring	A ceramic-magnet switch for grease or oil systems up to 200 cpm at pressure up to 3,500 psi (241 bar), accurately signals piston cycles, and is ideal for high-cycle applications. Bradley-Harrison (BH) electrical connectors, 115 VAC. 7/16-20 thread with O-ring seal mates to MSP valves with date codes L94 and newer.
	557746	Field-Sensitive Proximity Switch, 5-Pin BH, with O-ring	

Proximity Switch Spare Parts

Part Number	Component
556570	Standard O-ring (90 DURO Fluoroelastomer), black
556568	Alternate O-ring (90 DURO Buna-N), black
567251	Enclosure Port Plug, with O-ring 556570

F Ordering Information

Mounting Bars

Part Number	Component	Description
560920	MSP/MHH Weld Bar	1/2 in (12.7 mm) thick steel bars are designed for welding to uneven metal surfaces. Mounting holes are threaded 1/4-20 to attach MSP or MHH valve assembly.
563465	Divider Valve Weld Bar Kit	Includes 2 mounting bars (560920), 4 screws, washers and lockwashers.
17J423	MSP/MHH Weld Stud Fixture	Attach studs to the jig before welding to ensure perfect alignment. For 3-valve to 8-valve assemblies

G Ordering Information

MSP Modular Specialty Inlets

Shunt Inlets

NEW – Graco has updated the Shunt Valve power connection to a DIN Connector. Previous versions used a 3-Pin Brad Harrison Connector. Adapter kit 25T585 (see below) is available to convert from 3-Pin BH to DIN.

Features and Benefits

- For use with oil and FLUID grease only – 3,500 psi maximum fluid pressure
- A three-way valve, incorporated into the MSP inlet section – can replace standard inlet or mount in-line with remote manifold kit.
- Options for 115 VAC, 24 VDC or pneumatic
- "Normal" state allows lubricant to enter divider valve
- Energized state sends fluid out the bypass port – to another divider valve, to a large bearing or back to tank.

	Power	Connection	Normal State	Shunt Inlet Part Number			Replacement Solenoids**
				Connection Thread			
				NPSF	BSPP	SAE-ORB	
Image Coming Soon	115 VAC	DIN	NO	25B534	–	25U054	20A339
	115 VAC	DIN	NC	25B535	–	25U053	
	24 VDC	DIN	NO	25B515	25U041	25U052	20A081
	24 VDC	DIN	NC	25B514	25U040	25U051	
	Pneumatic	1/8 NPSF*	NC*	563456	–	–	–

*Pneumatic Shunt 563456 ships in Normally Closed configuration, can be converted to Normally Open in the field. Air pressure range 40 to 150 psi, 1/8 in NPSF female air inlet port.
**Replacement Solenoids will NOT work in the old-style Shunt Inlets. If the coil or solenoid in an old style Inlet section has failed, replace the entire Inlet section.

Zero-Leak Shut-Off Inlets

NEW – Graco has updated the Zero-Leak Shut-Off Valve power connection to a DIN Connector. Previous versions used a 3-Pin Brad Harrison Connector. Adapter kit 25T585 (see below) is available to convert from 3-Pin BH to DIN.

Features and Benefits

- For use with oil only – 1,500 psi maximum oil pressure
- A two-way valve that can be used with either continuous or intermittent pressurized header systems.
- Replaces a standard inlet section or mounts in-line with a remote manifold kit.
- All models are Normally Closed

	Power	Connection	Normal State	Zero Leak Inlet Part Number			Replacement Solenoids**
				Connection Thread			
				NPSF	BSPP	SAE-ORB	
Image Coming Soon	115 VAC	DIN	NC	20A900	–	20A901	20A586

	Inlet restrictor with 90 micron last chance filter			563074	–	–	–

*Replacement Solenoids will NOT work in the old-style Zero-Leak Shut-Off Inlets. If the coil or solenoid in an old style Inlet section has failed, replace the entire Inlet section.

Other Components for Shunt and Zero-Leak Shut-Off Inlets

Connector and Cable Options

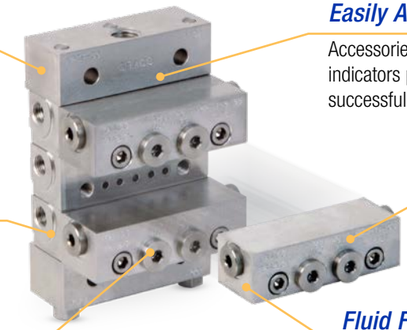
Part Number	Description
16U790	Power cable with DIN connector, 15 ft (4.5 m).
132924	Field-installable DIN connector, no wire provided.
25T585	Adapter Cable Kit, 3-Pin BH to DIN. To be used on retrofits. Some assembly required. Instruction manual number 3A8068.

Remote Mount Manifold Kit

Part Number	Description
563461	Includes manifold with 1/4 NPSF outlet, O-ring 556540 and two mounting screws.

Setting the Industry Standard for Quality, Reliability and Ease-of-Use Features

More durability with the same high-quality performance and precision machining as the carbon steel version. The stainless steel MSP valves and accessories overcome harsh conditions, such as salty air or areas needing repetitive cleaning, with durable 303 materials and a design with proven success.



Baseplate Assemblies

Pre-assembled and tested base plates now available! Make your parts list shorter and assembly quicker.

Easily Accessorized

Accessories such as proximity switch cycle indicators provide positive assurance of a successful lube event.

Built-In Outlet Check Valves

Ensure accurate lube delivery, every time.

Quick Change Valve Sections

Easily removed from the base assembly without disturbing any lube lines

Indicator Ports

Alternate outlets on face of each valve can be fitted with optional performance indicators, taking the guesswork out of troubleshooting.

Fluid Flexibility

Use the same MSP components for oil or grease applications, reducing the number of parts that need to be stocked.

Typical Applications

- Food and beverage, machine tools, textile, glass and can machinery, mobile equipment

Typical Fluids

- Oil or Grease up to NLGI #2

Technical Specifications

External Material	Stainless Steel

316 Stainless Steel Outlet Port Plugs

Part Number		Note
NPSF	BSPP	
555457 (NPT)	114172 (BSPT)	1 outlet port plug is required for each “S” valve section

C Ordering Information

Cross-port and Singling Bars – 303 Stainless Steel

Part Number	Component	Note
24R632	Right Cross-port Bar	1 outlet port plug is required for each cross-port bar
24R633	Left Cross-port Bar	
24R631	Right and Left Cross-port Bar	2 outlet port plugs are required for each double cross-port bar

D Ordering Information

Performance Indicators

These vital safeguards react to excess lube pressure when points or lines become blocked.
Installed in indicator ports on the working piston sections, they quickly identify the affected lines.

Reset Indicators with Memory

Features and Benefits

- Provides quick troubleshooting tool with visual indication
- No tools for reset or parts to replace after indication
- Easy information on blocked lines, high system pressure or blocked bearings
- 1/8 NPSF thread with O-ring seal
- 303 Stainless Steel

	Part Number	Cracking Pressure
Image Coming Soon	24B495	1,000 psi (69 bar)
	24B496	1,500 psi (103 bar)
	24N373	2,000 psi (138 bar)

Automatic Relief Indicators

Features and Benefits

These performance indicators pinpoint lube line blockages but allow the lube system to continue to supply lubrication to points that are not blocked.

- Allows machine to continue to run when non-critical bearings are blocked
- No time or effort required for reset after blockage is cleared
- Easy information on blocked lines, high system pressure or blocked bearings
- 1/8 NPSF thread with O-ring seal
- 303 Stainless Steel

	Part Number	Cracking Pressure
	24N945	1,000 psi (69 bar)
	24N948	1,500 psi (103 bar)
	24N949	2,000 psi (138 bar)
	24N951	2,500 psi (172 bar)
	24N952	3,000 psi (207 bar)

Performance Indicator Spare Parts

Part Number	Description
556569	Standard O-ring (90 DURO Fluoroelastomer), black
556567	Alternate O-ring (90 DURO Buna-N), black
19B227	Indicator Port Plug, 303 stainless steel with O-ring 556569

E Ordering Information

Cycle Indicators and Proximity Switches

A wide variety of safeguards to monitor and verify lube cycles. These mechanical and electrical units sense the divider valve piston's action for accurate control and monitoring of lube cycles.

Part Number	Component	Description
563251	Magnetic Visual Cycle Indicator	The highly visible cycle indicator has a snap-action movement which allows the user to visually determine the timing of each divider valve cycle.
17L983	Solid State Proximity Switch (see page 161 for mating cables)	This rugged switch has no moving parts, making it ideal for applications such as metal stamping presses and yellow iron equipment. 10-32 VDC PNP switching, M12 electrical connector, 200 cpm, 7,500 PSI (518 bar) maximum pressure. 50,000,000 cycle life, IP65, IP68, IP69 rated.
557741	Field-Sensitive Proximity Switch, 3-Pin BH, with O-ring	A ceramic-magnet switch for grease or oil systems up to 200 cpm at pressure up to 3,500 psi (241 bar), accurately signals piston cycles, and is ideal for high-cycle applications. Bradley-Harrison (BH) electrical connectors, 115 VAC.
557746	Field-Sensitive Proximity Switch, 5-Pin BH, with O-ring	

Proximity Switch Spare Parts

Part Number	Component
556570	Standard O-ring (90 DURO Fluoroelastomer), black
556568	Alternate O-ring (90 DURO Buna-N), black
19A574	Enclosure Port Plug, 303 stainless steel with O-ring 556570

Modular Design for Easy Maintenance

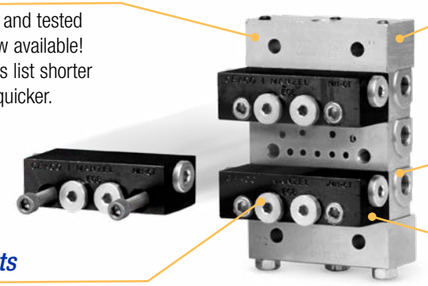
Same capable design as the Trabon MSP Series with even tighter and more exacting tolerances. The Manzel MHH Series delivers highly accurate lube delivery for demanding high-pressure oil applications.

Baseplate Assemblies

Pre-assembled and tested base plates now available! Make your parts list shorter and assembly quicker.

Indicator Ports

Alternate outlets on face of each valve can be fitted with optional performance indicators, taking the guesswork out of troubleshooting.



Easily Accessorized

Accessories such as proximity switch cycle indicators provide positive assurance of a successful lube event.

Built-In Outlet Check Valves

Ensure accurate lube delivery, every time.

Quick Change Valve Sections

Easily removed from the base assembly without disturbing any lube lines – minimizing labor cost and maximizing your machine uptime.

Typical Applications

- Compressors, industrial equipment, and where high-pressure lubrication in required

Typical Fluids

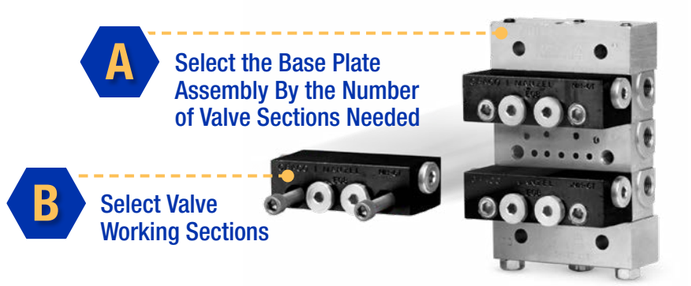
- Synthetic or Mineral Oil

Technical Specifications

Material	Plated Steel
Maximum Pressure	7,500 psi (517 bar)
Maximum Operating Temperature	350ºF (176ºC)
Maximum Cycle Rate	200 cycles/min
Instruction Manual	312497

Manzel® MHH Divider Valve

Steps to Build Your MHH Divider Valve System:



Choose from Optional Accessories

- **C** Cycle Indicators and Proximity Switches
- **D** Performance Indicators
- **E** Mounting Bars and Brackets

A Ordering Information

Factory-Tested MHH Base Plate Assemblies

How many sections are in the assembly? Count up the number of sections, and order a base assembly that has the correct number of sections. Base plate assembly is delivered completely assembled and tested with inlets, intermediate base plate sections, end section, tie rods and nuts.

Item	Maximum Number of Outlets	Number of Valve Sections	Part Number
			NPSF
1/2/3/4/5	6	3	24F596
	8	4	24F597
	10	5	24F598
	12	6	24F599
	14	7	24F600
	16	8	24F601

A Ordering Information (continued)

Build Your Own MHH Base Plate Assemblies

Item	Component	Description	Part Number	Note
			NPSF	
1	Inlet section options	"MH" inlet with bleed ports	563421	Must be ordered in multiples of 5
		"MS" inlet without bleed ports	560919	
2	Intermediate base plate	Two outlet ports	563425	
3	End section options plate	Standard end	563424	
		With alternate inlet port**	563279	
4	Tie Rods (3 required)	3-section	557731	3 tie rods and tie rod nuts required for assembly
		4-section	557732	
		5-section	557733	
		6-section	557734	
		7-section	557735	
		8-section	557736	
		9-section	557738	
		10-section	557739	
		11-section	557740	
5	Tie Rod Nuts (3 required)	Tie rod nuts	556371	

*Wide Mount refers to wider spaced mounting holes in the Inlet and End sections to match competitors' mounting patterns.
**Alternate inlet port in end section 563279 requires Leak Proof zerk fitting such as part number 555888, 556429 or similar.
NOTE: Refer to MSP pages for BSPP and SAE inlet and base plate porting options.

	MHH-24T	0.024 (0.393)	562689
	MHH-30T	0.030 (0.492)	562690

*Each “S” section uses only one outlet, but each intermediate base has two outlets. For each “S” section in the assembly, order one of part number 557349 (1/8 in NPTF Outlet Port Plug) to plug the unused outlet.

C Ordering Information

Cycle Indicators and Proximity Switches

	Part Number	Component	Note
	563251	Magnetic Visual Cycle Indicator	The highly visible cycle indicator has a snap-action movement which allows the user to visually determine the timing of each divider valve cycle.
Image Coming Soon	557745	Explosion-Proof FSmech Proximity Switch	Explosion-proof dry contact switch dual rated for 115 VAC or 10-32 VDC. Includes potted 6 ft (1.8 m) cable with flying leads. Used at pressures that do not exceed 7,500 psi (517 bar) at cycle rates up to 200 cycles per minute. Approved for hazardous locations: Class I, Groups A, B, C and D – Division 1.
Image Coming Soon	558941	Micro-Monitor	LCD shows total cycle count up to 999,999. Reset to zero by inserting the reset magnet into the recessed opening. An LED will also flash with each cycle of the piston in the divider block indicating a complete stroke.

Proximity Switch Spare Parts

Part Number	Component
556570	Standard O-ring (90 DURO Fluoroelastomer), black
556568	Alternate O-ring (90 DURO Buna-N), black
567251	Enclosure Port Plug, with O-ring 556570

D Ordering Information

Performance Indicators

These vital safeguards react to excess lube pressure when points or lines become blocked. Installed in indicator ports on the working piston sections, they quickly identify the affected lines.

Reset Indicators with Memory

Features and Benefits

- Provides quick troubleshooting tool with visual indication
- No tools for reset or parts to replace after indication
- Easy information on blocked lines, high system pressure or blocked bearings
- 1/8 NPSF thread with O-ring seal

	Part Number	Cracking Pressure
Image Coming Soon	563258	2,500 psi (172 bar)
	563261	3,000 psi (207 bar)
	563263	3,500 psi (241 bar)
	563262	5,000 psi (345 bar)

Disk-Type Pressure Indicator

Features and Benefits

A blow-out disk ruptures when lube line blockage occurs and lubricant forces a pin to protrude from the body of the indicator. There is no provision for relief and the pressure escalates until relieved elsewhere in the system. The disk must be replaced and the pin reset manually after the blockage is eliminated.

- Easy information on blocked lines, high system pressure or blocked bearings
- 1/8 NPSF thread with O-ring seal

	Part Number	Cracking Pressure	Replacement Rupture Disks
	563229	2,800 psi (193 bar)	557422
	563221	3,700 psi (255 bar)	557423
	563222	4,600 psi (317 bar)	557424
	563224	5,500 psi (380 bar)	557425
	563226	6,400 psi (441 bar)	557427
	N/A	7,300 psi (503 bar)	557428
	N/A	8,200 psi (565 bar)	557429

Performance Indicator Spare Parts

Part Number	Description
556569	Standard O-ring (90 DURO Fluoroelastomer), black
556567	Alternate O-ring (90 DURO Buna-N), black
16U217	Indicator Port Plug, with O-ring 556569

E Ordering Information

“Manzel Mount” MHH valves have the same footprint as the Trabon MSP valves. Please refer to the MSP pages for mounting bar and bracket options available from Graco.

Greater Output Volumes for Heavy Service Requirements

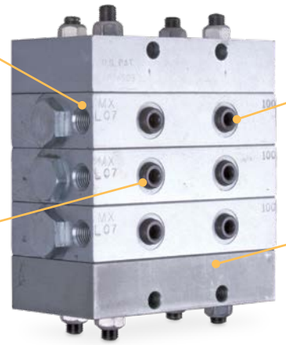
The Trabon MX Series is ideal for steel and paper mill systems with it's economical and compact design.

Durable Design

Withstands harsh environments and operating conditions.

Indicator Ports

Alternate outlets on face of each valve can be fitted with optional performance indicators, taking the guesswork out of troubleshooting.



Easily Accessorized

Accessories such as proximity switch cycle indicators provide positive assurance of a successful lube event.

Built-In Outlet Check Valves

Ensure accurate lube delivery, every time.

Typical Applications

- Pulp and paper, steel mills, heavy- and high-volume industrial applications
- **Please Note:** MX valves are primarily offered for replacement of existing MX, MXS, and MXO valve assemblies. For new application, consider the MXP series instead.

Typical Fluids

- Oil or Grease up to NLGI #2

Technical Specifications

Material	Plated Steel
Maximum Pressure	3,000 psi (207 bar)

	MX-150T	0.150 (2.46)	562546	562527	562536

MX Spare Parts and Accessories

Part Number	Description
563917	Cycle indicator repair kit
557509	Replacement intermediate gasket
557391	Replacement 1/4 in NPTF outlet port plug (one is already included with each "S" section)

B Ordering Information

Inlet and End Sections

Must be ordered in multiples of two.

Component	Description	Part Number
Inlet Section	Standard 3/8 in NPSF inlet, accepts NPT fittings	560620
End Section	Standard end section	563287

Note: Each valve, inlet and end section is packaged with a gasket, so a complete MX assembly will have one gasket leftover.

C Ordering Information

Tie Rods and Tie Rod Nuts

Four tie rods and eight tie rod nuts required for each MX assembly.

Component	Length	Part Number
Tie Rods (4 required)	3-section	557488
	4-section	557489
	5-section	557490
	6-section	557491
	7-section	557492
	8-section	557493
	9-section	560576
Tie Rod Nuts (8 required)	N/A	557494

D Ordering Information

Cross-port and Singling Bars

For each bar used, order one of part number 557391 (1/4 in NPT pipe plug) to plug the unused outlet.

Part Number	Component	Description
562917	Right or Left Cross-port Bar	Provides a path to redirect output from one outlet to the next one below it, away from the inlet.
562916	Singling Bar	Converts a "T" valve to an "S" valve

E Ordering Information

Cycle Indicators and Proximity Switches

A wide variety of safeguards monitor and verify lube cycles. These switches sense the divider valve piston's action for accurate control and monitoring of lube cycles.

Part Number	Component	Description
563260	Magnetic Visual Cycle Indicator	The highly visible cycle indicator has a snap-action movement which allows the user to visually determine the timing of each divider valve cycle.
563272	Single Pole, Double Throw (SPDT) Standard Cycle Switch and Bracket Assembly	Used in conjunction with the cycle indicator pin at cycle rates not exceeding 60 cpm, the switch provides an electrical signal to the system controller which counts cycles to monitor and verify completion of the lube cycle. Included bracket clamps to spud around cycle pin.
563273	Moisture-resistant SPDT Cycle Switch and Bracket Assembly	
564357	Double Pole, Double Throw (DPDT) Cycle Switch and Bracket Assembly	
17L880	Solid State Proximity Switch (see page 161 for mating cables)	This rugged switch has no moving parts, making it ideal for applications such as metal stamping presses and yellow iron equipment. 10-32 VDC PNP switching, M12 electrical connector, 200 cpm, 7,500 PSI (518 bar) maximum pressure. 50,000,000 cycle life, IP65, IP68, IP69 rated.
563476	Field-Sensitive Proximity Switch, 3-Pin BH, with O-ring	A ceramic-magnet switch for grease or oil systems up to 200 cpm at pressure up to 3,500 psi (241 bar), accurately signals piston cycles, and is ideal for high-cycle applications. Bradley-Harrison (BH) electrical connectors, 115 VAC.
564399	Field-Sensitive Proximity Switch, 5-Pin BH, with O-ring	

F Ordering Information

Performance Indicators

These vital safeguards react to excess lube pressure when points or lines become blocked. Installed in indicator ports on the working piston sections, they quickly identify the affected lines. 1/4 in NPT male thread installs in the indicator ports on the front of each valve.

Reset Indicators with Memory

Features and Benefits

- Provides quick troubleshooting tool with visual indication
- No tools for reset or parts to replace after indication
- Easy information on blocked lines, high system pressure or blocked bearings
- 1/4 in NPTF thread

Part Number	Indication Pressure
563239	250 psi (17 bar)
563240	500 psi (35 bar)
563241	750 psi (52 bar)
563242	1,000 psi (69 bar)
563243	1,500 psi (103 bar)
563244	2,000 psi (138 bar)
563245	2,500 psi (172 bar)

Automatic Relief Indicators

These performance indicators pinpoint lube line blockages but allow the lube system to continue to supply lubrication to points that are not blocked.

Features and Benefits

- Allows machine to continue to run while non-critical bearings are lubricated
- No time or effort required for reset after blockage is cleared
- Easy information on blocked lines, high system pressure or blocked bearings
- 1/4 in NPTF thread

Part Number	Indication Pressure
563156	750 psi (52 bar)
563157	1,000 psi (69 bar)
563158	1,250 psi (86 bar)
563159	1,500 psi (103 bar)
563160	2,000 psi (138 bar)
563161	3,000 psi (207 bar)

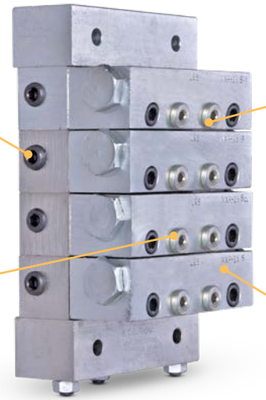
G Ordering Information

Mounting Bars

Part Number	Component	Description
561102	MX/MXP Mounting Bar	For welding to uneven metal surfaces. Two sets of mounting holes are threaded 5/16-18 to attach MXP or MX. This part is one individual bar, so order quantity 2 when needed.

Modular Version Of MX Valves — Same Function, But Modern Design.

The "big brother" of the MSP. Uses same performance indicators as MSP!



Built-In Outlet Check Valves

Ensure accurate lube delivery, every time.

Indicator Ports

Alternate outlets on face of each valve can be fitted with optional performance indicators, taking the guesswork out of troubleshooting.

Easily Accessorized

Accessories such as proximity switch cycle indicators provide positive assurance of a successful lube event.

Quick Change Valve Sections

Easily removed from the base assembly without disturbing any lube lines.

Typical Applications

- Pulp and paper, steel mills, heavy- and high-volume industrial applications

Typical Fluids

- Oil or Grease up to NLGI #2

Technical Specifications

Material	Plated Steel
Maximum Pressure	3,000 psi (207 bar)
Maximum Operating Temperature	350ºF (176ºC)
Maximum Cycle Rate with Cycle Pin	60 cycles/min
Maximum Cycle Rate without Cycle Pin	110-200 cycles/min (see chart below)
Instruction Manual	312497

MXP Section Spare Parts

Part Number	Description
115010*	Standard O-ring (90 DURO Fluoroelastomer), black
563917	Cycle indicator pin repair kit
556328	Outlet check ball
557484	Outlet check spring, NPSF and BSPP bases
556997	Outlet check spring, SAE-ORB bases

*Part numbers are for a single O-ring; each section requires nine O-rings.

B Ordering Information

MXP Valve Sections

Also called “working” sections. Must be ordered in multiples of 2.

Outlet Configuration	Description	Output Per Outlet, in^3 (cm^3)	Part Number	
			Standard Section	With Cycle Pin – Right
Single	MXP-25S*	0.050 (0.82)	562819	N/A
	MXP-50S*	0.100 (1.64)	562820	562830
	MXP-75S*	0.150 (2.46)	562821	562831
	MXP-100S*	0.200 (3.28)	562822	562832
	MXP-125S*	0.250 (4.10)	562823	562833
	MXP-150S*	0.300 (4.92)	562824	562834
Twin	MXP-25T	0.025 (0.41)	562813	N/A
	MXP-50T	0.050 (0.82)	562814	562825
	MXP-75T	0.075 (1.23)	562815	562826
	MXP-100T	0.100 (1.64)	562816	562827
	MXP-125T	0.125 (2.05)	562817	562828
	MXP-150T	0.150 (2.46)	562818	562829

*Each “S” section uses only one outlet, but each intermediate base has two outlets. For each “S” section in the assembly, order one Outlet Port Plug (below), to plug the unused outlet.

Outlet Port Plugs

Part Number		Note
NPSF	BSPP	
557391 (NPT)	556427 (with seal ring)	1 outlet port plug is required for each “S” valve section.

C Ordering Information

Cross-port and Singling Bars

Part Number	Component	Note
563525	Right Cross-port Bar	1 outlet port plug is required for each cross-port bar
563524	Left Cross-port Bar	
563526	Right and Left Cross-port Bar	2 outlet port plugs are required for each double cross-port bar

Trabon® MXP Divider Valve

Series Progressive

D Ordering Information

Performance Indicators

These vital safeguards react to excess lube pressure when points or lines become blocked. Installed in indicator ports on the working piston sections, they quickly identify the affected lines.

Reset Indicators with Memory

Features and Benefits

- Provides quick troubleshooting tool with visual indication
- No tools for reset or parts to replace after indication
- Easy information on blocked lines, high system pressure or blocked bearings
- 1/8 NPSF thread with O-ring seal

	Part Number	Cracking Pressure
Image Coming Soon	563252	250 psi (17 bar)
	563253	500 psi (35 bar)
	563254	750 psi (52 bar)
	563255	1,000 psi (69 bar)
	563256	1,500 psi (103 bar)
	563257	2,000 psi (138 bar)
	563258	2,500 psi (172 bar)
	563261	3,000 psi (207 bar)

Automatic Relief Indicators

Features and Benefits

These performance indicators pinpoint lube line blockages but allow the lube system to continue to supply lubrication to points that are not blocked.

- Allows machine to continue to run when non-critical bearings are blocked
- No time or effort required for reset after blockage is cleared
- Easy information on blocked lines, high system pressure or blocked bearings
- 1/8 NPSF thread with O-ring seal

Part Number	Cracking Pressure
563170	750 psi (52 bar)
563171	1,000 psi (69 bar)
563172	1,250 psi (86 bar)
563173	1,500 psi (103 bar)
563174	2,000 psi (138 bar)
563175	2,500 psi (172 bar)
563176	3,000 psi (207 bar)

Performance Indicator Spare Parts

Part Number	Description
556569	Standard O-ring (90 DURO Fluoroelastomer), black
16U217	Indicator Port Plug, with O-ring 556569

E Ordering Information

Cycle Indicators and Proximity Switches

A wide variety of safeguards monitor and verify lube cycles. These switches sense the divider valve piston's action for accurate control and monitoring of lube cycles.

Part Number	Component	Description
563260	Magnetic Visual Cycle Indicator	The highly visible cycle indicator has a snap-action movement which allows the user to visually determine the timing of each divider valve cycle.
563272	Single Pole, Double Throw (SPDT) Standard Cycle Switch and Bracket Assembly	Used in conjunction with the cycle indicator pin at cycle rates not exceeding 60 cpm, the switch provides an electrical signal to the system controller which counts cycles to monitor and verify completion of the lube cycle. Included bracket clamps to spud around cycle pin.
563273	Moisture-resistant SPDT Cycle Switch and Bracket Assembly	
564357	Double Pole, Double Throw (DPDT) Cycle Switch and Bracket Assembly	
17L880	Solid State Proximity Switch (see page 161 for mating cables)	This rugged switch has no moving parts, making it ideal for applications such as metal stamping presses and yellow iron equipment. 10-32 VDC PNP switching, M12 electrical connector, 200 cpm, 7,500 PSI (518 bar) maximum pressure. 50,000,000 cycle life, IP65, IP68, IP69 rated.
563476	Field-Sensitive Proximity Switch, 3-Pin BH, with O-ring	A ceramic-magnet switch for grease or oil systems up to 200 cpm at pressure up to 3,500 psi (241 bar), accurately signals piston cycles, and is ideal for high-cycle applications. Bradley-Harrison (BH) electrical connectors, 115 VAC.
564399	Field-Sensitive Proximity Switch, 5-Pin BH, with O-ring	

Proximity Switch Spare Parts

Part Number	Component
556572	Standard O-ring (90 DURO Fluoroelastomer), black
557774	Enclosure Port Plug, requires O-ring 556572 (not included)

F Ordering Information

Mounting Bars

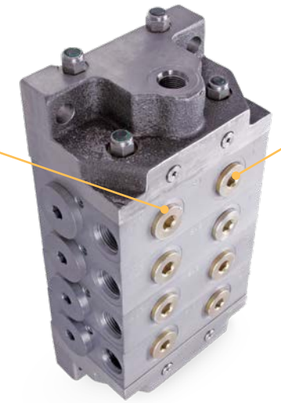
Part Number	Component	Description
561102	MXP/MX Mounting Bar	For welding to uneven metal surfaces. Two sets of mounting holes are threaded 5/16-18 to attach MXP or MX. This part is one individual bar, so order quantity 2 when needed.

Offers The Largest Output Available In A Series Progressive System

Ideal for heavy-duty and large bearing applications with wide temperature variations and high volume requirements. Can be easily accessorized with magnetic and electronic proximity switch cycle indicators to provide positive assurance of a successful lube event.

Indicator Ports

Alternate outlets on face of each valve can be fitted with optional performance indicators, taking the guesswork out of troubleshooting.



Robust Design

Is virtually indestructible and built to perform in extreme environments.

Typical Applications

- Pulp and paper, steel mills, heavy- and high-volume industrial applications

Typical Fluids

- Oil or Grease up to NLGI #2

Technical Specifications

Material	Plated Steel
Maximum Pressure	6,000 psi (413 bar)
Maximum Operating Temperature	350ºF (176ºC)
Maximum Cycle Rate with Cycle Pin	60 cycles/min
Maximum Cycle Rate without Cycle Pin	110-200 cycles/min (see chart below)
Instruction Manual	312497

MGO Maximum Cycle Rates without Cycle Pin (cycles/min)

Tie Rod Nuts (8 required)	N/A	557494

D Ordering Information

Cycle Indicating Switches

A wide variety of safeguards monitor and verify lube cycles. These switches sense the divider valve piston's action for accurate control and monitoring of lube cycles.

Part Number	Component	Description
563269	SPDT Cycle Switch, provides electrical signal to controller or PLC	Used in conjunction with the cycle indicator pin at cycle rates not exceeding 60 cpm, it provides an electrical signal to the system controller which counts cycles to monitor and verify completion of the lube cycle.
17L881	Solid State Proximity Switch (see page 161 for mating cables)	This rugged switch has no moving parts, making it ideal for applications such as metal stamping presses and yellow iron equipment. 10-32 VDC PNP switching, M12 electrical connector, 200 cpm, 6,000 PSI (518 bar) maximum pressure. 50,000,000 cycle life, IP65, IP68, IP69 rated.
563970	Field-Sensitive Proximity Switch, 3-Pin BH, with O-ring, 3,500 psi (241 bar) maximum	A ceramic-magnet switch for grease or oil systems up to 200 cpm, accurately signals piston cycles, and is ideal for high-cycle applications. Bradley-Harrison (BH) electrical connectors, 115 VAC.
564402	Field-Sensitive Proximity Switch, 5-Pin BH, with O-ring, 10,000 psi (690 bar) maximum	

E Ordering Information

Performance Indicators

These vital safeguards react to excess lube pressure when points or lines become blocked. Installed in indicator ports on the working piston sections, they quickly identify the affected lines.

Reset Indicators with Memory

Features and Benefits

- Provides quick troubleshooting tool with visual indication
- No tools for reset or parts to replace after indication
- Easy information on blocked lines, high system pressure or blocked bearings
- 7/8 in-14 SAE-ORB thread, with O-ring

	Part Number	Cracking Pressure
Image Coming Soon	564200	1,500 psi (103 bar)

Solid State PNP Proximity Switches

Solid State switches use a transistor instead of moving parts, making them the most durable option. They are the first choice for all applications that run on DC power. Note: all G3 Max pumps run DC power on their cycle switches, even when the pumps are AC powered.

Options for All Graco Trabon Valves

Mating threads for all valves including MSP, CSP and even MJ and MD!

Stainless Steel Construction

IP65, IP68 and IP69 rated.

PNP Transistor

Eliminates moving parts for maximum durability.

M12 Electrical Connector

Mating cables are readily available with options for LED indication and NPN conversion.

Typical Applications

- Cycle Indication for Series Progressive Divider Valves
- Metal stamping, construction equipment, nearly any application with a Series Progressive Divider Valve
- A great match to the G3 Max and G-Mini Controller pumps

Typical Fluids

- Oil or Grease up to NLGI #2

Technical Specifications

Material	Stainless Steel
Operating Voltage	9.6 - 32 VDC
Electrical Design	DC PNP
Max Operating Temperature	176°F (80 °C)
Switch state	Normally Open
Rated Life Cycles	50,000,000
Maximum Cycles per Minute	200
Approval or Classification	IP65, IP68, IP69
Instruction Manual	3A41444

Ordering Information

Solid State Proximity Switches

Part Number	Divider Valve Series	Maximum Pressure PSI (bar)
17L879	CSP	5,075 (350)
17M380	MD or MJ	3,000 (207)
17L983	MSP or MHH	7,500 (518)
17L880	MX or MXP	8,000 (552)
17L881	MGO	6,000 (414)

Adapter Cables

Convert M12 to the various connections that have traditionally been offered on Trabon proximity switches. See instruction manual number 3A4481 for more information on adapter cables.

Part Number	Notes
24Z714	M12 to 5-pin BH cable also converts signal from PNP to NPN.
24Z715	M12 to 3-pin BH cable also converts signal from PNP to NPN.
24Z719	M12 to 4-pin CH cable; signal remains PNP

M12 Wiring Harnesses

Part Number	Proximity Switch Connection	2nd Connection	Length	Note
For use with a G3 Max when connecting directly to the pump, when LED is required.				
25M602	M12 female, straight	Flying leads	16.5 ft (5 m)	PNP switch with NPN LED – requires 124594
25M603	M12 female, straight	M12 male, straight	16.5 ft (5 m)	PNP switch with NPN LED
For use with a G-Mini, a PLC or an external lubrication controller, when LED is required.				
25M604	M12 female, straight	Flying leads	16.5 ft (5 m)	–
24Z720	M12 female, 90°		16.5 ft (5 m)	
26A782	M12 female, 90°		33 ft (10 m)	

Other M12 Cables, Without LED Indication

Part Number	Proximity Switch Connection	2nd Connection	Length	Note
126331	M12 female, straight	Flying lead	16.5 ft (5 m)	Requires 124594 when used with G3 Max or G-Mini
124300	Flying leads	M12 male, straight	16.5 ft (5 m)	Requires 124301 when used with solid state proximity switch
124333	M12 female, straight		16.5 ft (5 m)	–
131214	M12 female, 90°		3.3 ft (1 m)	
131215			6.6 ft (2 m)	
131216			9.8 ft (3 m)	
130282	M12 female, straight		3.3 ft (1 m)	
130280			6.6 ft (2 m)	
130283			9.8 ft (3 m)	

FSM Cycle Indicating Proximity Switches

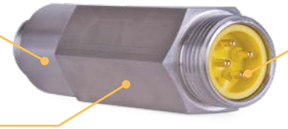
The Field-Sensitive Magnetic proximity switch is a dry contact magnetically actuated switch. Recent design improvmenets allow for reliable operation with AC and DC power. For metal stamping applications and other high-shock locations, use the Solid State proximity switches instead.

Stainless Steel Construction

Pressure ratings up to 8,000 PSI (552 bar).

Options for Most Graco Trabon Valves

Mating threads for valves including MSP, MXP and MGO.



Electrical Connector

Mating cables are readily available with options for LED indication (DC only) and NPN conversion.

Typical Applications

- Cycle Indication for Series Progressive Divider Valves

Typical Fluids

- Oil or Grease up to NLGI #2

Technical Specifications

Material	Stainless Steel
Operating Voltage	110 to 240 VAC, 24 VDC
Switch State	Normally Open
Rated Life Cycle	50,000,000+
Maximum Cycles Per Minute	125
Approval or Classification	UL & CSA
Manual	313228, 313229, 313230, 3A0884

Ordering Information

Air Over Oil Manifolds For MSP Valves

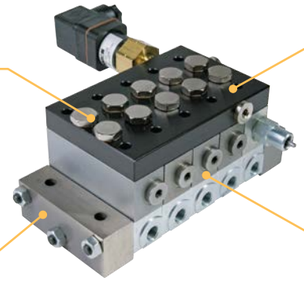
A Graco Exclusive Design! The Air Oil solution that detects air line or oil line faults in your system. Series progressive monitoring ensures your critical bearings are lubricated properly.

Convenient Manifold Design

Mounts directly to the face of standard MSP series progressive divider valve assembly.

Check Valve Design

Prevents oil from being forced into the air system if lube lines get crushed or bearings get blocked.



24B240

Shown installed on MSP divider valve assembly

Air Combines With The Oil

After the fluid outlet check, preventing air from backing up into your source oil system.

Complete Kits

Include manifold, air sensor and check valves for easy installation.

Typical Applications

- Steel mills, pulp and paper processing, high temperature and dirty environments

Typical Fluids

- Oil

Technical Specifications

Material	Aluminum
Minimum Air Pressure	45 psi (3.1 bar)
Maximum Air Pressure	250 psi (17 bar)
Output	3, 4, 5 or 6 Section Divider Valve Assemblies
Instruction Manual	313848

Ordering Information

AO Series Manifolds

Part Number	Description
24B237	Air/oil manifold assembly, 3-section

24J815	Air/oil manifold assembly, 4-section without air sensor
24J816	Air/oil manifold assembly, 5-section without air sensor
24J817	Air/oil manifold assembly, 6-section without air sensor

ACCESSORIES

Features and Benefits

- Conserves air – air required only during spray interval.
- Versatile – can be used with any centralized lube system or mechanical oiler and will handle grease or oil.
- External mix nozzle purges itself and prevents clogging.
- Saves lubricant by spraying smaller amounts at frequent intervals, provides better film, with no waste.
- Not to be used with G-Series Pumps or other low flow pumps.

Ball mills run at peak performance with Graco's Air-Lube Spra-Control Valve

Typical Fluids Handled

- Oil – minimum of 100 SUS at 100ºF
- Grease – NLGI #1 at any temperature, NLGI #2 at 32ºF or above

Technical Specifications

Minimum Air Pressure ..... 20 psi (1.4 bar)
Maximum Air Pressure ..... 150 psi (10.3 bar)
Spray Patterns ..... 4 in or 8 in (10.2 cm or 20.3 cm)

Ordering Information

Gear Spray Valves	
563275	Air-lube control valve and nozzle assembly – 4 in spray diameter, normal
563276	Air-lube control valve and nozzle assembly – 8 in spray diameter, wide

Features and Benefits

- Designed to custom fit lubrication systems and control when sections or zones of the system will receive lubricant
- Available in two- or three-way styles
- Available with normally closed and normally open valves for added convenience
- DC models meet typical application requirements

24P976

Ordering Information

Zone Valves	
24P976	Two-way valve, 24 VDC, normally open, Deutsch cable, 3,500 psi (241 bar)

Automatic Relief Indicator

Features and Benefits

These performance indicators pinpoint lube line blockages but allow the lube system to continue to supply lubrication to points that are not blocked.

- Allows machine to continue to run while non-critical bearings are lubricated
- No time or effort required for reset after blockage is cleared
- Easy information on blocked lines, high system pressure or blocked bearings

563159

Keep your machine running while lubrication gets to critical points

Typical Applications

- Works with MSP, MX, MXP, MJ and MHH divider valves

Rupture Indicator

Features and Benefits

Used on MH divider valve applications where lube system pressures exceed 2,500 psi.

- High pressure from blockage causes a disk to rupture
- Lubricant forces an indicator pin to protrude, indicating the blockage
- High pressure backs up through the system and trips a switch to shut the system off
- When fault is corrected, disk must be replaced and pin reset

563229

Know quickly when critical bearings aren't getting lubricated

Typical Applications

- Works with MHH divider valves

Ordering Information

Divider Valve Rupture Indicators w/Memory	
563220	3,700 psi (255 bar)
563228	2,800 psi (193 bar)
564355	4,600 psi (317 bar)
563223	5,500 psi (379 bar)
563225	6,400 psi (441 bar)
563229	2,800 psi (193 bar) with o-ring seal

557428	7,300 psi (503 bar)
557429	8,200 psi (565 bar)

Rupture to Atmosphere Indicator

Features and Benefits

- Used in conjunction with system pressure switch – can warn of a fault while allowing lube system to continue to deliver to critical bearings
- Requires replacement of the rupture disk to restart the lube system
- Easy information on blocked lines, high system pressure or blocked bearings

Rupture to Atmosphere psi (bar)	1,450 (100)	1,750 (121)	2,050 (141)	2,350 (162)	2,950 (203)	3,250 (224)

563961	5,000 psi (345 bar) – brown

Magnetic Visual Indicator

Features and Benefits

Six steel balls in a clear sleeve follow a magnet which moves with the cycling piston, providing a clear visual indication of lube cycles.

Ordering Information

Divider Valve Cycle Indicators and Switches	
563251	MS/MHH visual cycle indicator assembly – o-ring seal
563260	MX/MXP visual cycle indicator assembly

563251

Cycle Switch

- Monitors piston movement to ensure completed lubrication cycle – must have cycle indicator pin
- Provides positive feedback based on actual metering piston movement
- Mounts to MJ, MSP, MXP, or MX divider with cycle pin option with simple install
- Able to be set for normally open or normally closed operation

Technical Specifications

Voltage	Amp Rating
125/250/480 VAC	15A
125 VDC	1/2A
250 VDC	1/4A
24 VDC	6A*

*non-inductive

563272

Integrates to controllers, starters or PLCs

Ordering Information

Cycle Switches	
563270	MD-2, cycle switch, bracket assembly
563271	MD-3, cycle switch, bracket assembly
564356	MD-4, cycle switch, bracket assembly
563269	MGO cycle switch (SPDT), bracket assembly
557781	Replacement cycle switch for 563269, 563270, 563271, 564356, 563272
564357	MJ/MS/MHH/MXP cycle switch (DPDT) bracket assembly
563272	MJ/MS/MHH/MXP cycle switch (SPDT) bracket assembly
563273	MJ/MS/MHH/MXP cycle switch (SPDT) bracket assembly – moisture resistant
557546	Replacement bracket – 563272, 563273, 564357
260067	1/2 in NPT cord grip for use with switch 557781

Features and Benefits

- Used in Single Line Parallel systems to signal the controller to stop the pump and start venting when the lube system reaches pressure
- In Series Progressive systems, signals possible development of blockages, dirty filters, or other system problems

24K414 – Easy to adjust M12 by 1/4 in NPT pressure switch

- Orange dials to easily adjust set pressure and reset pressure
- LED lights visually display pressure switch operation
- 4-pin M12 connector easily connects to G3 Max pressure input via cable 124333 (sold separately)
- 1 /4 in NPT connection matches GL-32 and GL-43 inlet thread
- Set pressure range 290 to 5,800 psi (20 to 400 bar), reset pressure range 175 to 5,685 psi (12 to 392 bar)
- 9.6-32 VDC PNP polarity, also works with AC-powered G3 Max pumps
- IP67 protection rating

24K414

Physical dials allow for easy visual adjustment of set and reset pressures

557829 – Time proven, moisture resistant pressure switch

- Dry contact switch can be wired both Normally Open and/or Normally Closed
- Spare part for many Trabon pumps, including Modu-Flo
- Adjustable set pressure range 400 to 4,700 psi (28 to 324 bar), factory set at 1,150 psi (79 bar),
- Compatible with AC and DC voltage
- NEMA 4 rated, Moisture resistant, UL and CE marked

557829 shown with M12 connector (sold separately)

High-Low, Adjustable Pressure Switches

115124	Single post pressure switch, NEMA 3
24N181	IP65 rated for harsh environments. Adjustable from 580-5,800 psi (40 to 400 bar). Fluoroelastomer seals are suitable for use in high temperature environments and synthetic lubricants. Large orifice reduces grease solidification. DIN connector (Form-A), includes mating connector.

115124

24N181

New Pressure Sensors

- With DT connectors for mobile applications
- 3/8 in NPT thread options for use with GCI and GL-1 injectors
- Analog transducer works with GLC X controller, G3 Max Gen 2 pumps
- Include 10 ft (3 m) mating DT cable with flying leads (requires M12 connector 124594 to connect to G3 Max)

25U286	3,500 psi Fixed Pressure Switch (non-adjustable) – 3-pin DT electrical connector, 1/4 in NPT male thread, SPDT, watertight SST body. Kit includes 3/8 in NPT thread adapter for GCI and GL-1 systems.
25U285	Pressure Transducer – analog sensor, 0-5,000 psi, 0.5-4.5 VDC, 3-pin DT electrical connector, 3/8 in NPT male thread, watertight SST body.

25U285

Pressure Transducer – analog output 0.5 to 4.5 VDC

Features and Benefits

- Monitors lube line integrity to ensure lubricant is delivered to critical bearings
- Provides a visual or electronic indication
- Works with terminating oil or grease systems as well as recirculating systems

Double Ball Check Valves	
562642	90 psi (6.2 bar) nominal cracking pressure, 1/8 in NPT(F) x 1/8 in NPT(M), carbon steel body, SS ball, 8,000 psi (551.6 bar) max
562647	90 psi (6.2 bar) nominal cracking pressure, 1/8 in NPT(F) x 1/8 in NPT(M), SS body/ball, 8,000 psi (551.6 bar) max
563203	45 psi (3.1 bar) nominal cracking pressure, twin tandem, 1/4 in (6.4 mm) NPTF (M) x 1/8 in (3.2 mm) NPTF (M), SS body/ball, 10,000 psi (690 bar) max*
563205	45 psi (3.1 bar) nominal cracking pressure, twin tandem, 1/4 in (6.4 mm) NPTF (M) x 1/4 in (6.4 mm) NPTF (M), SS body/ball, 10,000 psi (690 bar) max*
563058	100 psi (2.4 bar) nominal cracking pressure, 1/4 in (6.4 mm) IP (F) x 1/4 in (6.4 mm) IP (M), brass body/ball, 3,000 psi (206.9 bar) max
563059	100 psi (2.4 bar) nominal cracking pressure, 1/4 in (6.4 mm) in O.D. pipe inlet (F), 1/4 in (6.4 mm) NPT (M) outlet, brass body/ball, 3,000 psi (206.9 bar) max
563061	48 psi (3.3 bar) nominal cracking pressure, 1/4 in (6.4 mm) NPSF (F) x 1/4 in (6.4 mm) NPSF (F), SS body/FKM ball, 7,500 psi (517.1 bar) max
563060	48 psi (3.3 bar) nominal cracking pressure, 1/4 in (6.4 mm) NPSF (F) x 1/4 in (6.4 mm) NPSF (F), SS body/NBR ball, 7,500 psi (517.1 bar) max

**For applications requiring a 90 degree connection, order elbow fitting 560531separately.*

Ordering Information

8.6 mm OD Hoses and Accessories				
Hose – 8.6 mm OD, 5/32 in (4 mm) ID, 3,000 PSI, braided with polyurethane cover				
17S552	82 ft (25 m)			
17S553	164 ft (50 m)			
17S554	328 ft (100 m)			
17S555	656 ft (200 m)			
Hose Ends – threaded, hose sleeve already included				
17Y690	Field-installable swivel hose end fitting, 8.6 mm OD hose, #4 JIC, SAE 7/16-20 female			
17Y691	Field-installable swivel hose end fitting, 8.6 mm OD hose, 1/8 NPT Male			
Hose Ends – 6 mm OD studs				
17L648	Hose sleeve, 8.6 mm OD hose – combine with any of the hose studs below			
G-Lock P-T-C	Compression			
17L649	17R565	Straight 6 mm hose stud		
17L650	17R566	90 deg. elbow 6 mm hose stud		
NPT and BSP Fittings – 6 mm ID on one end to receive 6 mm hose stud, male pipe thread on other end				
G-Lock P-T-C		Compression		
Straight	Elbow (90)	Straight	Elbow (90)	Pipe Thread
17Y689	N/A	17T780	17T781	1/8 in NPT
N/A	N/A	17T782	17T783	1/4 in NPT
17L545	17L449	17L548	17L546	1/8 in BSP
17R569	N/A	17R571	17R572	1/4 in BSP
1/8 in ID Hoses and Accessories				
128570	Hose, 1/8 in ID, 3,000 PSI, 200 feet, braided with polyurethane cover			
128571	Hose, 1/8 in ID, 3,000 PSI, 400 feet, braided with polyurethane cover			
128862	Hose, 1/8 in ID, 3,000 PSI, 2,000 feet, braided with polyurethane cover			
128579	Hose guard, 3/8 in ID, 160 feet			
128580	Hose guard, 3/8 in ID, 320 feet			
128561	Field-installable swivel hose end fitting, 1/8 in ID hose, #4 JIC, SAE 7/16-20 female			
128562	Field-installable swivel hose end fitting, 1/8 in ID hose, 1/8 NPT male			
128006	Clamp, 3/8 in OD hose			
17L941	Hose repair kit, 1/8 in OD			
1/4 in ID Hoses and Accessories				
128572	Hose, 1/4 in ID, 2,750 PSI, 100 feet, braided with polyurethane cover			
128573	Hose, 1/4 in ID, 2,750 PSI, 125 feet, braided with polyurethane cover			
130281	Hose, 1/4 in ID, 2,750 PSI, 250 feet, braided with polyurethane cover			
131164	Hose, 1/4 in ID, 2,750 PSI, 500 feet, braided with polyurethane cover			
128581	Hose guard, 1/2 in ID 80 feet			
128582	Hose guard, 1/2 in ID 100 feet			
128563	Field-installable swivel hose end fitting, 1/4 in ID hose, #4 JIC, SAE 7/16-20 female			
128564	Field-installable swivel hose end fitting, 1/4 in ID hose, 1/4 NPT male			
128565	Field-installable swivel hose end fitting, 1/4 in ID hose, 1/8 NPT male			
557944	Clamp, 7/16 in OD hose			
17L942	Hose repair kit, 1/4 in OD			
3/8 in ID Hoses and Accessories				
17P336	Hose, 3/8 in ID, 4750 PSI, 100 feet, steel braided with synthetic rubber cover			
17P337	Field-installable swivel hose end fitting, 3/8 in ID hose, #6 JIC, SAE 9/16-18 female			
117832	Fitting, #6 JIC SAE 9/16-18 male x 3/8 in NPT male			
116704	Fitting, #6 JIC SAE 9/16-18 male x 1/4 in NPT male			
1/8 in OD Tubing and Accessories				
127554	Tubing, 1/8 in OD, 625 PSI, 100 feet			
127551	1/8 in tube x 1/8 in NPT straight compression fitting			
1/4 in OD Tubing and Accessories				
127555	Tubing, 1/4 in OD, 625 PSI, 100 feet			
127552	1/4 in tube x 1/4 in NPT straight compression fitting			
555726	1/4 in tube x 1/4 in NPT elbow compression fitting			
127553	1/4 in tube x 1/8 in NPT straight compression fitting			
556634	1/4 in tube x 1/8 in NPT elbow compression fitting

MANZEL®

GRACO

Features and Benefits

- Provide a proven, cost-effective way to assemble customized oil systems that meet specific requirements by using standard modular components
- Increase opportunities to standardize lube system components and reduce lube maintenance and service costs
- Dependable and backed by the industry's most comprehensive international distributor network–with application expertise, parts stocks, and factory-trained service nearby, wherever you are located

Typical Fluids Handled

- Mineral oil base or synthetics

Typical Applications

- Provide lubrication to cylinder walls, bearings and other moving parts of equipment such as refineries, injection and storage, general manufacturing, air systems, and food processing equipment

Application	Industry	Use
Compressors	Petrochemical, Refineries, Gas Transmission, Injection and Storage, Cold Storage, General Manufacturing, Air Systems	Lubricate cylinder walls and piston shaft packing
Edgers, Planers, Band Saws	Lumber	Lubricate slides and ways. Blade coolant.
Mixers	Rubber	Used in the bleeding process and to lubricate dust stop seals
Can Lid Presses	Food Processing	Lubricate high-speed bearings
Band Saws	Lumber	Saw guides

Modularity

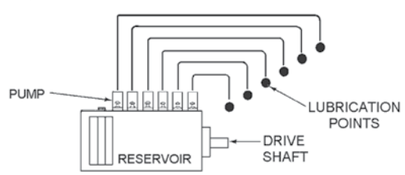
Force Feed Box Lubricators provide true modularity that permits customizing a pump-to-point lubrication system from off-shelf components. The modular variables consist of the following categories of components:

- Pumps
- Reservoir
- Reservoir Heaters
- Reservoir Oil Level Controls
- Drives
- Shaft Rotation Alarm
- Motor and Motor Mounting Bases

In addition to these Force Feed Box Lubricator components, Graco offers a complete line of auxiliary equipment. Also, MBL pumping packages can be used with divider valves in a series progressive installation. Graco's performance-proven products that may be used with Modular Box Lubricators are listed on the next page along with the respective literature number.

Description

A basic pump-to-point system is shown in the illustration which depicts six pumps mounted on a common reservoir from which each pump is dispensing oil to a single lubrication point. These pumps are operated by individual cams on one common drive shaft.



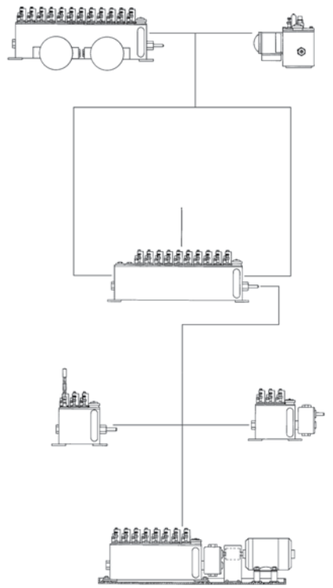
Pump-to-Point System

Interchangeability, Conversion and Retrofits

Graco GBL 7500 Pumps have been designed to be easily interchangeable with other manufacturers' pumps. For details contact your local Graco representative or call on us for system design and application assistance.

MBL Force Feed Box Lubricator = True Modularity

Wide choice of standard modular components helps you meet application requirements more exactly without the added costs of a custom system.



Pumps

Graco GBL 7500 pumps for pressures up to 7,500 psi.

24J391 – GBL 7500 Suction Pump, 3/16 in
24J392 – GBL 7500 Suction Pump, 1/4 in
24J393 – GBL 7500 Suction Pump, 3/8 in

- Ideal for heavy duty applications
- Interchangeable with pumps from competitive lubricators
- Suction (vacuum feed) pumps are available installed
- Pressure feed and gravity feed pumps are sold separately
- See instruction manual number 3A2257 for more information

Alarm Pump

Shaft Rotation/Low Level alarm based on GBL 7500 pump.

- Available as part number 24K466.
- Mounts in a pump slot
- Order separately for field installation.

Reservoirs and Mounting Bases

Eight reservoir capacities are available to hold from 4 to 40 pints and accommodate from 1 to 24 pumps. Blank cover assemblies included on unused pump stations. Eight sizes of motor mounting bases are available to accommodate the various reservoir sizes.

Reservoir Accessories

Automatic fill, low level, and electric heater options.

Drive Options

Over a dozen drive options are available from direct drive to a reduction ratio of 400:1. Options provide left- or right-hand end of reservoir mounting, end rotary drives, end ratchet drives and gear reducers. For details, see pages 184 and 185. See page 187 for MB60 (60:1) and page 90 for MB118 (118:1) specialty box lubricators.

Motors

Single- and three-phase motors are available at ratings of 1/3,1/4 and 1/2 HP, for 115/230 volt or 230/460 volt, in explosion-proof, TEFC or TENV configuration. Some motor configurations are available foot-mounted and/or face-mounted.

"Smart" Part Numbers

- Graco part numbers are 6-digits long
- MBL Smart Part Numbers start with "MB"
- The next four letters each specify one or more options:
  - **Option A**: Reservoir and Motor Mounting Base
  - **Option B**: Pump Style and Monitor
  - **Option C**: Pump Quantity
  - **Option D**: Drive
- MBabcd – replace lower case letters with selections offered in **Smart Menu Code** to form a **Smart Part Number**

8	76/88C and F4	1/4 in Suction Pump plus GARZO Level Controller
9	76/88E and F4	3/8 in Suction Pump plus GARZO Level Controller

NOTES:

1. When pump quantity is less than maximum pump stations of specified reservoir, a blank cover assembly is installed at Graco.
2. When low level is specified, deduct one pump for each option.
3. When ordering a ratchet drive, the maximum number of pumps allowable is 3.

Ordering Information

Manzel® MBL Box Lubricator Motors	
558289	M2 – 1/4 hp, 1,725 rpm, 115/230V, 1 ph., TENV, Foot-Mounted (56F)
558293	M3 – 1/4 hp, 1,725 rpm, 115/230V, 1 ph., Hazardous Area, Class 1, Group D, Foot-Mounted (56F)
558290	M5 – 1/4 hp, 1,725 rpm, 230/460V, 3 ph., TENV, Foot-Mounted (56F)
558292	M6 – 1/4 hp, 1,725 rpm, 230/460V, 3 ph., Hazardous Area, Class 1, Group D, Foot-Mounted (56F)
558294	M7 – 1/2 hp, 1,725 rpm, 115/230V, 1 ph., Hazardous Area, Class 1, Group C, Severe Duty, Tropical Insulation, Face-Mounted or Foot-mounted (56C with feet)
558291	M10 – 1/2 hp, 1,725 rpm, 230/460V, 3 ph., 60Hz, Class 1, Group D, Face-Mounted (56C)
557271	M11 – 1/2 hp, 1,725 rpm, 115/230V, 1 ph., 60Hz, TEFC, Face-Mounted (56C)
557270	M12 – 1/2 hp, 1,725 rpm, 230/460V, 3 ph., 60Hz, TEFC, Face-Mounted (56C)

Note: Heavy Duty drives (G14 - G18) require 56C, face-mount. Normally a 1/2 hp motor would be used because more pumps are being operated by the HD drives.

Auto-Fill Options	
559037	F1 Gravity Supply

Note: F2 – obsolete, use F1 instead. F3 – ordered with pumps (see page 133). F4 – ordered with pumps (see page 133).

Low Level Switches	
563013	L1 – Low Level Switch Hazardous Area. Class 1, Group C and D; Class 2 Group, E, F and G.
564015	L2 – Low Level, 10 Watts at 120 VAC, SPST Reed Switch, NC
Shaft Rotation Arm	
24K466	GBL 7500 Suction Alarm Pump
Heater Options	
557207	120 VAC Electric Heater, Hazardous Area, Class 1, Group B, one-prong heater. Can be installed in 1 in NPT port on MBL reservoirs.
557208	240 VAC Electric Heater, Hazardous Area, Class 1, Group B, one-prong heater. Can be installed in 1 in NPT port on MBL reservoirs.

Note: Former codes H3, H4 and H6 use 557207. For H1, H2 and H5, contact factory for details about part number 564058 (two prong heater) Class 1, Group D

Features and Benefits

- Provide a proven, cost-effective way to assemble customized oil systems that meet specific requirements by using standard modular components
- Increase opportunities to standardize lube system components and reduce lube maintenance and service costs
- 60:1 – 2 or 4 pump stations max, use with GBL 7500 Gravity-Fed or Pressure-Fed Box Lubricator

24V068

Typical Applications

- MB60 is perfect for bolt-on gas compressor box lubrication solutions
- MB118 is the right size and durable for triplex and quintuplex mud pump applications

24W636

Typical Fluids Handled

- Mineral oil base or synthetics

Manzel® GBL 7500 Pump

Features and Benefits

Each GBL 7500 single-piston pump is mechanically driven from a camshaft in the reservoir. They are adjustable from 1 to 27 drops per stroke and develop pressures up to 7500 psi (517 bar), depending on the piston size. All working parts are totally enclosed away from dirt, water, and impurities and are self-lubricated at all times by the fluid in the reservoir. Rugged construction for high performance and durability with easy to adjust pump output.

Typical Applications

- Compressors

Typical Fluids Handled

- Mineral or synthetics oil

Model HP-15™ High Pressure Lubricators

Features and Benefits

The high pressure lubricator comprises one to six integral sight and pump assemblies in a cast iron reservoir. The unit is designed for direct connection to an electric motor/speed reducer power source. A Manzel® terminal check valve is recommended in the lubrication system. When required to maintain proper oil viscosity, the reservoir can be fitted with an electric heater.

Typical Applications

- Multi-stage gas compression

Typical Fluids Handled

- Mineral or synthetic oil

Technical Specifications

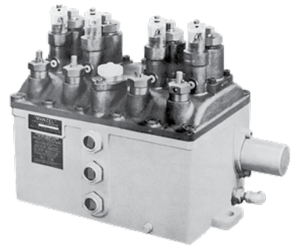
562951

Manzel® HP-50™ High Pressure Lubricator

Features and Benefits

- Operating pressures to 60,000 psi for lubricating compressor and circulator cylinder walls, heavily loaded bearings and other moving parts
- Single plunger force feed design is highly efficient for injecting lubricants and/or compatible fluids into high pressure systems
- Vacuum sight feeds on self-contained pumping units show output of lubricant to individual lubrication points
- All working parts are totally enclosed and self-lubricated
- Individual pumping units easily removed for service
- Feed rate infinitely variable from minimum to maximum with simple hand adjustment



Typical Applications

- Compressors and industrial equipment

Typical Fluids Handled

- Mineral or synthetic oil

Features and Benefits

The MVB lubrication system is a single line, series progressive system which divides pump output into predetermined proportional amounts and distributes these amounts to points of lubrication.

- One main supply from single pump
- Central monitoring of normal operation
- Automatic proportioning of lubricant through positive displacement valves
- Quick indication of problem areas

Typical Applications

- Compressors and reciprocating engines

Typical Fluids Handled

- Oil

NOTE: Motors for KOA base with 8:1 or 16:1 drives:
558289 (MOA) - 1/4 HP, 115/230 VAC, 60 Hz, single-phase, 1,725 rpm, TENV, 56F
558290 (MOB) - 1/4 HP, 230/460 VAC, 60 Hz, three-phase, 1,725 rpm, TENV, 56F

Pump Station One is located on the left side, above the sight glass, for all MVB configurations.

Features and Benefits

- Indicates Flow or No-Flow at any point in the system ahead of the Lube-Line Alert inlet. Not affected by discharge pressure.
- Operates under continuous or intermittent low-flow rates
- Universal use – operates in any air free force feed lubrication system–any make lubricator
- Sensitive to a wide range of flow from .006 cubic inches to 190 cubic inches per minute
- Many type lubricants and viscosities–mineral or synthetic
- Time delay adjustment to compensate for viscosity and/or flow rate. Quick and easy to adjust.
- Explosion-proof – UL and CSA Listed for Class I Groups C and D and Class II Groups E, F and G. Division 1 and 2 when installed as per NEC 501.
- For connection to any electrical warning system–lights, sound devices, machinery shut-off relays, telephones, etc.
- A low-level and shaft rotation

563030

Outlet Check Valves	
563044	with 1/4 in O.D. Tube Fitting (supplied with 563030)
563043	with 7/16-20 Straight Female Thread (supplied with 563032)
Fittings	
556624	7/16-20 Straight Male Thread x 1/8 in NPTF (2 supplied with 563032)
Springs	
556944	Standard Springs (installed at factory)
556939	Light Spring for Low Flow Applicator*
Repair Parts	
556812	Switch Assembly

When using the Light Spring 556939, fluid viscosity should not exceed 350 SUS.

Pneumatic/Electric Lube Sentry Valve

Features and Benefits

The Lube Sentry Valve provides automatic warning and shutdown of compressors, pumps and engines when oil is not flowing properly to primary dividers in series type lube systems.

- Absence of check valves to avoid trapping contamination from included solids in the lubricant
- Bolted-together components simplifying maintenance. The microswitch assembly on the pneumatic valve can be removed without disturbing existing lines or shutting down the equipment being lubricated.

563506

Technical Specifications

Material	Steel
Max Pressure	6,000 psi (414 bar)
Flow Rate (per day)	4 to 400 pints (1.89 to 189.2 liters)
Pressure Drop	250 psi (17 bar)
Seals	Fluoroelastomer
Lubricant	Oil (450-2,000 SUS)
Net Weight	0.5 lb (2.265 kg)
Operating Temperature	-20ºF to 180ºF (-29ºC to 82ºC)
Air Pressure (Max Pneumatic Valve)	125 psi (9 bar)
Electrical Rating	5 amps @ 125/250 VAC
	A,B or C @ 28 VDC, A- Inductive - 3 amp, B- Resistive - 5 amp, C- Max Inrush - 15 amp

563503	Pneumatic Valve
563502	Actuator
563505	Electric Lube Sentry, Complete
563504	Switch Assembly

Features and Benefits

The Graco® Balancing Valve assists divider valves to accurately proportion lubricant at high differential pressures. It is recommended for use when a pressure difference greater than 1,000 PSI exists between two or more of the points in a Graco divider valve system.

- Balancing valve is not affected by downstream pressure, assures accurate flow to all lubrication points
- Balancing valve is field adjustable. Reduces on-site inventory costs as one model meets all your system needs.
- Balancing valve is in-line mounted, so it lowers installation costs
- Balancing valve uses a wear-resistant tungsten-carbide ball to reduce maintenance costs

Technical Specifications

Material	Steel
Max Operating Pressure	6,500 psi
Adjustable	From 1,000 to 6,500 psi (Factory set at 3,000 psi)
Operating Temperature	-10ºF to 250ºF (-23ºC to 121ºC)
Lubricant	Oil
Seals	Fluoroelastomer
Net Weight	1.19 lb (0.54 kg)

ON-ROAD LUBRICATION

Electric Grease Jockey

The Grease Jockey system increases fleet utilization. It extends component life up to four times because automatic lubrication continuously flushes contaminants and reduces friction. Auto lube supports 50,000 mile service intervals, optimally lubricates when the vehicle needs it the most, and reduces operating costs. Service more vehicles in less time by utilizing modern automatic lubrication within your fleet.

Ruggedized Construction

U.V., chemical, and high-impact resistant – rigorously tested and field-proven.

NLGI #2 Compatible

NLGI #000 to #2 and 2,000 psi (138 bar).

Low Level Signal

Alerts when out of grease.

Electrical Drive

12 VDC (7 Amp) or 24 VDC (4 Amp) power. Protected against motor burn-out.

*Data Management System**

Track critical lubrication data. Fast programming.

Integrated Controls

Includes adjustable ON/OFF times, PIN code lockout and on-panel alerts.

*In-Cab Feedback**

Tri-color LED system feedback indicator with Manual Run button.

*DMS version optional equipment

Technical Specifications

Maximum Pressure	2,000 psi (352 bar)
Power	12 VDC, 24 VDC
Operating Temperature	-40° F to 158° F (-40° C to 70° C)
Reservoir Size	2 liter
Maximum Run Time	30 minutes
Output per Element/Min	0.5 in^3 (8 cm^3)
Certifications/Standards	IP69K, CE, ROHS, EMC, Pressurized Equipment Directive, National Fluid Power Association
Instruction Manual	3A5082

How to Select Your Graco Electric Grease Jockey Automatic Lubrication System

Determining the Electric Grease Jockey system best suited to your needs is accomplished by following steps A-D.

A — ELECTRIC PUMP

Choose an Electric Grease Jockey Pump with or without Data Management System (DMS)

Basic Pump:
- #2 grease
- Motor burn-out protection
- Low level feedback
- Power cable

DMS Pump:
All Standard Pump features, plus DMS:
- Performance data
- In-cab feedback
- Easy load profile option – plug and play programing

Pump Description	Part Number (select one)	
	12 VDC	24 VDC
Electric Grease Jockey	25C990	25C991
Electric Grease Jockey with DMS	25C992	25C993

Now that you've selected your pump configuration, it's time to determine the system lube points.

B — LUBE POINTS – FRONT

Determine Your System's Front Lube Points

Front modules all include king pin, tie rod end points, and drag link (left side).

What is your front braking system?
Do you have greaseable or sealed spring pins?

Braking System	Spring Pins	Part Number		
		Left Side		Right Side
Drum brakes (2 points each side)	Spring pins (3 points each side)	25C854 (10 points total)	and	25C859 (8 points total)
	Sealed springs (0 points)	25C858 (7 points total)	and	25C851 (5 points total)
Disc brakes (0 points)	Spring pins (3 points each side)	25C857 (8 points total)	and	25C850 (6 points total)
	Sealed springs (0 points)	25C849 (5 points total)	and	25C852 (3 points total)

C — LUBE POINTS – REAR BRAKES

Determine Your System's Rear Brake Lube Points

What is your rear braking system?
Do you have single or tandem axles?

Braking System	Axles	Part Number
Drum brakes	Tandem axle/TAX (8 points)	25C856
	Single axle/SAX (4 points)	25D084*
Disc brakes (0 points)	No kit needed	–

*If lubricating 5th wheel, order package 25C855 from section D instead of package 25D084.

D — LUBE POINTS – 5TH WHEEL

Determine Your System's 5th Wheel Lube Points

What is your 5th wheel configuration?

5th Wheel System	Part Number
5th wheel (6 points)	25C853
5th wheel/SAX drum (10 points)	25C855

The *NEW* G-Mini® Compact Electric Pump is also suitable for on-road mobile lubrication applications. Refer to pages 13-14 for details.

	25C988	Bare manifold with stem, nut and washer, 6 port
	25C989	Bare manifold with stem, nut and washer, 12 port

Injectors Designed for Frequent Medium-Pressure Metering

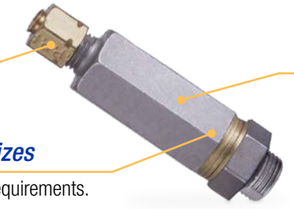
Designed for frequent metering and includes system pressure monitoring.

Compression Nut With Captured Ferrule Included

For fast, easy connection to 3/16 in OD tubing.

Injectors Come In Six Sizes

To meet a wide range of lube requirements.



Adjustable Output Volume

Easy to adjust by adding or removing spacers, design also prevents tampering.

Typical Applications

- On road mobile equipment such as trucks, semi-tractors, semi-trailers, and other vehicles and on-highway equipment.

Typical Fluids

- Grease up to NLGI #2

Technical Specifications

Maximum Operating Pressure	2,000 psi (138 bar)
Minimum Operating Pressure	450 psi (31 bar)
Reset Pressure	250 psi max (17.2 bar)
Maximum Temperature	149°F (65°C)
Cycle Indication	Optional cycle indicator, 563769
Wetted Parts	Aluminum, nitrile rubber (Buna-N), brass, carbon steel, alloy steel
Instruction Manual	312054, 3A5082

Keep Your Chassis Operating, Even in Harsh On-Road Conditions

Lubricant goes where it's supposed to, automatically, with little or no waste. Field-proven – some of the largest fleets have been using Grease Jockey for decades.

High-Strength, Shatter-Resistant Reservoir

Utilizes a high-quality, polycarbonate reservoir that is securely mounted to the pump with rigid tie rods for optimal sealing.

Field-Proven Reliability

Over four decades of over-the-road experience.

Rugged Cast Aluminum Construction

9:1 pump with 6 lb capacity.

High-Capacity Fill Port

Saves time and keeps you on the road.

Digital Control Timer

PIN code lockout keeps your air-powered lubrication system profile safe.

Technical Specifications

Construction	Cast aluminum body and bracket
Lubricant	NLGI #0, #00 or #000 grease
Output per Cycle	1.5 in^3 (24.6 cm^3)
Reservoir Capacity	6 lb (2.7 kg), 12 lb (5.4 kg)
Inlet Supply (dry) (air pump)	150 psi (1034 kPa) max; 60 psi (414 kPa) min
Air-to-Lube Ratio (maximum)	9:1
Solenoid Voltage (air)	12 or 24 VDC
Electrical	9 to 32 VDC (12 or 24 VDC Nominal)
Enclosure (air pump)	High-impact sealed plastic
Component Technology	Solid-state
Pump "ON" Time	Programmable: 1 second to 99 minutes
Lube Cycle Frequency	Programmable: 1 minute to 99 hours
Main Supply to Modules	5/16 in O.D. heavywall nylon
Module to Point	3/16 in O.D. heavywall nylon
Operating Pressure (nylon lines)	1,350 psi (9,310 kPa)
Instruction Manual	312054

How to Select Your Graco Pneumatic Grease Jockey Automatic Lubrication System

Determining the Pneumatic Grease Jockey system best suited to your needs is accomplished by using the following steps.

A — PUMP

Pneumatic Grease Jockey Pump

Pump Description	Part Number
Pneumatic Grease Jockey 9:1 ratio, 6 lb reservoir, 12 VDC, controller, solenoid, mainline, and mounting hardware	563854

Now that you've selected your pump configuration, it's time to determine the system lube points.

B — LUBE POINTS – FRONT LEFT

Determine Your System's Front Left Lube Points

What is your front braking system?
Do you have greaseable or sealed spring pins?

Braking System	Spring Pins	Part Number
Drum brakes (2 points)	Spring lube (3 points)	563644 (10 points total)
	Sealed springs (0 points)	563706 (7 points total)
Disc brakes (0 points)	Spring lube (3 points)	563654 (8 points total)
	Sealed springs (0 points)	563728 (5 points total)

C — LUBE POINTS – FRONT RIGHT / TRANSMISSION

Determine Your System's Front Right / Transmission Lube Points

Does your transmission have lube points? What is your front braking system?
Do you have greaseable or sealed spring pins?

Clutch Points	Braking System	Spring Pins	Part Number
2 clutch points	Drum brakes (2 points)	Spring lube (3 points)	563645 (10 pts total)
		Sealed springs (0 points)	563859 (7 pts total)
	Disc brakes (0 points)	Spring lube (3 points)	24X743 (8 pts total)
		Sealed springs (0 points)	563727 (5 pts total)
No clutch points	Drum brakes (2 points)	Spring lube (3 points)	563858 (8 pts total)
		Sealed springs (0 points)	563860 (5 pts total)
	Disc brakes (0 points)	Spring lube (3 points)	563655 (6 pts total)
		Sealed springs (0 points)	24H994 (3 pts total)

D — LUBE POINTS – REAR BRAKES

Determine Your System's Rear Brake Lube Points

What is your rear braking system?
Do you have single or tandem axles?

Braking System	Axles	Part Number
Drum brakes	Tandem axle/TAX (8 points)	563646
	Single axle/SAX (4 points)	563647*
Disc brakes (0 points)	No kit needed	–

*If lubricating 5th wheel, order package 258348 from Section E instead of package 563647.

E — LUBE POINTS – 5TH WHEEL

Determine Your System's 5th Wheel Lube Points

What is your 5th wheel configuration?

5th Wheel System	Part Number
5th wheel (6 points)	563648
5th wheel/SAX drum (10 points)	258348

ADDITIONAL SYSTEM PRODUCTS

Additional Grease Jockey System Products

Product Description	Part Number
Steering assist lube points for front right	563862 (2 points)
Steerable drop axle lube points	564194 (10 points)

Standard Graco Warranty

1-Year Warranty Policy

Graco warrants all equipment manufactured by Graco and bearing its name to be free from defects in material and workmanship on the date of sale by an authorized Graco distributor to the original purchaser for use. With the exception of any special, extended, or limited warranty published by Graco, Graco will, for a period of twelve (12) months from the date of sale, repair or replace any part of the equipment determined by Graco to be defective.

This warranty applies only when the equipment is installed, operated and maintained in accordance with Graco's written recommendations. This warranty does not cover, and Graco shall not be liable for general wear and tear, or any malfunction, damage or wear caused by faulty installation, misapplication, abrasion, corrosion, inadequate or improper maintenance, negligence, accident, tampering, or substitution of non-Graco component parts. Nor shall Graco be liable for malfunction, damage or wear caused by the incompatibility of Graco equipment with structures, accessories, equipment or materials not supplied by Graco, or the improper design, manufacture, installation, operation or maintenance of structures, accessories, equipment or materials not supplied by Graco.

This warranty is conditioned upon the prepaid return of the equipment claimed to be defective to an authorized Graco distributor for verification of the claimed defect. If the claimed defect is verified, Graco will repair or replace free of charge any defective parts. The equipment will be returned to the original purchaser transportation prepaid. If inspection of the equipment does not disclose any defect in material or workmanship, repairs will be made at a reasonable charge, which charges may include the costs of parts, labor, and transportation.

THIS WARRANTY IS EXCLUSIVE, AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.

Graco's sole obligation and buyer's sole remedy for any breach of warranty shall be as set forth above. The buyer agrees that no other remedy (including, but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property, or any other incidental or consequential loss) shall be available. Any action for breach of warranty must be brought within two (2) years of the date of sale.

Graco makes no warranty, and disclaims all implied warranties of merchantability and fitness for a particular purpose in connection with accessories, equipment, materials or components sold but not manufactured by Graco. These items sold, but not manufactured, by Graco (such as electric motors, switches, hose, etc.) are subject to the warranty, if any, of their manufacturer. Graco will provide purchaser with reasonable assistance in making any claim for breach of these warranties.

In no event will Graco be liable for indirect, incidental, special or consequential damages resulting from Graco supplying equipment hereunder, or the furnishing, performance, or use of any products or other goods sold hereto, whether due to a breach of contract, breach of warranty, the negligence of Graco, or otherwise.

Graco Automatic Lubrication Equipment Extended Warranty

This warranty does not cover, and Graco shall not be liable for, general wear and tear, or any malfunction, damage or wear caused by faulty installation, misapplication, abrasion, corrosion, inadequate or improper maintenance, negligence, accident, tampering, or substitution of non-Graco component parts. Nor shall Graco be liable for malfunction, damage or wear caused by the incompatibility of Graco equipment with structures, accessories, equipment or materials not supplied by Graco, or the improper design, manufacture, installation, operation or maintenance of structures, accessories, equipment or materials not supplied by Graco.

This warranty is conditioned upon the prepaid return of the equipment claimed to be defective to an authorized Graco distributor for verification of the claimed defect. If the claimed defect is verified, Graco will repair or replace free of charge any defective parts. The equipment will be returned to the original purchaser transportation prepaid. If inspection of the equipment does not disclose any defect in material or workmanship, repairs will be made at a reasonable charge, which charges may include the costs of parts, labor, and transportation.

THIS WARRANTY IS EXCLUSIVE, AND IS IN LIEU OF ANY OTHER WARRANTIES, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO WARRANTY OF MERCHANTABILITY OR WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE.

Graco's sole obligation and buyer's sole remedy for any breach of warranty shall be as set forth above. The buyer agrees that no other remedy (including, but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property, or any other incidental or consequential loss) shall be available. Any action for breach of warranty must be brought within one (1) year post the warranty period.

GRACO MAKES NO WARRANTY, AND DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, IN CONNECTION WITH ANY ACCESSORIES, EQUIPMENT, MATERIALS OR COMPONENTS SOLD BUT NOT MANUFACTURED BY GRACO.

These items sold, but not manufactured, by Graco (such as electric motors, switches, etc.) are subject to the warranty, if any, of their manufacturer. Graco will provide purchaser with reasonable assistance in making any claim for breach of these warranties.

In no event will Graco be liable for indirect, incidental, special or consequential damages resulting from Graco supplying equipment hereunder, or the furnishing, performance, or use of any products or other goods sold hereto, whether due to a breach of contract, breach of warranty, the negligence of Graco, or otherwise.

FOR GRACO CANADA CUSTOMERS

The parties acknowledge that they have required that the present document, as well as all documents, notices and legal proceedings entered into, given or instituted pursuant hereto or relating directly or indirectly hereto, be drawn up in English.

Les parties reconnaissent avoir convenu que la rédaction du présente document sera en Anglais, ainsi que tous documents, avis et procédures judiciaries exécutés, donnés ou intentés à la suite de ou en rapport, directement ou indirectement, avec les procedures concernées.

OUR BRAND PROMISE TO YOU

Since 1926, **innovation**, **quality** and **A+ Service** have been at the centre of Graco.

Experience Innovation

Our focus on innovation results in products and equipment that lead the industry with technologically-advanced features, pioneering design, high performance and unparalleled reliability. In short, innovation is how you get better products!

Building Quality

You're investing in high-quality products built to last for years of reliable service. Moreover, we partner with our customers to better understand how you're deploying our products in the field, then use your experiences to improve performance and durability.

A+ service, every time

You'll see A+ Service in action when you contact any of our support services options no matter where you are in the world. We'll listen to your situation and work methodically to resolve it as quickly as we can. We are guided by a mindset of integrity and a customer service view centred on collaboration and relationships, not transactions.

We're here to answer questions and help address your needs:
